***The Stockholm Paradigm* Aug 01 2019 The contemporary crisis of emerging disease has been a century and a half in the making. Human, veterinary, and crop health practitioners convinced themselves that disease could be controlled by medicating the sick, vaccinating those at risk, and eradicating the parts of the biosphere responsible for disease transmission. Evolutionary biologists assured themselves that coevolution between pathogens and hosts provided a firewall against disease emergence in new hosts. Most climate scientists made no connection between climate changes and disease. None of these traditional perspectives anticipated the onslaught of emerging infectious diseases confronting humanity today. As this book reveals, a new understanding of the evolution of pathogen-host systems, called the Stockholm Paradigm, explains what is happening. The planet is a minefield of pathogens with preexisting capacities to infect susceptible but unexposed hosts, needing only the opportunity for contact. Climate change has always been the major catalyst for such new opportunities, because it disrupts local ecosystem structure and allows pathogens and hosts to move. Once pathogens expand to new hosts, novel variants may emerge, each with new infection capacities. Mathematical models and real-world examples uniformly support these ideas. Emerging disease is thus one of the greatest climate change-related threats confronting humanity. Even without deadly global catastrophes on the scale of the 1918 Spanish Influenza pandemic, emerging diseases cost humanity more than a trillion dollars per year in treatment and lost productivity. But while time is short, the danger is great, and we are largely unprepared, the Stockholm Paradigm offers hope for managing the crisis. By using the DAMA (document, assess, monitor, act) protocol, we can “anticipate to mitigate” emerging disease, buying time and saving money while we search for more effective ways to cope with this challenge.**

My Fault Nov 03 2019 Poetry. Winner of the 2015 CSU Poetry Center First Book Competition, Selected by Eileen Myles. "MY FAULT is brainy and organic, interrupting itself. In MY FAULT politics and intimacy are jousting for the planet. Through MY FAULT nature appears, wearing a beautiful stuttering naked poem you know what they mean. Yes."—Eileen Myles "When someone says 'my fault' it's usually just after something not so awful has happened; it's usually a little light-hearted, a little excusable. When Leora Fridman says 'my fault' it's not so simple as it is most welcoming. This new book introduces the poet as someone who is willing to be someone, not to hide behind so-called points of view or other concoctions of literary fastidiousness. There's an 'I' in this book and it's an 'I' saying over and over again here I am, how are you? This 'I' says 'We are only looking about // Who can say where the handle is / to this an opening door // Who can hit my switch?' Reading MY FAULT is like being with a new friend who has chosen to trust you with her thoughts about just about everything. It's rare a poet that lets herself be so exposed, so open for inspection, so unguarded."—Dara Wier

It's All My Fault Jan 18 2021 Poverty. War. Bureaucracy. Divisiveness. Gridlock. Exploitation. Farmland degradation. Water shortages. Oil Spills. Nuclear meltdowns. Unemployment. Job dissatisfaction. Debt. Divorce. Depression. Anxiety. Addiction. Fear. Isolation. Loneliness. The 21st century world we live in is charging full steam ahead, seemingly at the speed of light. Though this breakneck pace has created many amazing marvels of modern technology, it has also created a more complex set of interlocking problems than our species has ever seen before. We all contribute to perpetuating faulty global systems in one way or another, but it takes a lot of humility to be able to admit that. By firstly focusing upon changing and improving one's own ways

of living, and beginning with the mantra of “it's all my fault” — rather than immediately pointing fingers and telling everyone else to change — we can break down cultural barriers, inspire action, and make much more rapid progress to reduce the immense suffering that exists in this world. Directly or indirectly, it affects us all. It's time for a new paradigm; a new type of culture that incorporates the interests of all global citizens. *It's All My Fault* lays out how we got here, how we can move forward in this journey, and delves deep into personal insights and vivid experiences from the author's life. It describes a practical set of innovative ideas that have the potential to ultimately lead to the day in which many of our greatest challenges — such as poverty, homelessness, and underemployment — become a thing of the past.

Fifty Things That Aren't My Fault Sep 06 2022 From the creator of the iconic "Cathy" comic strip comes her first collection of funny, wise, poignant, and incredibly honest essays about being a woman in what she lovingly calls "the panini generation." As the creator of "Cathy," Cathy Guisewite found her way into the hearts of readers more than forty years ago, and has been there ever since. Her hilarious and deeply relatable look at the challenges of womanhood in a changing world became a cultural touchstone for women everywhere. Now Guisewite returns with her signature wit and warmth in this debut essay collection about another time of big transition, when everything starts changing and disappearing without permission: aging parents, aging children, aging self stuck in the middle. With her uniquely wry and funny admissions and insights, Guisewite unearths the humor and horror of everything from the mundane (trying to introduce her parents to TiVo and facing four decades' worth of unorganized photos) to the profound (finding a purpose post-retirement, helping parents downsize their lives, and declaring freedom from all those things that hold us back). No longer confined to the limits of four comic panels, Guisewite holds out her hand in prose form and becomes a reassuring companion for those on the threshold of "what happens next." Heartfelt and humane and always cathartic, *Fifty Things That Aren't My Fault* is ideal reading for mothers, daughters, and anyone who is caught somewhere in between.

It's Not My Fault Oct 15 2020 A charming illustrated introduction to the pangolin—the shy, scaly-skinned creature scapegoated for the coronavirus outbreak. Pangolin. You've seen the name on the news ticker. You've read the headlines. You've typed it into your search bar. Maybe you know how for centuries, poachers and traffickers have targeted these enigmatic mammals, selling their trademark scales for use in traditional medicine and folk remedies. And that today, pangolins bear an unwieldy burden as the long-snouted face of the COVID-19 virus, as they have been identified as a possible link in the spread of the disease. But what is a pangolin? A mythical creature? A dinosaur? How could it have started all of this? And what can a pangolin teach us about surviving sickness, attacks, and isolation? With heartwarming images and witty revelations, this book will set the record straight: teaching you about these elusive introverts, the dangers they may or may not present to humans, and the threats that they face as an endangered species. This illustrated manifesto will clear up the tabloid misconceptions and reveal time-tested pangolin beliefs, including: Looks can be deceiving (pangolins are more closely related to cats and dogs than lookalike reptiles like armadillos). It's okay to be a loner—especially in a global pandemic. Your worth is not skin-deep. You deserve protection, even if you're different. Curling up into a ball is always the best defense. Through the delightful drawings and clever captions that fill the pages of *It's Not My Fault: A Pangolin's Manifesto*, animal lovers of all ages will laugh, cry, and learn that even the most misunderstood members of the animal kingdom are worthy of a second look.
