Art and the Everyday Apr 18 2021 This book examines the early twentieth-century movement that was sparked by the premiere of Erik Satie's ballet *Parade* in May 1917. Perloff argues that Satie and his colleagues, including Darius Millhaud, Francis Poulenc, Max Jacob, and Jean Cocteau, led French music away from Impressionism by infusing their compositions with French and American popular idioms. They also adopted aesthetic principles of parody, diversity, nostalgia, and repetition from the Parisian cabaret, cafe-concert, circus, fair, and music hall. With their collaborators Pablo Picasso, Fernand Legér, and Francis Picabia, they shared a radical disregard for traditional divisions separating popular and classical forms of creative expression.

Poetic License Oct 25 2021 In 'Poetic License,' Perloff insists that despite the recent interest in 'opening up the canon,' our understanding of poetry and poetics is all too often ruttled in

conventional notions of the lyric that shed little light on what poets and artists are actually doing today.

Pinter and Stoppard Jul 30 2019 Harold Pinter and Tom Stoppard, by most accounts the leading British playwrights of our time, might seem to come from very different aesthetic, cultural and political worlds. But as Carey Perloff's fascinating new book reveals, the two have much in common. By examining these contemporaries alongside one another and in the context of the rehearsal room, we can glean new insights and connections, including the impact of their Jewish background on their work and their passion for the details of stagecraft. Readers of Pinter and Stoppard: A Director's View will emerge with a set of tools for approaching their work in a performance environment and for unlocking the mysteries of the plays for audiences. With early pediatric diagnosis, improved medical, surgical and post operative care, it is now expected that 90% of patients born with congenital heart disease (CHD) will survive to adulthood. Therefore, the number of adult CHD (ACHD) patients will continue to rise. In fact, it is now estimated that for the first time in history, there are more adults living with CHD than children. The cardiologist who deals with these patients must therefore be familiar with congenital heart lesions in their uncomplicated state and know appropriate testing and follow-up methods.
