The Practical Gas and Oil Engine Handbook Aug 11 2020 Excerpt from The Practical Gas and Oil Engine Handbook: A Manual of Useful Information on the Care, Maintenance and Repair of Gas and Oil Engines, With Special Reference to the Diesel Oil Engine Actual Horsepower. The expression actual horsepower is equivalent to brake horsepower and is used to designate the power which an engine develops at the driving pulley. The actual or brake horsepower of an engine is obtained by means of a Prony brake or a dynamometer which gives the actual work or performance of the engine in foot-pounds for any given length of time. Adjustment. Adjusting the parts of a gas engine is not generally as well understood as it might be. It pays to take time and do the work properly, then it will not be necessary to tinker with one part or another. When main bearings are loose, the balance wheel will deflect as shown by the dotted lines J J, which is a sure indication that bearings on the crank shaft are too loose and allow it to spring at every explosion. This play around the crank shaft is shown at N in Figure 1, p. 10. The bearings have come loose, and sometimes the result will be a broken shaft. A crank bearing can be run very close if it is properly set up and all bolts firm, otherwise it will run hot quickly. Rolls-Royce Merlin Manual - 1933-50 (all engine models) Feb 03 2020 The Rolls-Royce Merlin liquid-cooled V-12 piston aero engine is considered an icon of British engineering with a worldwide recognition. It was one of the most successful aircraft engines of the Second World War period and its incremental development ran hand in hand with that of the legendary Supermarine Spitfire to which it was fitted from the very beginning. From its genesis in the 740hp PV-12 engine that was first flown in 1935, the Merlin went through rapid development during the war years until in its ultimate version, the Merlin 130 series designed specifically for the de Havilland Hornet, it produced over 2,600hp. Merlin engines powered many more of the best-known Allied combat aircraft of the war including the Hawker Hurricane, Boulton Paul Defiant, P-51 Mustang, Avro Lancaster, Handley Page Halifax, and the de Havilland Mosquito. Many variants of Merlin were built by Rolls-Royce at their factories in Derby, Crewe and Glasgow, as well as by Ford of Britain at their Trafford Park factory near Manchester. The Packard V-1650 was a license-built version of the Merlin made in the United States. When Merlin production finally ceased in 1950, almost 150,000 engines had been delivered.
