Student Affairs Feb 25 2020 Who has access to higher education today? At what financial and personal cost? Based on what conditions and criteria? How do students describe and interpret their experiences? And how can institutions facilitate and constrain successful participation and completion? These research studies extend current understandings of what it is to be a student in higher education by embracing the dynamic relationship between students as agents and institutions as living structures which impact on their lives. Focusing on the diverse experiences of today's non-traditional and traditional students, researchers explore how and why institutional rhetoric of inclusion, engagement, gender, and access may or may not be reflected in the reality of students' experiences. Student Affairs moves from theory to application by suggesting realistic strategies for addressing the challenges surrounding the interrelation of students and institutions. Each essay analyzes issues of access and participation in programs ranging from community college development studies to graduate studies. As a whole, this collection is a testament to how much institutional change has occurred in the social organization of postsecondary education, and how much more change is required to meet the challenge of equitable access and inclusion.

An African Elegy Jan 26 2020 Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

Evaluating Achievement of Senior High School Students in Canada Mar 20 2022 In Canada today there is a clear move toward a more outcomes-based education system. This report examines the state of high school student assessment and reviews standards and accountability strategies. It reports on the policies, programs, and initiatives in all provincial ministries or departments of education and a sample of school boards across the country. Data were derived from a telephone survey of departmental/ministerial representatives from all 10 provinces and the 2 territories and from a questionnaire that was mailed to 279 school boards. A total of 140 boards responded, a 50 percent response rate. Data show that both boards and ministries are putting more emphasis on the development of comprehensive policies to cover all aspects of student evaluation.

There is some movement away from relying on paper-and-pencil testing as the sole means of evaluation; the use of more authentic, performance-based approaches and a greater variety of assessment techniques are being promoted. Some of the best practices in high school evaluation involve use of a broad range of assessment methods; introduction of or improvements to provincial examinations; greater use of summative and formative evaluations; greater emphasis on modifying evaluation for special-needs students; use of performance-based assessment; and more reporting to parents and the public. Thirteen tables are included. Appendices contain copies of the two questionnaires and selected school board material. (Contains 19 references.) (LMI)
