Surgery Dec 27 2021 Surgery: A Case Based Clinical Review provides the reader with a comprehensive understanding of surgical diseases in one easy to use reference that combines multiple teaching formats. The book begins using a case based approach. The cases presented cover the diseases most commonly encountered on a surgical rotation. The cases are designed to provide the reader with the classic findings

on history and physical examination. The case presentation is followed by a series of short questions and answers, designed to provide further understanding of the important aspects of the history, physical examination, differential diagnosis, diagnostic work-up and management, as well as questions that may arise on surgical rounds. Key figures and tables visually reinforce the important elements of the disease process. A brief algorithmic flow chart is provided so the reader can quickly understand the optimal management approach. Two additional special sections further strengthen the student's comprehension. The first section covers areas of controversy in the diagnosis or management of each disease, and another section discusses pitfalls to avoid, where the inexperienced clinician might get in trouble. The text concludes with a series of multiple choice questions in a surgery shelf/USMLE format with robust explanations. **Surgery: A Case Based Clinical Review** is based on 20 years of Socratic medical student teaching by a nine-time Golden Apple teaching awardee from the UCLA School of Medicine and will be of great utility for medical students when they rotate on surgery, interns, physician assistant students, nursing students and nurse practitioner students.

Chinese Maritime Cases Oct 13 2020 This book selects leading, innovative and influential Chinese maritime judgments and presents full translation of them, with brief summary, to the readers so that they can have insights of how the Chinese maritime judges interpret, apply and develop Chinese maritime law in practice. China trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous and steadily growing trade volume and shipping activities, foreign ships, companies and persons are often caught by the Chinese maritime law and court. The parties involved and their lawyers are more than ever enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predict the potential problems and avoid the disputes outright. The book is appealing to and benefits worldwide law students, academics, practitioners and industrial people in the shipping, trade, insurance and financial fields. The book remedies to certain extent the situation that there is lack of authoritative sources available to foreign personnel to look into how Chinese justice system functions.

The European Court of Justice and the Policy Process Jan 28 2022 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. The European Court of Justice is one of the most important actors in the process of European integration. Political science still struggles to understand its significance, with recent scholarship emphasizing how closely rulings reflect member states' preferences. This book argues that the implications of the supremacy and direct effect of the EU Treaty have still been overlooked. As it constitutionalizes an intergovernmental treaty, the European Union has a detailed set of policies inscribed into its constitution that are extensively shaped by the Court's case law. If rulings have constitutional status, their impact will be considerable, even if the Court only occasionally diverts from member states' preferences. By focusing on the four freedoms of goods, services, persons, and capital, as well as citizenship rights, the book analyses how the Court's development of case law has ascribed a broad meaning to these freedoms. The constitutional status of this case law constrains policymaking at the European and member-state levels. Different case studies show how major pieces of EU legislation partly codify case law. Judicialization is important in the EU. It also directly constrains member-state policies. Court rulings oriented towards individual disputes are difficult to translate into general policies-but if they have constitutional status they have to go through this process. Policy options are thereby withdrawn from majoritarian decision-making. As the Court cannot be overruled, short of a Treaty change, its case law casts a long shadow over policymaking in the European Union, undermining the legitimacy of this political order.

ReNEUAL Model Rules on EU Administrative Procedure Oct 05 2022 The Research Network on EU Administrative Law (ReNEUAL) was established in 2009 and now comprises well over one hundred scholars and practitioners active in the field of EU and comparative public law. The aim of the network is to contribute to the development of a legal framework in which the constitutional values of the EU can be embedded in the exercise of public authority. Drafted by four working groups addressing the main aspects of EU administrative procedure, the ReNEUAL Model Rules offer a toolkit for European and domestic authorities seeking to regulate administrative action, reinforcing general principles of EU law and identifying, on the basis of comparative research, best practices in different specific policies of the EU. The book includes an extended introduction chapter, followed by the Model Rules, which are organised into six parts. Part I addresses general issues concerning the scope of the Model Rules and their relation to existing rules in EU legislation and Member State law; Part II is concerned with rulemaking by EU institutions, bodies, offices, and agencies; Part III focuses on single case decision-making by EU institutions, bodies, offices, and agencies; Part IV addresses contracts of EU institutions, bodies, offices, and agencies; Part V discusses mutual assistance between administrations; and Part VI addresses inter-administrative information management.

The Mythology of Crime and Criminal Justice Jul 10 2020 The social construction of crime is often out of proportion to the threat posed. The media and advocacy groups shine a spotlight on some crimes and ignore others. Street crime is highlighted as putting everyone at risk of victimization, while the greater social harms from corporate malfeasance receive far less attention. Social arrangements dictate what is defined as crime and the punishments for those who engage in the proscribed behavior. Interest groups promote their agendas by appealing to public fears. Justifications often have no basis in fact, but the public accepts the exaggerations and blames the targeted offenders. The net-widening effect of more laws and more punishment catches those least able to defend themselves. This innovative alternative to traditional textbooks provides insightful observations of myths and trends in criminal justice. Fourteen chapters challenge misconceptions about specific crimes or aspects of the criminal justice system.

Kappeler and Potter dissect popular images of crimes and criminals in a cogent, compelling, and engaging manner. They trace the social construction of each issue and identify the misleading statistics and fears that form the basis of myths—and the collateral damage of basing policies on mythical beliefs. The authors encourage skepticism about commonly accepted beliefs, offer readers a fresh perspective, and urge them to analyze important issues from novel vantage points.

Defendant Participation in the Criminal Process Apr 30 2022 Requirements for the defendant to actively participate in the English criminal process have been increasing in recent years such that the defendant can now be penalised for their non-cooperation. This book explores the changes to the defendant's role as a participant in the criminal process and the ramifications of penalising a defendant's non-cooperation, particularly its effect on the adversarial system. The book develops a normative theory which proposes

that the criminal process should operate as a mechanism for calling the state to account for its accusations and request for official condemnation and punishment of the accused. It goes on to examine the limitations placed on the privilege against self-incrimination, the curtailment of the right to silence, and the defendant's duty to disclose the details of his or her case prior to trial. The book shows that, by placing participatory requirements on defendants and penalising them for their non-cooperation, a system of obligatory participation has developed. This development is the consequence of pursuing efficient fact-finding with little regard for principles of fairness or the rights of the defendant.

Administrative Law and The Administrative Court in Wales Mar 18 2021 As we progress into the twenty-first century, Wales is acquiring a new identity and greater legislative autonomy. The National Assembly and the Welsh Government have power to create laws specifically for Wales. In parallel, the judicial system in Wales is acquiring greater autonomy in its ability to hold the Welsh public bodies to account. This book examines the principles involved in challenging the acts and omissions of Welsh authorities through the Administrative Court in Wales. It also examines the legal provisions behind the Administrative Court, the principles of administrative law, and the procedures involved in conducting a judicial review, as well as other Administrative Court cases. Despite extensive literature on public and administrative law, none are written solely from a Welsh perspective: this book examines the ability of the Welsh people to challenge the acts and omissions of Welsh authorities through the Administrative Court in Wales.

Young, Corker and Summers on Abuse of Process in Criminal Proceedings Feb 26 2022 "Setting out the law relating to abuse of process in criminal law, it analyses the underlying issues and draws together the evolving case law on different aspects of abuse of process including delay, breach of promise, the destruction of evidence, non-disclosure, entrapment and extradition. In the last six years there has been a significant amount of new law relevant to the development of abuse of process in criminal proceedings under an evolving definition of abuse of process. - The new edition is fully updated throughout with new chapters and material on: - What is the current definition of an abuse of process? Reviews the evolution of the definition from the Beckford case, through the Maxwell and Warren decisions onto the Crawley and D v A authorities. - Lost Evidence Cases - evolving case law in relation to failures to follow reasonable lines of enquiry in the context of CPS and DPP guidance on investigations into communication evidence. - Non-Disclosure Abuse - probably the most common category of abuse which is argued. The media have recently reported on cases where there were significant disclosure failings by prosecutors leading to the termination of proceedings, but what are the factors judges should consider in deciding whether non-disclosure amounts to abuse of process? - Entrapment abuse - Abuse of process after conviction - is this possible? The authors argue that, given a key objective of the doctrine of abuse of process is to protect the integrity of the criminal justice system, the doctrine should also apply post-conviction. - Is abuse of process in historic sex abuse dead? - In PR v R [2019] EWCA Crim 1225, a Court led by Lord Justice Fulford (the new Vice-President of the CACD) declined to interfere with a trial judge's decision to allow a case of historic sex abuse to proceed, even though the time periods of delay were significant, and the loss of material substantial. - New section in the Procedure Chapter on the making of Abuse Applications in Regulatory Proceedings - Criminal Procedure Rules 2015 - International abuse of process cases from the international courts"--
