God, Gulliver, and Genocide Nov 27 2021 "God, Gulliver, and Genocide explores the range of aggressions which inhabit the space between such figures of speech and their implementation, from the book of Genesis to the present day, but more especially in the period between the conquest to the Americas and the end of World War II. It examines a wide variety of authors and voices, chiefly Montaigne and Swift, but also Bartolome de las Casas and Jean de Lery, Oscar Wilde and George Bernard Shaw, and travel-writers and ethnographers from Columbus and Vespucci to Bougainville and Cook. Behind all these stand those mass-catastrophes in Genesis, the Deluge and the destruction of the Cities of the Plain, with their grim and quizzical relation to the mass-slaughters of human history, culminating in the Second World War."--BOOK JACKET.

This valuable resource will aid the readers in understanding the concept, carrying out extensive analysis, simulations, implementation and evaluation of OWC links. This 2nd edition is structured into nine compact chapters that cover the main aspects of OWC systems: History, current state of the art and challenges Fundamental principles Optical source and detector and noise sources Modulation, equalization, diversity techniques Channel models and system performance analysis Visible light communications Terrestrial free space optics communications Relay-based free space optics communications Matlab codes. A number of Matlab based simulation codes are included in this 2nd edition to assist the readers in mastering the subject and most importantly to encourage them to write their own simulation codes and enhance their knowledge.

Carbon Monoxide in Organic Synthesis Jan 06 2020 *Carbon Monoxide in Organic Synthesis* A thoroughly up-to-date overview of carbonylation reactions in the presence of carbon monoxide In *Carbon Monoxide in Organic Synthesis: Carbonylation Chemistry*, expert researcher and chemist Bartolo Gabriele delivers a robust summary of the most central advances in the field of carbonylation reactions in the presence of carbon monoxide. Beginning with a brief introduction on the importance of carbon monoxide as a building block in modern organic synthesis, the author goes on to describe metal-catalyzed carbonylations utilizing iron, cobalt, nickel, copper, and manganese. Descriptions of palladium, ruthenium, and rhodium-catalyzed reactions follow, as do discussions of metal-free carbonylation processes. The book is organized by metal to make the book useful as a guide for researchers from both academia and industry whose work touches on the direct synthesis of carbonyl compounds, carboxylic acid derivatives, and heterocycles. It aims to stimulate further discoveries in this rapidly developing field. Readers will also enjoy: A thorough introduction to carbonylations promoted by first row transition metal catalysts, including cobalt-catalyzed and nickel-catalyzed carbonylations An exploration of carbonylations promoted by second row transition metal catalysts, including ruthenium-, rhodium-, palladium(0)-, and palladium (II)-catalyzed carbonylations Practical discussions of miscellaneous carbonylation reactions, including carbonylations promoted by third row transition metal catalysts and metal-free carbonylation processes Perfect for catalytic and organic chemists, *Carbon Monoxide in Organic Synthesis: Carbonylation Chemistry* is also an indispensable resource for chemists working with organometallics and industrial chemists seeking a summary of important processes used to synthesize value-added products.

Southern African Development Community Land Issues Apr 20 2021 This book constitutes volume one of a two volume examination of development community land issues in Southern Africa. In this volume, Ben Chigara undertakes a holistic inter-disciplinary evaluation of the legitimacy of colonial and emergent post-colonial rule property rights in affected States of the Southern African Development Community (SADC). It particularly focuses on intensifying litigation in national courts, the SADC Tribunal, and more recently the Washington based International Centre for the Settlement of Investment Disputes (ICSID) regarding counter claims to title to property. The book examines cultural, economic and political drivers at the core of SADC land issues, focusing on their significance and potential to contribute to the discovery of a new, sustainable land relations policy that guarantees social justice in the distribution of all the advantages and disadvantages relating to the allocation and use of land. Chigara shows that persistent systematic administrative failures by pre-colonial, colonial and post-colonial authorities have made for a very complex challenge that requires Solomonic tools that neither the Courts alone, nor human rights centric morality alone could resolutely attend. The book recommends a sophisticated systematic new approach to SADC land issues, which is developed in volume two, Re-conceiving Property Rights in the New Millennium. This book will be of great interest to students and researchers of Property and Conveyancing Law, Human Rights Law and Land Law.

It includes book series that have continued under a deceased writer's real or pen name, undisguised offshoots issued under the new writer's name, posthumous collaborations in which a deceased author's unfinished manuscript is completed by another writer, unauthorized pastiches, and "biographies" of literary characters. The authors and works are entered under the following categories: Action and Adventure, Classics (18th Century and Earlier), Classics (19th Century), Classics (20th Century), Crime and Mystery, Espionage, Fantasy and Horror, Humor, Juveniles (19th Century), Juveniles (20th Century), Poets, Pulps, Romances, Science Fiction and Westerns. Philosophical Foundations of the Law of Equity Aug 13 2020 The law of Equity, a latecomer to the field of private law theory, raises fundamental questions about the relationships between law and morality, the nature of rights, and the extent to which we are willing to compromise on the rule of law ideal to achieve social goals. In this volume, leading scholars come together to address these and other questions about underlying principles of Equity and its relationship to the common law: What relationships, if any, are there between the legal, philosophical, and moral senses of 'equity'? Does Equity form a second-order constraint on law? If so, is its operation at odds with the rule of law? Do the various theories of Equity require some kind of separation of law and equity-and, if they do, what kind of separation? The volume further sheds light on some of the most topical questions of jurisprudence that are embedded in the debate around 'fusion'. A noteworthy addition to the Philosophical Foundations series, this volume is an important contribution to an ongoing debate, and will be of value to students and scholars across the discipline.

Gulliver's Travels Jul 04 2022 Shipwrecked and cast adrift, Lemuel Gulliver wakes to find himself on Lilliput, an island inhabited by little people, whose height makes their quarrels over fashion and fame seem ridiculous. His subsequent encounters - with the crude giants of Brobdingnag, the philosophical Houyhnhnms and brutish Yahoos - give Gulliver new, bitter insights into human behaviour. Swift's savage satire views mankind in a distorted hall of mirrors as a diminished, magnified and finally bestial species, presenting us with an uncompromising reflection of ourselves.

Bullen & Leake & Jacob's Precedents of Pleadings Jan 18 2021 The Civil Procedure Rules place great emphasis on the written presentation of trial materials and increase the propensity for cases to be decided on the papers. Yet the Civil Procedure Rules themselves offer little guidance on the drafting of statements of case. This edition seeks to fill the gap, offering a stock of authoritative, structured precedents, complete with guiding commentary. Restructured and rewritten to ensure it fully reflects the changes in practice, it should prove an easily accessible, user-friendly resource. The two-volume work features subjects such as human rights, harassment, information technology, environment, entertainment and sports law.

Entangling Relations Nov 03 2019 Throughout what publisher Henry Luce dubbed the "American century," the United States has wrestled with two central questions. Should it pursue its security unilaterally or in cooperation with others? If the latter, how can its interests be best protected against opportunism by untrustworthy partners? In a major attempt to explain security relations from an institutionalist approach, David A. Lake shows how the answers to

these questions have differed after World War I, during the Cold War, and today. In the debate over whether to join the League of Nations, the United States reaffirmed its historic policy of unilateralism. After World War II, however, it broke decisively with tradition and embraced a new policy of cooperation with partners in Europe and Asia. Today, the United States is pursuing a new strategy of cooperation, forming ad hoc coalitions and evincing an unprecedented willingness to shape but then work within the prevailing international consensus on the appropriate goals and means of foreign policy. In interpreting these three defining moments of American foreign policy, Lake draws on theories of relational contracting and poses a general theory of security relationships. He arrays the variety of possible security relationships on a continuum from anarchy to hierarchy, and explains actual relations as a function of three key variables: the benefits from pooling security resources and efforts with others, the expected costs of opportunistic behavior by partners, and governance costs. Lake systematically applies this theory to each of the "defining moments" of twentieth-century American foreign policy and develops its broader implications for the study of international relations.

The Reception of Jonathan Swift in Europe Oct 03 2019 Jonathan Swift has had a profound impact on almost all the national literatures of Continental Europe. Partnering for the Environment Jun 03 2022 Environmental policy domains are increasingly adopting strategies of cooperation over those of conflict. Decision-making processes founded upon collaboration and public participation are receiving more attention and favor and, in turn, engendering multistakeholder environmental partnerships. In his thoughtful analysis, Eric C. Poncelet seeks to illuminate the mechanics of these partnerships, especially at the level of social interaction. Drawing on ethnographic research performed with four case study partnerships in the European Union and the United States, Poncelet focuses on the diverging ways that stakeholders think, talk, and conventionally act with regard to the environmental issues at stake. Also explored are the roles of environmental partnerships as sites of personal transformation, where participants' and their perspectives, conceptualizations, and expectations can and do change. *Partnering for the Environment* concludes by examining the broader implications of multistakeholder partnerships for the future of environmental decision-making and suggests ways by which these partnerships may be more effectively used and managed.
