**Blood Highways Jul 18 2021** Blood Highways is the heart-wrenching account of the biggest product liability case in history: the Ford-Firestone fiasco. At the center of the story are two people: Tab Turner, a charismatic trial attorney from Arkansas, who has made a career out of forcing Ford and other automakers to own up to knowingly trade human lives for profits; and Donna Bailey, a single mother and outdoor enthusiast who fought back from the brink of death to confront those ultimately responsible for her accident. Weaving together harrowing depictions of the accidents and their consequences with the stories of the men and women who labor to police the auto industry and its reckless cost-cutting, Blood Highways will transform the way you view corporations, the government, the courts, and the media. Above all, this book shows the price the public pays in wrecked and mangled lives when companies focus more on shaving costs than making quality products.

**Mustang by Design May 16 2021 p.p1** {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble,

powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

If you name your ride, reminisce about sex in the back seat or enjoy roaring down the open road, you know why we love our wheels. But if you hate traffic, curse at the price at the pump or fight over parking spaces, you know why we hate them too. Drive is a cross-continent adventure that explores where our fuel-injected dreams have taken us. Award-winning journalist Tim Falconer invites us on his road trip as he meets vintage car enthusiasts on Route 66, rides along in a police cruiser, kicks the tires at a Las Vegas auto show and takes a hydrogen-powered car for a spin. Steering us along North America's interstates and blue highways, meandering through small towns, sprawling suburbs and walkable neighbourhoods, Falconer shows us the growing collision of cars and people. In this complicated affair, who's really in the driver's seat? Can smart growth, public transit and complete streets free us? A spirited, front-seat view of quirky locals and locales, Drive looks at what auto-dominated life means to our health, environment and communities. Falconer also opens the door on British and Argentine car cultures, and considers the road ahead for China and India, nations with increasingly American attitudes. As billions grab their keys, can we avoid carmageddon? "[A] fascinating survey of the automobile and its effect on society ... A fun book about a serious topic." —Winnipeg Free Press "Essential reading for any Canadian intrigued by the conundrum of finding better ways to get from here to there." —Spacing magazine
