***Health Care Off the Books* Aug 22 2021 Millions of low-income African Americans in the United States lack access to health care. How do they treat their health care problems? In *Health Care Off the Books*, Danielle T. Raudenbush provides an answer that challenges public perceptions and prior scholarly work. Informed by three and a half years of fieldwork in a**

public housing development, Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs, medical equipment, physician reference manuals, and insurance cards by mobilizing social networks that include not only their neighbors but also local physicians. However, membership in these social networks is not universal, and some residents are forced to turn to a robust street market to obtain medicine. For others, health problems simply go untreated. Raudenbush reconceptualizes U.S. health care as a formal-informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems. While the practices described in the book may at times be beneficial to people's health, they also have the potential to do serious harm. By understanding this hybrid system, we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes.

Whole Person Care Oct 04 2022 A ground-breaking new volume and the first of its kind to concisely outline and explicate the emerging field of whole person care process, Whole Person Care: A New Paradigm for the 21st Century organizes the disparate strains of literature on the topic. It does so by clarifying the concept of 'whole person' and also by outlining the challenges and opportunities that death anxiety poses to the practice of whole person care. Whole person care seeks to study, understand and promote the role of health care in relieving suffering and promoting healing in acute and chronic illness as a complement to the disease focus of biomedicine. The focus is on the whole person -- physical, emotional, social, and spiritual. Using concise, easy-to-read language, the early chapters offer practitioners a thorough understanding of the concepts, skills and tools necessary for the practice of whole person care from a clinician-patient interaction standpoint, while the last two chapters review the myriad implications of whole person care for medical practice. An invaluable resource for all areas of medical practice and for practitioners at all stages of development, from medical students to physicians and allied health providers with many years of experience, Whole Person Care: A New Paradigm for the 21st Century will have a profound impact on western medical practice in North America and elsewhere.

Providing Home Care for Older Adults Sep 30 2019 A practical guide to providing home-based mental health services, Providing Home Care for Older Adults teaches readers how to handle the unique aspects of home-based care and apply and adapt evidence-based assessment and treatment within the home-based setting. Featuring contributions from experienced, board-certified home care psychologists, social workers, and psychiatrists, the book explains the multifaceted role of a home-based provider, offers concrete and practical considerations for working within the home, and highlights adaptations to specific evidence-based methods used in treating homebound older adults. Also covered are special topics related to hoarding, safety, capacity evaluations, caregivers, case management,

and use of technology. Each chapter includes engaging case examples with practical tips that illustrate what it is like to work in this new and exciting frontier. Psychologists, counselors, and other mental health practitioners in home settings will be able to use this guide to provide effective home-based care to older adults.

Care for the World Feb 02 2020 This book applies and explores Catholic social thought, focusing on the relevance of the encyclical *Laudato Si'* in an era of climate crises.

The Logic of Care May 31 2022 ****Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010**** What is good care? In this innovative and compelling book, Annemarie Mol argues that good care has little to do with 'patient choice' and, therefore, creating more opportunities for patient choice will not improve health care. Although it is possible to treat people who seek professional help as customers or citizens, Mol argues that this undermines ways of thinking and acting crucial to health care. Illustrating the discussion with examples from diabetes clinics and diabetes self care, the book presents the 'logic of care' in a step by step contrast with the 'logic of choice'. She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge and technologies to diseased bodies and complex lives. Mol does not criticise the practices she encountered in her field work as messy or ad hoc, but makes explicit what it is that motivates them: an intriguing combination of adaptability and perseverance. *The Logic of Care: Health and the problem of patient choice* is crucial reading for all those interested in the theory and practice of care, including sociologists, anthropologists and health care professionals. It will also speak to policymakers and become a valuable source of inspiration for patient activists.

Care of the Soul Dec 02 2019 In this special twenty-fifth anniversary edition of Thomas Moore's bestselling *Care of the Soul*, which includes a new introduction by the author, readers are presented with a revolutionary approach to thinking about daily life—everyday activities, events, problems, and creative opportunities—and a therapeutic lifestyle is proposed that focuses on looking more deeply into emotional problems and learning how to sense sacredness in ordinary things. Basing his writing on the ancient model of “care of the soul”—which provided a religious context for viewing the everyday events of life—Moore brings “care of the soul” into the twenty-first century. Promising to deepen and broaden the readers' perspectives on their life experiences, Moore draws on his own life as a therapist practicing “care of the soul,” as well as his studies of the world's religions and his work in music and art, to create this inspirational guide that examines the connections between spirituality and the problems of individuals and society. “Thoughtful, eloquent, inspiring.” —San Francisco Chronicle “I soulfully recommend it without reservation.” —John Bradshaw, author of *Homecoming*

Building Connected Communities of Care Jun 19 2021 As a community, aligning efforts across a community to support the safety and well-being of vulnerable and underserved individuals is extraordinarily difficult. These individuals suffer disproportionately from health issues, job loss, a lack of stable housing, high utility costs, substance abuse, and homelessness. In addition to medical care, these individuals often critically need access to community social sector organizations that provide a distinct and complementary set of services, such as housing, food services, emergency utility assistance, and employment assistance. These services are just as vital as healthcare services to these individuals' long-term health and well-being, with data suggesting that 80-90% of health outcomes can be attributed to factors beyond direct medical intervention. This book proposes a novel approach to the coordination of medicine and social services through the use of people, process, and technology, with the goal being to streamline coordination between medical and Community-Based Organizations and to promote true cross-sector patient and client advocacy. The book is based on the experience of Dallas, TX, which was one of the first metropolitan regions to develop a comprehensive foundation for partnership between a community's clinical and social sectors using web-based information exchange. In the 5 years since the initial launch, the authors have been able to provide seamless connection, communication, and coordination between healthcare providers and a wide array of community-based social service organizations (a/k/a Community-Based Organizations or CBOs), criminal justice entities, and various other community organizations, including non-collegiate educational systems. This practical how-to guide is the codification of transferrable lessons from successes and challenges faced when working with clinical, community, and government leaders. By reading this playbook, leaders interested in building (or expanding) connected clinical-community services will learn how to: 1) facilitate cross-sector care coordination; 2) enable community care partners to better provide targeted services to community residents; 3) reduce duplication of services across partnering organizations; and 4) help to bridge service gaps in the currently fragmented system. Implementation of services, as recommended in this book, will ultimately streamline assistance efforts, reduce repeat crises and emergency funding requests, help address disparities of care, and improve the health, safety, and well-being of the most vulnerable community residents.

Care of the Adult with Intellectual Disability in Primary Care Jul 09 2020
Care of adults with intellectual disability in the UK has relocated from

long-stay hospitals to small community homes and family placements. This has led to GPs' increasing responsibility for the care of a group with particularly high rates of morbidity and mortality. This key book is the first in the UK to describe and advise on the medical care of adults with intellectual disability in primary care and in the community. It is a practical handbook, written by clinicians with regular involvement in the care of adults with intellectual disability, and is based on current practice and international evidence bases. Numerous conditions - from autism spectrum disorders to Williams syndrome - are explored, the complex problems they can present examined, and the need to offer annual health checks and implement practices to comply with QOF requirements addressed. A glossary and a list of useful electronic resources is also included. The book's content reflects the RCGP curriculum, and the Curriculum Guardian has been responsible for much of the editing. It will be informative reading for GPs, practice nurses, GP registrars, medical students, district nurses, physiotherapists and occupational therapists, as well as for the families and friends of adults with intellectual disability.

***Improving Health Care in Low- and Middle-Income Countries Mar 17 2021* This open access book is a collection of 12 case studies capturing decades of experience improving health care and outcomes in low- and middle-income countries. Each case study is written by healthcare managers and providers who have implemented health improvement projects using quality improvement methodology, with analysis from global health experts on the practical application of improvement methods. The book shows how frontline providers in health and social services can identify gaps in care, propose changes to address those gaps, and test the effectiveness of their changes in order to improve health processes and outcomes. The chapters feature cases that provide real-life examples of the challenges, solutions, and benefits of improving healthcare quality and clearly demonstrate for readers what quality improvement looks like in practice:**
Addressing Behavior Change in Maternal, Neonatal, and Child Health with Quality Improvement and Collaborative Learning Methods in Guatemala
Haiti's National HIV Quality Management Program and the Implementation of an Electronic Medical Record to Drive Improvement in Patient Care

Cancer Care for the Whole Patient Aug 29 2019 Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer-including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life-cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.

Self-Care for Caregivers Jul 21 2021 Take care of yourself as you care for others with this accessible, easy-to-follow self-care guide to relax and rejuvenate. It's been said that there are only four kinds of people in the world: those who have been caregivers, those who are currently caregivers, those who will become caregivers, and those who will need caregivers. Chances are you or someone you know is taking care of a loved one at home. If you do, you also know that caregiving—however fulfilling—is also hard on the caregiver's mental and physical health. Self-care is vital to caregivers maintaining stamina and a positive outlook for both themselves and the people they care for. But being so busy caring for others can make it hard to find time for yourself. In Self-Care for Caregivers, you'll find short, easy-to-read—and often easy-to-do—ways to replenish your mind, body, and spirit, including: -Practicing mindfulness by focusing in on your five senses -Remembering to HALT to check if you're hungry, angry, lonely, or tired -Making a gratitude list of at least three things you're grateful for -And much more! Full of practical advice

and reminders to have a quick snack, call a friend, create a sanctuary, write in a journal, and more ways to take care yourself—plus resources for caregiving—this book will go a long way towards making your caregiving experience a happier and more healthful one for you and the people you care for.

The Future of Home Health Care Nov 12 2020 Individuals with disabilities, chronic conditions, and functional impairments need a range of services and supports to keep living independently. However, there often is not a strong link between medical care provided in the home and the necessary social services and supports for independent living. Home health agencies and others are rising to the challenges of meeting the needs and demands of these populations to stay at home by exploring alternative models of care and payment approaches, the best use of their workforces, and technologies that can enhance independent living. All of these challenges and opportunities lead to the consideration of how home health care fits into the future health care system overall. On September 30 and October 1, 2014, the Institute of Medicine and the National Research Council convened a public workshop on the future of home health care. The workshop brought together a spectrum of public and private stakeholders and thought leaders to improve understanding of the current role of Medicare home health care in supporting aging in place and in helping high-risk, chronically ill, and disabled Americans receive health care in their communities. Through presentations and discussion, participants explored the evolving role of Medicare home health care in caring for Americans in the future, including how to integrate Medicare home health care into new models for the delivery of care and the future health care marketplace. The workshop also considered the key policy reforms and investments in workforces, technologies, and research needed to leverage the value of home health care to support older Americans, and research priorities that can help clarify the value of home health care. This summary captures important points raised by the individual speakers and workshop participants.

Pocket Book of Hospital Care for Children Jul 01 2022 The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

Care of the Soul, Twenty-fifth Anniversary Ed Sep 10 2020 #1 New York Times Bestseller With a new introduction by the author and additional material, this 25th anniversary edition of the #1 New York Times bestseller by Thomas Moore provides a powerful spiritual message for our troubled times. In this special 25th anniversary edition of Thomas Moore's bestselling book Care of the Soul readers are presented with a revolutionary approach to thinking about daily life—everyday activities, events, problems and creative opportunities—and a therapeutic lifestyle is proposed that focuses on looking more deeply into emotional problems and learning how to sense sacredness in even ordinary things. Basing his writing on the ancient model of "care of the soul"—which provided a religious context for viewing the everyday events of life—Moore brings "care of the soul" into the 21st century. Promising to deepen and broaden the reader's perspective on his or her own life experiences, Moore draws on his own life as a therapist practicing "care of the soul," as well as his studies of the world's religions and his work in music and art, to create this inspirational guide that examines the connections between spirituality and the problems of individuals and society.

***Finding What Works in Health Care* Jan 03 2020 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness**

research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. Finding What Works in Health Care also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

Families Caring for an Aging America Nov 05 2022 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research Jan 27 2022 Expanding on the National Research Council's Guide for the Care and Use of Laboratory Animals, this book deals specifically with mammals in neuroscience and behavioral research laboratories. It offers flexible guidelines for the care of these animals, and guidance on adapting these guidelines to various situations without hindering the research process. Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research offers a more in-depth treatment of concerns specific to these disciplines than any previous guide on animal care and use. It treats on such important subjects as: The important role that the researcher and veterinarian play in developing animal protocols. Methods for assessing and ensuring an animal's well-being. General animal-care elements as they apply to neuroscience and behavioral research, and common animal welfare challenges this research can pose. The use of professional judgment and careful interpretation of regulations and guidelines to develop performance standards ensuring animal well-being and high-quality research. Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research treats the development and evaluation of animal-use protocols as a decision-making process, not just a decision. To this end, it presents the most current, in-depth information about the best practices for animal care and use, as they pertain to the intricacies of neuroscience and behavioral research.

The Soul of Care May 19 2021 The moving memoir of a doctor who became a family caregiver and learned why care is so central to all our lives 'Beautiful and deeply moving. A truly extraordinary work that will change how we think about our lives and the society we live in' Michael Puett, author of *The Path When Dr Arthur Kleinman, an eminent Harvard psychiatrist and social anthropologist, began caring for his wife, Joan, after she was diagnosed with early-onset Alzheimer's disease, he found just how far the act of caregiving extended beyond the boundaries of medicine. In *The Soul of Care*, he delivers a deeply inspiring story about what it means to grapple with illness from both sides, as an experienced doctor and a loving husband. Caregiving is long, hard, unglamorous work - at moments joyous, more often tedious, sometimes agonizing, but always rich in meaning. Describing the practical, emotional and moral aspects of caring, Kleinman explores how we must ask uncomfortable questions of ourselves and of our doctors. Poignant and honest, *The Soul of Care* is an uplifting story about what really matters in our lives.*

***Design for Care* Sep 03 2022** The world of healthcare is constantly evolving, ever increasing in complexity, costs, and stakeholders, and presenting huge challenges to policy making, decision making and system design. In *Design for Care*, we'll show how service and information designers can work with practice professionals and patients/advocates to make a positive difference in healthcare.

The Routledge Handbook of Social Care Work Around the World Oct 12 2020 The Routledge Handbook of Social Care Work Around the World provides both a comprehensive and authoritative state-of-the-art review of the current research in this subject. It is the first handbook to cover social care work research from around the world, including both low- and middle-income countries as well as high income countries. Each of the 22 chapters are written by experts on long-term care services, particularly for older people and cover key issues and debates, based on research evidence, on social care work in a specific country. They look at perspectives of social care work from the macro level: the structural conditions for long-term care, including demographic challenges and the long-term care policy, the meso level: the level of provider organizations and intermediaries, and the micro level: views of care workers, care users, and unpaid informal carers. Furthermore, they discuss a number of topics central to discussions of care work including marketization, personalization policies, policy implementation under austerity, the provision of social care work whether through public services, or private arrangements, or mixed types, funding, the feminization of social care and the new role that technology, and robots can play in care work. By drawing together leading scholars from around the world, this book provides an up to the minute snapshot of current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for scholars and an indispensable teaching tool for

use in the classroom and will be of interest to students, academics, social workers, social policy-makers and human service professionals.

The Care Process Apr 17 2021 The Care Process is an accessible textbook for nursing, health and social care students that covers the fundamental principles and practice of the care process. Using clear explanations, scenarios, activities, and an overarching case study that runs through every chapter, the book will help you to understand the four stages of the care process - Assessment, Planning, Implementation, and Review and Evaluation. You will learn: * How communication underpins all stages of the care process and how to develop your own communication skills * How to use decision-making models and tools in the care process * How, why and when to use different tools and approaches in assessing service users' needs * How to apply the principles of care planning to your practice * How to ensure that the care you provide is person-centred and holistic * How to evaluate care interventions and how review and evaluation can assure the quality of care An Appendix provides a detailed mapping of the new NMC standards of proficiency for registered nurses against each chapter. This concise and practical book will help you to understand the care process and to incorporate the skills and techniques you have learnt into your own care practice. Essentials is a series of accessible, introductory textbooks for students in nursing, health and social care.

Patient Safety and Quality Dec 06 2022 "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk/>

***Circles of Care* Sep 22 2021 "My parent needs help, but refuses to consider a nursing home." That's the dilemma facing millions of baby boomers today. How can we ensure responsible, compassionate, even uplifting care for our aging parents at home? Mindfulness is key, Ann Cason writes. Good care begins with watching and listening, with entering the elder's world and accepting it. Drawing on decades of experience in caring for the elderly, Cason helps us understand how old age feels and how we can help. Then, through exercises, care studies, and numerous examples and suggestions, *Circles of Care* shows how to:**

- Work out a plan of care
- Assemble and foster a caregiving team
- Create an uplifting daily routine—and vary it creatively
- Plan nutrition, medical needs, finances, and outings
- Improve the elder's personal care and physical environment
- Ease conflicts between elders and their caregivers or families
- Avoid caregiver burnout
- Work with mood swings, confusion, and memory loss

Home-Based Medical Care for Older Adults Feb 25 2022 As the population of older adults in the U.S. continues to grow, medical house calls are increasingly part of a system of comprehensive home-based care for patients who have difficulty accessing office-based care. Clinicians who have been trained mostly in office and hospital settings must adapt their usual approaches to accommodate a wide range of environmental, social, and physical circumstances that impact home-limited patients. Ideally, a comprehensive team of clinicians proficient in multiple domains of functional, social, and medical care can work together to address potential gaps in any one clinician's expertise. Unfortunately, such teams are still rare. This book aims to equip individual clinicians with the interdisciplinary knowledge, skills, and perspective they need to provide the best care possible with limited formal interdisciplinary support. This book offers 20 patient cases drawn from the collective experience of experts in home-based medical care from highly respected academic and clinical programs across the United States. Each case demonstrates a scenario that is frequently encountered and/or very important in home-based medical care practice. Each scenario frequently proves to be

challenging for many professionals because it requires an approach or leverages aspects of care delivery that most are not trained in. Additionally, each scenario reflects an approach to care that is enhanced by interdisciplinary input. Finally, each case lends itself to a practical problem-solving approach that could be accomplished by most home-based medical care providers, even in the absence of an interdisciplinary team. Written by interdisciplinary experts in geriatric home-based care, this book serves as both an educational tool for learners in all related disciplines as well as a quick reference for experienced clinicians looking to augment their existing house call "toolbox."

The World's Health Care Crisis Oct 31 2019 At present, human society is facing a health care crisis that is affecting patients worldwide. In the United States, it is generally believed that the major problem is lack of affordable access to health care (i.e. health insurance). This book takes an unprecedented approach to address this issue by proposing that the major problem is not lack of affordable access to health care per se, but lack of access to better, safer, and more affordable medicines. The latter problem is present not only in the United States and the developing world but also in countries with socialized health care systems, such as Europe and the rest of the industrialized world. This book provides a comparative analysis of the health care systems throughout the world and also examines the biotechnology and pharmaceutical industries. Examines the health care structure of the United States, Europe, and the third world, both separately and comparatively Offers primary source insight through in-depth interviews with pharmaceutical and health care industry leaders from around the world Carefully explains, in clear terms, the intricacies of the health care and pharmaceutical system and how these intricacies have led to the current crisis Offers concrete, comprehensive solutions to the health care crisis

Palliative Care: A Practical Guide for the Health Professional Aug 02 2022 This book encourages health professionals to reconceptualise their practice in the light of the fact that their patients are deteriorating and dying, supporting them in their dichotomous role which involves affirming that person's life whilst acknowledging that that life is ending. Professionals are encouraged to think laterally, to be creative in their use of their core skills, and to use their life skills and experience to change the focus of their interventions. By making these changes, those involved with caring for the dying will be able to address issues related to burnout and feeling de-skilled. The authors share their considerable experience with the reader - what works for both patient and carer/professional when working in this field. By providing workable solutions, they empower those in disempowering situations, such as when working with terminally ill children and adults. The book is truly holistic and client-centred in its approach, upholding the philosophy of palliative care. Aimed at all who interact with children and adults who have a life-limiting condition or who are dying Offers practical examples of approaches to dilemmas and

emotional issues commonly face by those working in palliative care Encourages professionals to think laterally, to be creative in their use of core skills, and to use their life skills and experience to change the focus of their interventions Moves the emphasis away from the medical model to the emotional and spiritual influences on quality of life Offers clear, workable guidelines and demonstrates practical solutions, based on proven theory and experience, to problems encountered on a day-to-day basis by patients and those coming into contact with them

The Care Manifesto Feb 13 2021 We are in the midst of a global crisis of care. How do we get out of it? The Care Manifesto puts care at the heart of the debates of our current crisis: from intimate care--childcare, healthcare, elder care--to care for the natural world. We live in a world where carelessness reigns, but it does not have to be this way. The Care Manifesto puts forth a vision for a truly caring world. The authors want to reimagine the role of care in our everyday lives, making it the organising principle in every dimension and at every scale of life. We are all dependent on each other, and only by nurturing these interdependencies can we cultivate a world in which each and every one of us can not only live but thrive. The Care Manifesto demands that we must put care at the heart of the state and the economy. A caring government must promote collective joy, not the satisfaction of individual desire. This means the transformation of how we organise work through co-operatives, localism and nationalisation. It proposes the expansion of our understanding of kinship for a more 'promiscuous care'. It calls for caring places through the reclamation of public space, to make a more convivial city. It sets out an agenda for the environment, most urgent of all, putting care at the centre of our relationship to the natural world.

Critical Approaches to Care Jan 15 2021 Care shapes people's everyday lives and relationships and caring relations and practices influence the economies of different societies. This interdisciplinary book takes a nuanced and context-sensitive approach to exploring caring relationships, identities and practices within and across a variety of cultural, familial, geographical and institutional arenas.
