Coaching the Modern 2-6-2 Soccer Formation Jul 06 2020 The game of soccer is perpetually in a constant state of change; as new tactical trends appear each and every season. Some of the changes are adaptations and variations from the past, while others are completely original. If we roll back the clock to the first international friendly match ever played in 1872, you would have witnessed England playing a 1-2-7 formation, against the Scottish 2-2-6. Soccer's early formations were built with few players in the back and many up top. Fast forward to the 1920's and things began to change, this is when the 3-2-2-3 W-M formation made its debut, introduced by Herbert Chapman at Arsenal. Then jump ahead to the 1966 World Cup, as England played the first diamond 4-4-2 formation. Change continued to come in 1974, when the Dutch coach Rinus Michels lined the team up in a 4-3-3 formation, introducing the world to "Clockwork Orange". The 2000's has been responsible for the emergence of the 4-2-3-1 formation, along with the 4-6-0 "false 9", introduced by the Spanish. However, the question every top coach is constantly pursuing is, what is the next major trend or change in the game? We have already seen some signs of change, with the inverted wingbacks of Guardiola at Manchester City, and the deterioration of the classic back four, even Arsenal have changed to a 3 back system! As we look at the history of soccer, the changes in formations are pronounced. The original formations have been compared to inverted or upside down pyramids, with 7 attacking players up top and only 2 in the back. As the game progressed, the pyramid completely turned around, as seen with the 4-2-3-1 formation, which took on a realistic pyramid type of shape, and now the shape appears to be changing again. This book focuses on what very well may be one of the formations of the future, the 2-6-2 formation. We saw the 2-6-2 formation used when Guardiola's Bayern, dismantled Roma in a Champions League match 7-1. Argentina recently played a 2-3-4-1 in a friendly match against Singapore. The reality is that the modern game is seeing the pyramid shape turning more into a rhombus, small on the bottom, large in the middle and small on top. Obviously, simply talking about general shapes is an over simplification of formations, but this type of rhombus idea, seems to be where the formation trend is heading. How many teams have switched to a 3-5-2 in the last 24 months? Many more than a few years ago, that's for sure. Arsenal who rarely change anything, went to 3 at the back last spring along with many others. The new trend in formations also points to need for developing more intelligent players. In order to effectively play with 2 - 3 players in the back, an overloaded midfield and two forwards, players must be excellent decision makers and possess high soccer IQ's. Today's new formations demand players be smart and skillful, while the older bunker-in and counter attack systems (4-2-3-1 or 4-4-2) can more easily accommodate the simple, disciplined and hard-working player. It's my opinion that the modern player must be technical, creative, smart, have a high soccer IQ and be an active problem solver. As formations become more expansive and more dangerous, they also become more vulnerable, the player of the future must be a different breed, they must possess a complete soccer brain.

4-2-3-1 Formation Specific Soccer Passing Patterns and Shadow Play Exercises Nov 09 2020 Many coaches use passing patterns and shadow play exercises on a regular basis to increase technical ability, improve fitness levels, stimulate movement ideas, build discipline, increase focus, encourage coordinated timed multi-player movements and establish a group passing tempo. There is no doubt that passing patterns and shadow play exercises are valuable for player development. However, at some point it will become important to use specific patterns that directly fit the teams "Game Model". A "Game Model" is simply the way you want your team to play; it involves the team's style of play, identity and formation. The way you train at some point should specifically relate to the way you play (training model = game model). This book takes the 4-2-3-1 soccer formation and provides a series of passing patterns and shadow play exercises that directly relate to the teaching of a flexible 4-2-3-1 formation. When player's train using these patterns, they are simulating many of the movements and passing combinations they will encounter when playing the 4-2-3-1 formation in an actual game. I understand that no two coaches are the same and every coach will interpret formations in their own way unique way. However, I designed this book to teach the 4-2-3-1 formation in a fashion that I consider to be modern, flexible and fluid. The training exercises are intended to stimulate movement ideas for players by showing them the vast possibilities that are available by playing a flexible 4-2-3-1 system. Ultimately the goal is to encourage different players to fill different spaces though out the game, so players are not just filling the same old predictable spaces assigned to them. When a formation is played in a way that it is too robotic and ridged, with no real freedom of movement and interchanging of positions, it becomes predictable, less dynamic, boring and ultimately less effective. I prefer to let my players operate under the general umbrella of the 4-2-3-1 formation, while still allowing them the freedom to make their own movement decisions in order to exploit the opponent. The exercises presented in this book will aid you in teaching the concepts and ideas needed to be successful playing a fluid and flexible version of the 4-2-3-1 formation.

Christian Character Formation Aug 26 2019 Christian Character Formation investigates worship and formation in view of Christian anthropology, particularly union with Christ. Traditions which value justification by faith wrestle to some degree with how to describe and encourage ethical formation when salvation and righteousness are presented as gracious and complete. The dialectic of law and gospel has suggested to some that forgiveness and the advocacy of ethical norms contend with each other. By viewing justification and formation in light of Christ's righteousness which is both imputed and imparted, it is more readily seen that forgiveness and ethics complement each other. In justification, God converts a person, by which he grants new character. Traditional Lutheran anthropology says that this regeneration grants a new nature in mystical union with Jesus Christ. By exploring the Finnish Luther School led by Tuomo Mannermaa, Gifford A. Grobrien explains how union with Christ imparts righteousness and the corresponding new character to the believer. Furthermore, as means of grace, the Word and sacraments are the means of establishing union with Christ and nurturing new character. Considering Oswald Bayer's "suffering" the word of Christ, Louis-Marie Chauvet's "symbolic order" and Bernd Wannewetsch's understanding of worship as Christianity's unique "form of life," Grobrien argues that worship practices are the foundational and determinative context in which grace is offered and in which the distinctively Christian ethos supports virtues consistent with Christian character. This understanding is also coordinated with Stanley Hauerwas's narrative ethics and Luther's teaching of virtue and good works in view of the Ten Commandments.
