Total War and Historical Change Jun 20 2021 What do we mean by social and cultural change? What is the nature of total war? How do wars come to happen? What are the consequences of war? In exploring these four key themes, this collection provides a major resource for the study of 20th century war and defence in European history and exemplifies different historical methods and approaches. The authors are drawn from a range of disciplines including those of economics, literature and the arts as well as military, social and political history, and together they raise some of the most significant problems and debates in the study of history. The essays range from standard seminal works by Stanley Hoffmann, Arno J. Mayer and Charles Maier to more recent contributions by Richard Bessell, Mark Harrison and Hew Strachan.

The Legacy of Genghis Khan Dec 15 2020 Komaroff (curator of Islamic Art, Los Angeles County Museum of Art) and Carboni (curator of Islamic Art, Metropolitan Museum of Art) produced this fine catalog to accompany a major show of Ilkhanid (as the Mongol dynasty was called after conversion to Islam) art exhibited at the authors' museums in New York and Los Angeles in 2002-2003. Most of the manuscripts, metalwork, textiles, ceramics, and other finely decorated objects were created in Iran. Many objects are also included from the Yuan Dynasty in China, during which the Mongols ruled. Eight full-length essays are built around the objects of the exhibition and other works, all

depicted in color. The essays describe the history, culture, courtly life, artistic exchanges, religious art, arts of the book, and creation of a new visual language. Distributed by Yale U. Press. Annotation copyrighted by Book News, Inc., Portland, OR

Manual of Standardization in the Romance Languages Sep 04 2022 Language standardization

is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present, and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric, in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish, and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the 'minor' Romance languages as well as Creoles.

Handbook of African Medicinal Plants, Second Edition Oct 13 2020 With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
