BMW 5 & 6 Series E12 - E24 - E28 -E34 Restoration Tips and Techniques Sep
07 2020 A wealth of restoration tips and techniques covering E12, E24, E28, E34, 5
and 6 Series BMWs built between 1972 and 1995. Covers all models from 518 to
M6. Advice is given on acquiring a good BMW 5 & 6 Series model, plus tips on
restoring, engines, bodywork, trim, electrics, suspension & much more. If you have
a car like this then you can save thousands as you bring it back up to specification -
for your safety or as a restoration project this is the book you need. It is now 40
years since the first BMW 5 Series went down the production lines at Dingolfing.
Back in 1972, only the BMW executives with the greatest of foresight could have
predicted that in 2012, the 5 Series would still be in production and still be the class

leader - and it's amusing to note that the latest model - the F10 520i - is also a two litre four cylinder just as those first Fives were. BMW occupies a unique position in the hearts of car buyers and enthusiasts for no other marque of car has such a wide fan base. From what are probably the finest range of cars in the world to an enjoyable secondhand car, through to concours events, track days to drifting championships plus huge clubs and countless forums, no other manufacturer has such a huge and diverse following as BMW. The large numbers of the first three generations of the 5 Series that still survive attest to that, and this book is aimed at owners wanting to know more and pick up some useful maintenance, repair and restoration tips.

BMW Classic Coupes, 1965 - 1989 May 28 2022 A definitive guide to BMW's high-performance classic coupes, tracking their rising success from 1965 to 1989. After the doldrums of the post-war years, BMW had felt the need for a flagship grand touring coupe. The 507 of the late 1950s and the 3200 CS that replaced it in the early 1960s may not have made much money for the company, but they were a reminder of its aspirations. Then in 1964, a striking new coupe emerged from the building blocks of the latest saloon car range. The 2000 and 2000 CS, with their feisty 2-litre 4-cylinder engines, were the affordable foundation on which BMW was able to build its next generation of coupes - and what formidable machines those were! This definitive guide covers BMW's high-performance classic coupes, tracking their rising success from 1965 to 1989 and includes full specification guides, production histories and original photography. Topics covered include: BMW's hand-built coupes of the 1950s and the first volume-built models; the mainstream E9 range, with new engines and revised front-end styling; racing success for the 'Batmobile' CSLs, including six wins at the European Touring Car Championship from 1973 to 1979; engineering and development of the luxury E24 range; tuned and modified coupes, including the rare custom convertibles. Fully illustrated with 234 colour photographs.
