Not something that they dread because they have hundreds of repetition problems to do over and over again. Plain and Not So Plain Academy's approach to schooling is to concentrate on the basics and then fill in with real life learning. This approach to schooling is meant to take the stress and fear out of teaching your child at home. We take all the extra complexities out of schooling and get back to the basics of reading, writing, and arithmetic. This allows the student extra time to pursue other areas of interest.

**Homeschoolers** Aug 15 2021

Kids don't just learn one way . .

. . and that matters a lot for

homeschool parents. One of the

benefits of a home education is

a curriculum designed to fit

each student. But that means

knowing how your child learns.

Not every child receives

knowledge the same way. It's

up to the teacher to figure out

the best way to reach each one.

Based on the 8 Smarts

identified by Kathy

Koch—word, logic, picture,

music, body, nature, people,

and self—8 Great Smarts for

Homeschooling Families tailors

these ideas to the unique

setting of the home classroom.

Tina Hollenbeck, a leader in

the home education

community, applies the 8

Smarts to each division of a

complete curriculum: Math

Language Arts Science Social

Studies Religious Education

Fine Arts Electives Yet when it

comes down to it, the real

benefit of homeschooling is

personal relationships.

Hollenbeck concludes by

showing that when parents know their kids' multiple intelligences—and when kids understand their family members in turn—it leads to a healthy homeschool dynamic. So don't try to teach in the dark. Know your kid's smarts, then watch them start engaging with their world in fresh ways.

### *100 Words Every Middle*

*Schooler Should Know* Jun 20

2019 More is expected of middle schoolers—more reading, more writing, more independent learning.

Achieving success in this more challenging world requires knowing many more words.

### *100 Words Every Middle*

*Schooler Should Know* helps students in grades 6 to 8 (ages 11-14) to express themselves with distinction and get the most out of school. The 100 words are varied and interesting, ranging from verbs like muster and replenish to nouns like havoc and restitution to adjectives like apprehensive and imperious. Knowing these words enables

students to express themselves with greater clarity and subtlety. Each word has a definition and a pronunciation and appears with at least one quotation—a moving or dramatic passage—taken from a book that middle schoolers are assigned in the classroom or enjoy reading on their own. Both classic and contemporary works of fiction and nonfiction are represented. Among the authors are young adult favorites and award-winners such as Kate Di Camillo, Russell Freedman, Neil Gaiman, E.L. Konigsberg, Lois Lowry, Walter Dean Myers, Katherine Paterson, J. K. Rowling, and Gary Soto. Readers can see for themselves that the words are used by the very best writers in the very best books. It stands to reason that they will see them again and again in higher grades and throughout their lives. 100 Words Every Middle Schooler Should Know helps students to gain useful knowledge and prepares them to step into a broader world.

### **Primary Language Lessons**

Dec 07 2020 The object of this little volume is to lead children of the second and third grades into the habit of speaking and writing the English language correctly. To accomplish this, the author has prepared a drill book which emphasizes the reproduction of many of the short stories current in our literature, and also introduces practice exercises to familiarize the pupils with

correct forms. Beginning with simple, graduated exercises, they are continued fill a general principle is inductively reached. It is assumed that the child will learn to speak and write correctly, by imitation, if the proper forms are presented to him. Accordingly much attention is given in this book to expressions frequently misused, as for example, troublesome verb forms. The lessons are designed, as well, to awaken and sustain children's interest in natural objects, and to put them in sympathetic relations with living things. The author has written from the standpoint of the child, and in language that the child can readily comprehend.

Tom, and his cousin, Eb, are both of fighting age. As Jethro's family is pulled into the conflict between the North and the South, loyalties are divided, dreams are threatened, and their bonds are put to the test in this heart-wrenching,

coming of age story. "Drawing from family records and from stories told by her grandfather, the author has, in an uncommonly fine narrative, created living characters and vividly reconstructed a crucial period of history."—Booklist
