Comparative Endocrinology Dec 19 2021 *Comparative Endocrinology: A Treatise in Two Volumes, Volume II, Part One: Invertebrate Hormones, Part Two: Tissue Hormones* focuses on animal physiology, morphology, and chemistry and systematic and comprehensive explanation of endocrine principles from the comparative point of view. The selection first offers information on hormones controlling reproduction and molting in invertebrates and the structure of neurosecretory systems in invertebrates. Discussions focus on protozoa, crustacea, insects, and neurosecretory systems of the head, thorax, and abdomen. The text then ponders on bradykinin, angiotensin, and substance P and heparin. The publication examines physiologically active lipid anions and 5-hydroxytryptamine. Topics include biologically active unsaturated fatty acids without alcoholic hydroxyl groups, prostaglandin, endometrial acids in menstrual fluid, turnover rate, and biosynthesis and fate. The manuscript also tackles cholinergic neurohormones and adrenergic neurohormones. The selection is a dependable source of data for readers interested in invertebrate and tissue hormones.

Producing the Pacific Jul 14 2021 *Producing the Pacific* offers the reader an interdisciplinary reading of the maps, narratives and rituals related to the three Spanish voyages to the South Pacific that took place between 1567 and 1606. These journeys were led by Álvaro de Mendaña, Pedro Fernández de Quirós and Isabel Barreto, the first woman ever to become admiral of and command a fleet. Mercedes Maroto Camino presents a cultural analysis of these journeys and takes issue with some established notions about the value of the past and the way it is always rewritten from the perspective of the present. She highlights the social, political and cultural environment in which maps and narratives circulate, suggesting that their significance is always subject to negotiation and transformation. The tapestry created by the interpretation of maps, narratives and rituals affords a view not only of the minds of the first men and women who traversed the Pacific but also of how they saw the ocean, its islands and their peoples. *Producing the Pacific* should, therefore, be of relevance to those interested in history, voyages, colonialism, cartography, anthropology and cultural studies. The study of these cultural products contributes to an interpretive history of colonialism at the same time that it challenges the beliefs and assumptions that underscore our understanding of that history.

Microbial Biofilms in Bioremediation and Wastewater Treatment Aug 23 2019 *Biofilms* represent the natural living style of microbial communities and play a pivotal role in biogeochemical cycles and natural attenuation. Biofilms can be engineered for biodegradation and biotransformation of organic and inorganic contaminants, for both in situ bioremediation and ex situ treatment in bioreactors. This book focuses on microbial biofilms and their potential technological applications for sustainable development. It covers recent advances in biofilm technologies for contaminant remediation coupled to recovery of resources and serves as a complete reference on the science and technology behind biofilm mediated bioremediation and wastewater treatment.

Spinoza Jan 20 2022 Baruch Spinoza (1632–1677) was one of the most important philosophers of all time; he was also arguably the most radical and controversial. This was the first complete biography of Spinoza in any language and is based on detailed archival research. More than simply recounting the story of Spinoza's life, the book takes the reader right into the heart of Jewish Amsterdam in the seventeenth century and, with Spinoza's exile from Judaism, right into the midst of the tumultuous political, social, intellectual and religious world of the young Dutch Republic. Though the book will be an invaluable resource for philosophers, historians, and scholars of Jewish thought, it has been written for any member of the general reading public with a serious interest in philosophy, Jewish history, seventeenth-century European history, and the culture of the Dutch Golden Age. *Spinoza: A Life* has recently been awarded the Koret Jewish Book Award.

Documentos Para la Historia Del Libertador General San Martin Dec 27 2019

Advances in Carbohydrate Chemistry and Biochemistry Jun 20 2019 Since its inception in 1945, this serial has provided critical articles written by research specialists that integrate industrial, analytical, and technological aspects of biochemistry, organic chemistry, and instrumentation methodology in the study of carbohydrates. Features contributions from leading authorities and industry experts Informs and updates on all the latest developments in the field
Misplaced Ideas Jun 13 2021 *Misplaced Ideas* spans the 19th and 20th centuries, and examines the life and work of Brazil's most influential novelist, Machado de Assis, as well as Brazilian film, poetry, theatre and music. Among the themes that run through the text are the dangers of nationalism, the West's attraction for exotic backwardness and the notion of Third World literature.

James Turrell Mar 30 2020 "A much needed antidote to 'Art Writing' as it is encountered in the art mags . . . his writing is fluent and the style attractive and engaging."--Stephen Foster, University of Iowa

Masks of Difference Jan 28 2020 Writings about and depictions of 'savage' peoples by conquering races as a form of textual practice.

Art and Architecture in Italy, 1600–1750 Jul 02 2020 This classic survey of Italian Baroque art and architecture focuses on the arts in every center between Venice and Sicily in the early, high, and late Baroque periods. The heart of the study, however, lies in the architecture and sculpture of the exhilarating years of Roman High Baroque, when Bernini, Borromini, and Cortona were all at work under a series of enlightened popes. Wittkower's text is now accompanied by a critical introduction and substantial new bibliography. This edition will also include color illustrations for the first time. This is the first book in the three volume survey.

Handbook of Measurement Issues in Family Research Oct 29 2022 Dramatic societal changes have reshaped America's families. Young adults have delayed marriage, and cohabitation before marriage has become commonplace. One in three women giving birth is unmarried, and the proportion of children under 18 living in single-parent families rose from 23 to 31 percent between 1980 and 2000, reflecting increased rates of both nonmarital childbearing and divorce. This authoritative volume offers a blueprint for addressing some of the most important measurement issues in family research, and it points out potential pitfalls for researchers and students who may not be familiar with data quality issues. The *Handbook of Measurement Issues in Family Research* will appeal to scholars in the departments of psychology, sociology, and population studies, as well as researchers working in governmental agencies.

Mexican Public Intellectuals Dec 07 2020 In Mexico, the participation of intellectuals in public life has always been extraordinary, and for many the price can be high. Highlighting prominent figures that have made incursions into issues such as elections, human rights, foreign policy, and the drug war, this volume paints a picture of the ever-changing context of Mexican intellectualism.

The Rarified Air of the Modern Aug 03 2020 From the moment news reached Peru in 1910 that Jorge Chávez Dartnell, a pilot of Peruvian parentage, had become the first man to fly across the Alps, aviation fired the imagination of the masses in his home country. His and other Peruvian pilots' achievements generated great optimism that this technology could lift Peru out of its self-perceived backwardness and transform it into a modern nation. Though poor infrastructure, economic woes, a dearth of technical expertise, and frequent pilot deaths slowed Peru's domestic aviation project, diverse groups saw in airplanes their own visions for Peruvian renewal. In this book, Willie Hiatt shows how politicians, businessmen, and military officials promoted the project as critical to the nation. At the same time, indigenous communities and provincial residents willingly gave up land for airfields, raised money to purchase aircraft for the military, named airplanes after sponsoring civic groups, towns, and regions, and breached police cordons at flying exhibitions to get close-up looks at planes and pilots. By 1928, three commercial lines were transporting passengers and goods from far-flung regions of the Amazon, highlands, and coast to Lima and beyond. Tracing the development of Peruvian aviation from heroic individual feats to essential infrastructure, *The Rarified Air of the Modern* shows how Peruvians mobilized airplanes to reflect their technological progress, their modern identity, and their nation's intertwining with the history of the West.

Bringing Aztlan to Mexican Chicago Oct 17 2021 *Bringing Aztlan to Mexican Chicago* is the autobiography of José Gamaliel González, an impassioned artist willing to risk all for the empowerment of his marginalized and oppressed community. Through recollections emerging in a series of interviews conducted over a period of six years by his friend Marc Zimmerman, González looks back on his life and his role in developing Mexican, Chicano, and Latino art as a fundamental dimension of the city he came to call home. Born near Monterey, Mexico, and raised in a steel mill town in northwest Indiana, González studied art at the School of the Art Institute of Chicago and the University of Notre Dame. Settling in Chicago, he founded two major art groups: *El Movimiento Artístico Chicano (MARCH)* in the 1970s and *Mi Raza Arts Consortium (MIRA)* in the 1980s. With numerous illustrations, this book portrays González's all-but-forgotten community advocacy, his commitments and conflicts, and his long struggle to bring quality arts programming to the city. By turns dramatic and humorous, his narrative also covers his bouts of illness, his relationships with other artists and arts promoters, and his place within city and barrio politics.

Politics in the Altiplano Jun 25 2022 The department of Puno in southern Peru is an area oriented to livestock and agricultural production, peopled by an Indian peasant mass and a dominant minority of culturally Westernized mestizos. A small but growing hybrid group, the cholos, bridged the cultural gap and collaborated with dissident merchant elements within the mestizo group to challenge the economic, social, and political order of the altiplano (high plateau) system. *Politics in the Altiplano* analyzes the sources of conflict and political change in the plural society as it underwent socioeconomic development through a period of recurring natural disasters. In the period under study (1956–1966), a prolonged drought precipitated a series of crises. The mismanagement of American aid, sent to the suffering peasants, became a national cause célèbre. As migration to Peru's coastal cities reached large-scale

proportions, several peasant movements were launched in the department. To rechannel local discontent, an autonomous development corporation was created for Puno by the Peruvian Congress. This, plus the institution of local elections in 1963, provided ample opportunity for the coalition of dissident mestizos, cholos, and peasants to pursue their "revolutionary" goals. A rivalry between two major towns, Puno (the department's capital) and Juliaca (the commercial center), furthered the conflict between conservative mestizos and the peasant-cholo movement. Juliaca's attempt to secede from the department in November 1965 set off a series of violent strikes and counterstrikes in both cities. Intervention from the national level by government troops put an end to the crisis for the time being. But the continued need for land reform in the department, combined with institutionalized means for political participation, kept the peasants mobilized and the atmosphere of conflict alive.
