Sharenthood Oct 05 2020 From baby pictures in the cloud to a high school's digital surveillance system: how adults unwittingly compromise children's privacy online. Our children's first digital footprints are made before they can walk—even before they are born—as parents use fertility apps to aid conception, post ultrasound images, and share their baby's hospital mug shot. Then, in rapid succession come terabytes of baby pictures stored in the cloud, digital baby monitors with built-in artificial intelligence, and real-time updates from daycare. When school starts, there are cafeteria cards that catalog food purchases, bus passes that track when kids are on and off the bus, electronic health records in the nurse's office, and a school surveillance system that has eyes everywhere. Unwittingly, parents, teachers, and other trusted adults are compiling digital dossiers for children that could be available to everyone—friends, employers, law enforcement—forever. In this incisive book, Leah Plunkett examines the implications of “sharenthood”—adults' excessive digital sharing of children's data. She outlines the mistakes adults make with kids' private information, the risks that result, and the legal system that enables “sharenting.” Plunkett describes various modes of sharenting—including “commercial sharenting,” efforts by parents to use their families' private experiences to make money—and unpacks the faulty assumptions made by our legal system about children, parents, and privacy. She proposes a “thought compass” to guide adults in their decision making about children's digital data: play, forget, connect, and respect. Enshrining every false step and bad choice, Plunkett argues, can rob children of their chance to explore and learn lessons. The Internet needs to forget. We need to remember.

Gender, Technology and Violence Feb 27 2020 Technological developments move at lightening pace and can bring with them new possibilities for social harm. This book brings together original empirical and theoretical work examining how digital technologies both create and sustain various forms of gendered violence and provide platforms for resistance and criminal justice intervention. This edited collection is organised around two key themes of facilitation and resistance, with an emphasis through the whole collection on the development of a gendered interrogation of contemporary practices of technologically-enabled or enhanced practices of violence. Addressing a broad range of criminological issues such as intimate partner violence, rape and sexual assault, online sexual harassment, gendered political violence, online culture, cyberbullying, and human trafficking, and including a critical examination of the broader issue of feminist ‘digilantism’ and resistance to online sexual harassment, this book examines the ways in which new and emerging technologies facilitate new platforms for gendered violence as well as offering both formal and informal opportunities to prevent and/or respond to gendered violence.

Surveillance Cinema Mar 10 2021 In Paris, a static video camera keeps watch on a bourgeois home. In Portland, a webcam documents the torture and murder of kidnap victims. And in clandestine intelligence offices around the world, satellite technologies relentlessly pursue the targets of global conspiracies. Such plots represent only a fraction of the surveillance narratives that have become commonplace in recent cinema. Catherine Zimmer examines how technology and ideology have come together in cinematic form to play a functional role in the politics of surveillance. Drawing on the growing field of surveillance studies and the politics of contemporary monitoring practices, she demonstrates that screen narrative has served to organize political, racial, affective, and even material formations around and through surveillance. She considers how popular culture forms are intertwined with the current political landscape in which the imagery of anxiety, suspicion, war, and torture has become part of daily life. From *Enemy of the State* and *The Bourne Series* to *Saw*, *Caché* and *Zero Dark Thirty*, *Surveillance Cinema* explores in detail the narrative tropes and stylistic practices that characterize contemporary films and television series about surveillance.

Sensational Pleasures in Cinema, Literature and Visual Culture Feb 21 2022 This international collection focuses on the phallic character of classic and contemporary literary and visual cultures and their invasive nature. It focuses on thrillers, horror cinema, sexual art and photography, erotic literature, female and male body politics, queer pleasures, gender/cross-gender/transgenderism, CCTV and phallic ethnicities.

Voyeur Nation Apr 23 2022 From 24-hour-a-day "girl cam" sites on the World Wide Web to trash-talk television shows like "Jerry Springer" and reality television programs like "Cops," we've become a world of voyeurs. We like to watch others as their intimate moments, private facts, secrets, and dirty laundry are revealed. *Voyeur Nation* traces the evolution and forces driving what the author calls the 'voyeurism value.' Calvert argues that although spectatorship and sensationalism are far from new phenomena, today a confluence of factors—legal, social, political, and technological—pushes voyeurism to the forefront of our image-based world. The First Amendment increasingly is called on to safeguard our right, via new technologies and recording devices, to peer into the innermost details of others' lives without fear of legal repercussion. But Calvert argues that the voyeurism value contradicts the value of discourse in democracy and First Amendment theory, since voyeurism by its very nature involves merely watching without interacting or participating. It privileges watching and viewing media images over participating and interacting in democracy.

The Voyeur's Motel Jan 20 2022 The controversial chronicle of a motel owner who secretly studied the sex lives of his guests by the renowned journalist and author of *Thy Neighbor's Wife*. On January 7, 1980, in the run-up to the publication of his landmark bestseller *Thy Neighbor's Wife*, Gay Talese received an anonymous letter from a man in Colorado. “Since learning of your long-awaited study of coast-to-coast sex in America,” the letter began, “I feel I have important information that I could contribute to its contents or to contents of a future book.” The man—Gerald Foos—then divulged an astonishing secret: he had bought a motel outside Denver for the express purpose of satisfying his voyeuristic desires. Underneath its peaked roof, he had built an “observation platform” through which he could peer down on his unwitting guests. Over the years, Foos sent Talese hundreds of pages of notes on his guests, work that Foos believed made him a pioneering researcher into American society and sexuality. Through his *Voyeur's motel*, he witnessed and recorded the harsh effects of the war in Vietnam, the upheaval in gender roles, the decline of segregation, and much more. In *The Voyeur's Motel*. “the reader observes Talese observing Foos observing his guests.” An extraordinary work of narrative journalism, it is at once an examination of one unsettling man and a portrait of the secret life of the American heartland over the latter half of the twentieth century (Daily Mail, UK). “This is a weird book about weird people doing weird things, and I wouldn't have put it down if the house were on fire.” —John Greenya, *Washington Times*

Watched! Jan 08 2021 How can art and visual theory contribute to the understanding of our current surveillance society? *Watched!* presents a selection of European artists who relate to current issues of discipline, control and security in our contemporary surveillance society. Surveillance is an expanding part of daily life. Since the start of the new millennium, we have seen major developments in security policies, data collection, software for private use, biometric science, social media, smartphones and technological innovations in other areas of ‘smart surveillance?’. Parallel to this change that has taken place in all parts of society, critical responses have increased across a wide range of disciplines, one of them being the arts. This publication offers a selection of artistic works and practices that addresses and reflects on issues of surveillance over the past fifteen years.

The Ashgate Research Companion to Queer Theory Jun 01 2020 This interdisciplinary volume of thirty original essays engages with four key concerns of queer theoretical work - identity, discourse, normativity and relationality. The terms 'queer' and 'theory' are put under interrogation by a combination of distinguished and emerging scholars from a wide range of international locations, in an effort to map the relations and disjunctions between them. These contributors are especially attendant to the many theoretical discourses intersecting with queer theory, including feminist theory, LGBT studies, postcolonial theory, psychoanalysis, disability studies, Marxism, poststructuralism, critical race studies and posthumanism, to name a few. This Companion provides an up to the minute snapshot of queer scholarship from the past two decades and identifies many current directions queer theorizing is taking, while also signposting several fruitful avenues for future research. This book is both an invaluable and authoritative resource for scholars and an indispensable teaching tool for use in the classroom.

Sophie Calle: The Hotel Aug 03 2020 A forensic conceptualist's inventory of the ordinary and extraordinary lives in a Venetian hotel In 1981 Sophie Calle took a job as a chambermaid for the Hotel C in Venice, Italy. Stashing her camera and tape recorder in her mop bucket, she not only cleans and tidies, but sorts through the evidence of the hotel guests' lives. Assigned 12 rooms on the fourth floor, she surveys the state of the guests' bedding, their books, newspapers and postcards, perfumes and cologne, traveling clothes and costumes for Carnival. She methodically photographs the contents of closets and suitcases, examining the detritus in the rubbish bin and the toiletries arranged on the washbasin. She discovers their birth dates and blood types, diary entries, letters from and photographs of lovers and family. She eavesdrops on arguments and love-making. She retrieves a pair of shoes from the wastebasket and takes two chocolates from a neglected box of sweets, while leaving behind stashes of money, pills and jewelry. Her thievery is the eye of the camera, observing the details that were not meant for her, or us, to see. The Hotel now manifests as a book for the first time in English (it was previously included in the book Double Game). Collaborating with the artist on a new design that features enhanced and larger photographs, and pays specific attention to the beauty of the book as an object, Siglio is releasing its third book authored by Calle, after The Address Book (2012) and Suite Vénitienne (2015). Sophie Calle (born 1953) is an internationally renowned artist whose controversial works often fuse conceptual art and Oulipo-like constraints, investigatory methods and the plundering of autobiography. The Whitechapel Gallery in London organized a retrospective in 2009, and her work has been shown at the Museum of Modern Art and the Whitney Museum of American Art, New York; the Carnegie Museum of Art, Pittsburgh; the Museum of Fine Arts, Boston; the Hayward Gallery and Serpentine, London; and the Museum of Contemporary Art, Chicago, among others. She lives and works in Paris.

The Passionate Camera Sep 23 2019 This book brings together over 50 artists, scholars and critics to address a broad range of issues in photography and sexuality. Among the issues addressed by the contributors is the use and abuse of photographs in political campaigns and direct activism.

The Cinematic Society Jul 14 2021 Ranging over a rich variety of material from film and film literature, and encompassing a critical interrogation of traditional realist ethnographic and cinematic texts, this book highlights the extent to which the cinema has contributed to the rise of voyeurism throughout society. The cinema not only turns its audience into voyeurs, eagerly following the lives of its screen characters, but casts its key players as onlookers, spying on other's lives. The nature of the cinematic voyeur is examined in depth, as are its implications for contemporary society. Norman K Denzin analyzes Hollywood's manipulations of gender, race and class, and, drawing on the work of Foucault, argues that the cinematic gaze must be understood as pa

Expanding the Gaze Sep 16 2021 Expanding the Gaze is a collection of important new empirical and theoretical works that demonstrate the significance of the gendered dynamics of surveillance.

Surveillance Society Sep 04 2020 In what ways does contemporary surveillance reinforce social divisions? How are police and consumer surveillance becoming more similar as they are automated? Are we forced to choose between classical and poststructuralist approaches in explaining surveillance? Why is surveillance both expanding globally and focusing more on the human body? Surveillance Society takes a post-privacy approach to surveillance with a fresh look at the relations between technology and society. Personal data is collected from us all the time, whether we know it or not, through identity numbers, camera images, or increasingly by other means such as fingerprint and retinal scans. This book examines the constant computer-based scrutiny of ordinary daily life for citizens and consumers as they participate in contemporary societies. It argues that to understand what is happening we have to go beyond Orwellian alarms and cries for more privacy to see how such surveillance also reinforces divisions by sorting people into social categories. The issues spill over narrow policy and legal boundaries to generate responses at several levels including local consumer groups, internet activism, and international social movements. In this fascinating study, sociologies of new technology and social theories of surveillance are illustrated with examples from North America, Europe, and Pacific Asia. David Lyon provides an invaluable text for undergraduate and postgraduate sociology courses both in social theory and in science, technology and society. It will also appeal much more widely, for example to those with an interest in politics, social control, human geography and public administration.

Duty Free Art Jun 13 2021 What is the function of art in the era of digital globalization? How can one think of art institutions in an age defined by planetary civil war, growing inequality, and proprietary digital technology? The boundaries of such institutions have grown fuzzy. They extend from a region where the audience is pumped for tweets to a future of "neurocurating," in which paintings surveil their audience via facial recognition and eye tracking to assess their popularity and to scan for suspicious activity. In Duty Free Art, filmmaker and writer Hito Steyerl wonders how we can appreciate, or even make art, in the present age. What can we do when arms manufacturers sponsor museums, and some of the world's most valuable artworks are used as currency in a global futures market detached from productive work? Can we distinguish between information, fake news, and the digital white noise that bombards our everyday lives? Exploring subjects as diverse as video games, WikiLeaks files, the proliferation of freeports, and political actions, she exposes the paradoxes within globalization, political economies, visual culture, and the status of art production.

Art and Pornography Mar 22 2022 Art and Pornography presents a series of essays which investigate the artistic status and aesthetic dimension of pornographic pictures, films, and literature, and explores the distinction, if there is any, between pornography and erotic art. Is there any overlap between art and pornography, or are the two mutually exclusive? If they are, why is that? If they are not, how might we characterize pornographic art or artistic pornography, and how might pornographic art be distinguished, if at all, from erotic art? Can there be aesthetic experience of pornography? What are some of the psychological, social, and political consequences of the creation and appreciation of erotic art or artistic pornography? Leading scholars from around the world address these questions, and more, and bring together different aesthetic perspectives and approaches to this widely consumed, increasingly visible, yet aesthetically underexplored cultural domain. The book, the first of its kind in philosophical aesthetics, will contribute to a more accurate and subtle understanding of the many representations that incorporate explicit sexual imagery and themes, in both high art and demotic culture, in Western and non-Western contexts. It is sure to stir debate, and healthy controversy.

Stalker, Hacker, Voyeur, Spy Aug 15 2021 Stalking is a predatory form of terrorizing people. Whether the tormenting erotomaniac pursuit by the unrequited lover of his or her prey, or the secretive invasive surveillance in government-backed counterterrorism, stalker and stallee are "coupled" in today's world of idealized yet dissociated intrapsychic, interpersonal, national and international relations. "Cyberspace," an unprecedented force for good, has become, along with more conventional venues, a fearsomely invasive stalking ground in private and public lives. Film studies and psychoanalysis converge in a close look at voyeurism in stalking and in the acts of filming and film viewing. Gender differences among stalkers round out this picture. Parallel processes in the minds, actions, and lives of stalker and stallee are inevitable in the blurred boundaries yet ineluctable connection between victim and victimizer, whether due to merger fantasies, projective identifications or a host of other psychological links. This book extends and develops these ideas to similar relations between terrorism from within and terrorism from without in both sexual and surveillance stalking.

Train Your Gaze Oct 17 2021 Focusing on the presence of the photographer's gaze as an integral part of constructing meaningful images, Roswell Angier combines theory and practice, to provide you with the technical advice and inspiration you need to develop your skills in portrait photography. Fully updated to take into account advances in creative work and photographic technology, this second edition also includes stunning new visuals and a discussion on the role of social media in the practice of portraiture. Each chapter includes a practical assignment, designed to help you explore various kinds of portrait photography and produce a range of different styles for your creative portfolio.

Dirty windows Nov 18 2021 For Merry Alpern, whose previous book Dirty Windows (Scalo, 1995) received international recognition, her new project was a natural outgrowth of her own daily life: spending time in stores, mostly women's clothing stores. She noticed other women in these stores in the middle of the day, all day, everyday. In particular, the group dressing rooms seemed to offer a combination of camaraderie and anonymity. Trying on clothes is an opportunity for self-examination, fantasy, and opinions from others -- sometimes solicited, sometimes not. Alpern says. "We stand there in our underwear, all trying to achieve some private version of a 'look'." With a video camera concealed in her purse, Alpern took endless hours of footage, without ever looking through a viewfinder, but putting the bag in a general direction of activity. Sometimes the bag was an extension of her body as she carried it with her, other times it was placed in a stationary position, separate from her body. Later Alpern started to examine the footage, to isolate moments and make stills. "Viewing surprises on the video tape was one of the most entertaining parts of the project." With this new photographic essay, Alpern dives into the realm of the objects that cover our social body. Her colorful images constitute a visual ethnography of American shopping, indeed one of the most important activities of everyday life in the West. Shopping is a sometimes shocking and often funny expedition into a world we all know only too well!

The Use and Abuse of Cinema Aug 23 2019 Eric Rentschler's new book, The Use and Abuse of Cinema, takes readers on a series of enthralling excursions through the fraught history of German cinema, from the Weimar and Nazi eras to the postwar and postwall epochs and into the new millennium. These journeys afford rich panoramas and nuanced close-ups from a nation's production of fantasies and spectacles, traversing the different ways in which the film medium has figured in Germany, both as a site of creative and critical enterprise and as a locus of destructive and regressive endeavor. Each of the chapters provides a stirring minidrama; the cast includes prominent critics such as Siegfried Kracauer and Rudolf Arnheim; postwar directors like Wolfgang

Staudte, Rainer Werner Fassbinder, Wim Wenders, and Alexander Kluge; representatives of the so-called Berlin School; and exponents of mountain epics, early sound musicals, rubble films, and recent heritage features. A film history that is both original and unconventional, Rentschler's colorful tapestry weaves together figures, motifs, and stories in exciting, unexpected, and even novelistic ways.

The Body Onscreen in the Digital Age Jun 20 2019 This collection examines the peculiarly modern phenomenon of voyeurism as it is experienced through the digital screen. Violence, voyeurism, and power populate film more than ever, and the centrality of the terrified body to many digital narratives suggests new forms of terror and angst, where bodies are subjected to an endless knowing look. The particular perils of the digital age can be seen on, by, and through screen bodies as they are made, remade, represented, and used. The essays in this book examine the machinations of voyeurism in the digital age and the realization of power through digital visual forms. They look at the uses of power over the female body, at the domination and repression of women through symbolic violence, at discourses of power as they are played out onscreen, and at how the digital realm might engage the active/passive dichotomy in new ways.

The Park May 24 2022 "Captured in three Tokyo parks in the early seventies, Kohei Yoshiyuki's *The Park* series features some intriguing photographic works of art. Shot at night using flash and infrared film, the photographs show hetero- and homosexuals gathering for furtive sexual encounters in the Shinjuku, Yoyogi, and Aoyama parks. These amorous scenes, however, are unpleasantly crowded; even before Yoshiyuki approached them with his camera, the couples had become objects of desire for voyeurs. The sixty-two photographs are presented here in duotone quality with an interview with the artist."--BOOK JACKET.

New Media and Visual Communication in Social Networks Apr 11 2021 Social media and new social facilities have made it necessary to develop new media design processes with different communication strategies in order to promote sustainable communication. Visual communication emphasizes messages that are transmitted through visual materials in order to effectively communicate emotions, thoughts, and concepts using symbols instead of words. Social networks present an ideal environment for utilizing this communication technique. *New Media and Visual Communication in Social Networks* is a pivotal scholarly publication that examines communication strategies in the context of social media and new digital media platforms and explores the effects of visual communication on social networks, visual identity, television, magazines, newspapers, and more. Highlighting a range of topics such as consumer behavior, visual identity, and digital pollution, this book is essential for researchers, practitioners, entrepreneurs, policymakers, and educators.

Exposed Aug 27 2022 "Catalogue published in conjunction with an exhibition held at the Tate Modern, London, May 28 to October 3, 2010; San Francisco Museum of Modern Art, October 30, 2010 to April 17, 2011; and Walker Art Center, Minneapolis, May 21 to September 11, 2011."

Arresting Cinema Feb 09 2021 When Ridley Scott envisioned *Blade Runner*'s set as "Hong Kong on a bad day," he nodded to the city's overcrowding as well as its widespread use of surveillance. But while Scott brought Hong Kong and surveillance into the global film repertoire, the city's own cinema has remained outside of the global surveillance discussion. In *Arresting Cinema*, Karen Fang delivers a unifying account of Hong Kong cinema that draws upon its renowned crime films and other unique genres to demonstrate Hong Kong's view of surveillance. She argues that Hong Kong's films display a tolerance of—and even opportunism towards—the soft cage of constant observation, unlike the fearful view prevalent in the West. However, many surveillance cinema studies focus solely on European and Hollywood films, discounting other artistic traditions and industrial circumstances. Hong Kong's films show a more crowded, increasingly economically stratified, and postnational world that nevertheless offers an aura of hopeful futurity. Only by exploring Hong Kong surveillance film can we begin to shape a truly global understanding of Hitchcock's "rear window ethics."

More Beautiful and More Terrible Dec 19 2021 For a nation that often optimistically claims to be post-racial, we are still mired in the practices of racial inequality that plays out in law, policy, and in our local communities. One of two explanations is often given for this persistent phenomenon: On the one hand, we might be hypocritical—saying one thing, and doing or believing another; on the other, it might have little to do with us individually but rather be inherent to the structure of American society. *More Beautiful and More Terrible* compels us to think beyond this insufficient dichotomy in order to see how racial inequality is perpetuated. Imani Perry asserts that the U.S. is in a new and distinct phase of racism that is "post-intentional": neither based on the intentional discrimination of the past, nor drawing upon biological concepts of race. Drawing upon the insights and tools of critical race theory, social policy, law, sociology and cultural studies, she demonstrates how post-intentional racism works and maintains that it cannot be addressed solely through the kinds of structural solutions of the Left or the values arguments of the Right. Rather, the author identifies a place in the middle—a space of "righteous hope"—and articulates a notion of ethics and human agency that will allow us to expand and amplify that hope. To paraphrase James Baldwin, when talking about race, it is both more terrible than most think, but also more beautiful than most can imagine, with limitless and open-ended possibility. Perry leads readers down the path of imagining the possible and points to the way forward.

Living the Information Society in Asia Jul 22 2019 Undeniably, Asian societies are in a period of transition, when people are learning to live with new information and communication technologies (ICTs) - whether in commerce, government or development work. *Living the Information Society in Asia* describes the interaction of people and new ICTs as the technologies seep into everyday life, such as how mobile phones forge relationships among families separated by migration, how camera phones threaten personal space, how cultural identities are strengthened in call centres, and how religion is incorporated into the new communication technologies people use. *Living the Information society in Asia* looks at the phenomenon as it unfolds and raises the implications for policy and future research.
