2022 Passion and science blend in this remarkable, readable book, as Freeman takes us along on his patient and exciting discovery of a 5000-year-old Temple in the plains of Alberta.--Roald Hoffmann, Nobel Prize winner.

Hustling Hitler Nov 18 2021 From

acclaimed journalist Walter Shapiro, the true life story of how his great-

uncle—a Jewish vaudeville impresario and exuberant con man—managed to cheat Hitler’s agents in the run-up to WWII. All his life, journalist Walter Shapiro assumed that the outlandish stories about his great-uncle Freeman were exaggerated family lore; some cockamamie Jewish revenge fantasies dreamt up to entertain the kids and venerate their larger-than-life

relative. Only when he started researching Freeman Bernstein’s life did he realize that his family was actually holding back—the man had enough stories, vocations, and IOUs to fill a dozen lifetimes. Freeman was many people: a vaudeville manager, boxing promoter, stock swindler, card shark and self-proclaimed “Jade King of China.” But his greatest title, perhaps the only

man who can claim such infamy, was *The Man Who Hustled Hitler*. A cross between *The Night They Raided Minsky's* and *Guys and Dolls*, Freeman Bernstein's life was itself an old New York sideshow extravaganza, one that Shapiro expertly stages in *Hustling Hitler*. From a ragtag childhood in Troy, New York, Shapiro follows his great-uncle's ever-crooked trajectory through show business, from his early schemes on the burlesque circuit to marrying his star performer, May Ward, and producing silent films—released only in Philadelphia. Of course, all of Freeman's cons and schemes were

simply a prelude to February 18, 1937, the day he was arrested by the LAPD outside of Mae West's apartment in Hollywood. The charge? Grand larceny—for cheating Adolf Hitler and the Nazi government. In the capstone of his slippery career, Freeman had promised to ship thirty-five tons of embargoed Canadian nickel to the Führer; when the cargo arrived, the Germans found only huge, useless quantities of scrap metal and tin. It was a blow to their economy and war preparations—and Hitler did not take the bait-and-switch lightly. Told with cinematic verve and hilarious

perspective, *Hustling Hitler* is Shapiro's incredible investigation into the man behind the myth. By reconstructing his great-uncle's remarkable career, Shapiro has transformed Freeman Bernstein from a barely there footnote in history to the larger-than-life, eternal hustler who forever changed it. [Canadian Foreign Policy](#) Mar 30 2020 Canadian Foreign Policy, as an academic discipline, is in crisis. Despite its value, CFP is often considered a "stale and pale" subfield of political science with an unfashionably state-centred focus. Canadian Foreign Policy asks why,

Practising scholars investigate how they were taught to think about Canada and how they teach the subject themselves. Their inquiry shines a light on issues such as the casualization of academic labour and the relationship between study and policymaking. This nuanced collection offers not only a much-needed assessment of the boundaries, goals, and values of the discipline but also a guide to its revitalization.

The Shock Doctrine
Jul 14 2021

'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and

connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of

those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent **Silence, Screen, and Spectacle** Mar 10 2021 In an age of information and new media the relationships between remembering and forgetting have changed. This volume addresses the tension between loud and often spectacular histories and those forgotten pasts we strain to hear. Employing social and cultural analysis, the essays within examine mnemonic technologies both new and old, and

cover subjects as diverse as U.S. internment camps for Japanese Americans in WWII, the Canadian Indian Residential School system, Israeli memorial videos, and the desaparecidos in Argentina. Through these cases, the contributors argue for a re-interpretation of Guy Debord's notion of the spectacle as a conceptual apparatus through which to examine the contemporary landscape of social memory, arguing that the concept of spectacle might be developed in an age seen as dissatisfied with the present, nervous about the future, and obsessed with the past. Perhaps now

"spectacle" can be thought of not as a tool of distraction employed solely by hegemonic powers, but instead as a device used to answer Walter Benjamin's plea to "explode the continuum of history" and bring our attention to now-time.

also to comprehend the way our country's culture has influenced our interpretation of his literary career and heritage. What function does Shakespeare serve in Canada today? How has he been reconfigured in different ways for particular Canadian contexts? The authors of this book attempt to answer these questions while imagining what the future might hold for William Shakespeare in Canada. Covering the Stratford Festival, the cult CBC television program *Slings and Arrows*, major Canadian critics such as Northrop Frye and Marshall McLuhan, the influential acting

teacher Neil Freiman, the rise of Québécois and First Nation approaches to Shakespeare, and Shakespeare's place in secondary schools today, this collection reflects the diversity and energy of Shakespeare's afterlife in Canada. Collectively, the authors suggest that Shakespeare continues to offer Canadians "remembrance of ourselves." This is a refreshingly original and impressive contribution to Shakespeare studies—a considerable achievement in any work on the history of one of the central figures in the western literary canon.

heard the news of their lumberman father's death, the cold wind shaking their tiny Ottawa cabin grew even colder. If someone didn't soon start bringing in money, they would lose their modest home and find themselves on the town's raw, muddy streets. They realize that only they can support their family, and head off to a lumber camp in the Ottawa Valley for the winters' season. There they learn the difficult and dangerous work of felling big trees, squaring timber, and readying logs for the drive downriver. They also learn of the tensions that simmer between the owners of the

camp and the working shantymen, tensions that threaten to explode. Spring approaches, the river swells with runoff, and the logs start their violent trip along the current. At the same time, the bosses' demands and those of the men seem bound for a collision. Set against the rough and exciting background of a 19th century lumber camp, Shantymen of Cache Lake is a classic account of two indomitable young people and their gutsy adaptation to hard times. The book is illustrated with photos chronicling Canada's huge and exciting timber trade. This is the

first book in the Bains series of historical novels, well-researched, action-filled narratives following the travels of one family across Canada--from Newfoundland to Alberta-- in search of a better life during the hard times of the 1870s.

Tides Jul 02 2020

After a sudden, devastating loss, Mara flees her family and ends up adrift in a wealthy coastal town. Mired in her grief, Mara's first few days are spent alone, surviving on what scraps of food she can find, and swimming at night in the ocean. When her money runs out and the tourist season comes to a close, Mara finds a job in a local wine

store and meets its owner, Simon, a man whose loneliness she immediately recognises as a mirror to her own. As Mara dances around her growing attraction to Simon, she is forced to reckon with both her present desires and her past errors, and with the compulsion she feels to both make and unmake herself. Tides is a spare, visceral portrait of a woman nearly pulled under by loss and desire. It is an unforgettable introduction to a debut writer of uncommon literary power.

Life Among the Qallunaat Oct 17 2021 Life Among the Qallunaat is the story of Mini Aodla

Freeman's experiences growing up in the Inuit communities of James Bay and her journey in the 1950s from her home to the strange land and stranger customs of the Qallunaat, those living south of the Arctic. Her extraordinary story, sometimes humorous and sometimes heartbreaking, illustrates an Inuit woman's movement between worlds and ways of understanding. It also provides a clear-eyed record of the changes that swept through Inuit communities in the 1940s and 1950s.

Mini Aodla Freeman was born in 1936 on Cape Hope Island in James Bay. At the

age of sixteen, she began nurse's training at Ste. Therese School in Fort George, Quebec, and in 1957 she moved to Ottawa to work as a translator for the then Department of Northern Affairs and Natural Resources. Her memoir, Life Among the Qallunaat, was published in 1978 and has been translated into French, German, and Greenlandic. Life Among the Qallunaat is the third book in the First Voices, First Texts series, which publishes lost or under appreciated texts by Indigenous writers. This reissue of Mini Aodla Freeman's path-breaking work includes new

material, an interview with the author, and an afterword by Keavy Martin and Julie Rak, with Norma Dunning.

Biological Science, First Canadian Edition

Sep 28 2022 Learn biology by learning to think like a scientist.

Biological Science, Canadian Edition, brings together Scott Freeman's pioneering active learning approach with carefully selected coverage of Canadian issues and research. Each page of the book is designed in the spirit of active learning, asking students to apply critical thinking skills as they learn key concepts. Accounts of researchers designing and

analyzing real experiments, carefully punctuated by thoughtful questions and exercises, train introductory students in the process of DOING biology. Exciting biological research is carried out in Canada. Canadian researchers are cutting-edge scientists, work with or lead international teams, and design interesting, insightful experiments. The Canadian edition of Scott Freeman's Biological Science showcases Canadian issues and research, for example: the organic molecules on the Tagish Lake meteorite in BC, and the Genome

Canada organization.

feminine identities, while others refused to conform altogether, openly and defiantly challenging the gender expectations of their day. The book consists of a series of case studies of the women in question as they grappled with the concerns close to their hearts: higher education for women, healthy dress reforms, the vote, equal opportunities at work, abortion, lesbianism, and Aboriginal women's rights. Their media reflected their respective eras: intellectual magazines, daily and weekly newspapers, radio, feminist public relations, alternative women's

periodicals, and documentary film made for television. Barbara Freeman takes an interdisciplinary approach, combining biography, history, and communication studies to demonstrate how their use of different media both enabled and limited these women in their ability to be daring advocates for gender equality. She shows how a number of these women were linked through the generations by their memberships in activist women's organizations. *Environmental Science : a Canadian Perspective* Feb 21 2022 **The Scientist as**

Rebel Apr 23 2022 From Galileo to today's amateur astronomers, scientists have been rebels, writes Freeman Dyson. Like artists and poets, they are free spirits who resist the restrictions their cultures impose on them. In their pursuit of nature's truths, they are guided as much by imagination as by reason, and their greatest theories have the uniqueness and beauty of great works of art. Dyson argues that the best way to understand science is by understanding those who practice it. He tells stories of scientists at work, ranging from Isaac Newton's absorption in

physics, alchemy, theology, and politics, to Ernest Rutherford's discovery of the structure of the atom, to Albert Einstein's stubborn hostility to the idea of black holes. His descriptions of brilliant physicists like Edward Teller and Richard Feynman are enlivened by his own reminiscences of them. He looks with a skeptical eye at fashionable scientific fads and fantasies, and speculates on the future of climate prediction, genetic engineering, the colonization of space, and the possibility that paranormal phenomena may exist yet not be scientifically verifiable. Dyson

also looks beyond particular scientific questions to reflect on broader philosophical issues, such as the limits of reductionism, the morality of strategic bombing and nuclear weapons, the preservation of the environment, and the relationship between science and religion. These essays, by a distinguished physicist who is also a prolific writer, offer informed insights into the history of science and fresh perspectives on contentious current debates about science, ethics, and faith.

The Deniers Apr 30 2020 Eminent environmentalist Solomon set out to find whether any real scientists diverged from global warming orthodoxy. This fully revised new edition features two new chapters that present fresh exposés on climate profiteers and global warming affirmers.

Study Guide for Biological Science, Third Canadian Edition Oct 29 2022
Canadian Journal of Plant Science
Sep 16 2021

Communicating Science Nov 06 2020 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around

the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? *Communicating Science* describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that

their science communication story has been told. Mammals from the Age of Dinosaurs Jun 01 2020 The fossil record on Mesozoic mammals has expanded by orders of magnitude over the past quarter century. New specimens, some of them breathtakingly complete, have been found in nearly all parts of the globe at a rapid pace. Coupled with the application of new scientific approaches and techniques, these exciting discoveries have led to profound changes in our interpretation of early mammal history. Mesozoic mammals have come into their own

as a rich source of information for evolutionary biology. Their record of episodic, successive radiations speaks to the pace and mode of evolution. Early mammals were small, but they provide key information on the morphological transformations that led to modern mammals, including our own lineage of Placentalia. Significant and fast-evolving elements of the terrestrial biota for much of the Mesozoic, early mammals have played an increasingly important role in studies of paleoecology, faunal turnover, and historical biogeography. The record of early

mammals occupies center stage for testing molecular evolutionary hypotheses on the timing and sequence of mammalian radiations. Organized according to phylogeny, this book covers all aspects of the anatomy, paleobiology, and systematics of all early mammalian groups, in addition to the extant mammalian lineages extending back into the Mesozoic. *Getting on Track* Nov 25 2019 New Democratic Party governments in Canada have always been strongly committed to redistributing wealth and stabilizing the

economy, but present conditions require that they broaden their perspective. They must also find ways of generating wealth if they expect to finance new social programs or protect existing ones. As global pressures intensify, Bob Rae's Ontario NDP government needs to rethink many of its traditional approaches to public policy and discover new policy instruments to tackle the five principal agendas of social democracy: social welfare policy, labour market adjustment, employment equity, industrial strategy, and environmental recovery.

Continental

Intraplate Earthquakes Dec 27 2019 "This volume brings together a sampling of research addressing issues of continental intraplate earthquakes, including a core of papers from special sessions held at the spring 2004 Joint Assembly of the American and Canadian Geophysical Unions in Montreal. Papers address the broad related topics of the science, hazard, and policy issues of large continental intraplate earthquakes in a worldwide context. One group of papers addresses aspects of the primary scientific issue--where are these earthquakes and what causes

them? Answering this question is crucial to determining whether they will continue there or migrate elsewhere. A second group of papers addresses the challenge of assessing the hazard posed by intraplate earthquakes. Although it may be a very long time before the scientific issues are resolved, the progress being made is helping attempts to estimate the probability, size, and shaking of future earthquakes, and the uncertainty of the results. A third group of papers explores the question of how society should mitigate the possible effects of future large

continental intraplate earthquakes. Communities around the world face the challenge of deciding how to address this rare, but real, hazard, given the wide range of other societal needs. Continental intraplate earthquakes will remain a challenge to seismologists, earthquake engineers, policy makers, and the public for years to come, but significant progress toward understanding and addressing this challenge is now being made."--
Publisher's website.
Who's Who in Canadian Business 2001 Jan 08 2021 Who's Who in Canadian

Business, now in its 21st year, is a comprehensive and independent guide to Canada's business elite. Listing over 5,000 corporate and entrepreneurial leaders, each with a detailed biography and contact information, this directory is an excellent resource for anyone needing information on Canada's business world. Biographies include such information as current employment, address, education, career history, publications, favourite charities, and honours. Those listed are included because of the positions they hold in Canadian business and industry, or

because of the contributions they have made to business in Canada. The directory is updated annually; new and updated biographies are marked for easy reference. All biographies are indexed by company name. Included in this edition is the PROFIT 100 / Next 100 listing of Canada's fastest-growing companies, as well as a list of professional associations, each with full address, contact names, and a brief description.

technology and education, within contemporary settings. Social, economic and ecological critique and reform are examined by numerous contributing authors, from a range of international contexts. These chapters examine pressing pedagogical questions within socio-scientific contexts, including petroleum economies, food justice, health, environmentalism, climate change, social media and biotechnologies. Readers will discover far reaching inquiries into activism as an

open question for science and technology education, citizenship and democracy. The authors call on the work of prominent scholars throughout the ages, including Bourdieu, Foucault, Giroux, Jasanoff, Kierkegaard, Marx, Nietzsche, Rancière and Žižek. The application of critical theoretical scholarship to mainstream practices in science and technology education distinguishes this book, and this deep, theoretical treatment is complemented by many grounded, more pragmatic exemplars of activist pedagogies. Practical examples

are set within the public sphere, within selected new social movements, and also within more formal institutional settings, including elementary and secondary schools, and higher education. These assembled discussions provide a basis for a more radically reflexive reworking of science and technology education. Educational policy makers, science education scholars, and science and technology educators, amongst others, will find this work thought-provoking, instructive and informative.
