A skyscraper can't be built without a proper foundation, just like a crunchy taco can't be built without a shell. The same goes with your art, whether it's street photography, fine art, cinematography, painting, or even sculpting. The techniques found in this book, though presented with street photos, will easily translate across every visual

art and allow you to create remarkable, mouth-watering masterpieces.

Countless artists out there want to push their art further, but they've run face first into a nasty plateau. Art is tough enough as it is, but without proper knowledge of composition and design it's easy to end up in a dark alley waiting to be maliciously fondled by mediocre art.

Don't join the masses, join the elite! Learn serious composition and design techniques in a fun way that will launch you to the master level.

You might even get a chuckle from the film photos capturing whacky tourists as they wonder aimlessly

volume brings the studies of institutions, labour, and material cultures to bear on the history of science and technology by tracing the workings of the Imperial Household Department (Neiwufu) in the Qing court and empire. An enormous apparatus that employed 22,000 men and women at its heyday, the Department operated a "machine" with myriad moving parts. The first part of the book portrays the people who kept it running, from technical experts to menial servants, and scrutinises the paper trails they left behind. Part

two uncovers the working principles of the machine by following the production chains of some of its most splendid products: gilded statues, jade, porcelain, and textiles. Part three tackles the most complex task of all, managing living organisms in nature, including lotus plants grown in imperial ponds in Beijing, fresh medicines sourced from disparate regions, and tribute elephants from Southeast Asia.

is normally thought of as an error, a faulty overlaying, but, as Legacy Russell shows, liberation can be found within the fissures between gender, technology, and the body. The glitch offers an opportunity for us to perform and transform ourselves in an infinite variety of identities. In *Glitch Feminism*, Russell makes a series of radical demands through memoir, art, and critical theory, as well as the work of contemporary artists—including Juliana Huxtable, Sondra Perry, boychild, Victoria Sin, and Kia LaBeija—who have travelled through the glitch in their work. the Leica M6-TTL. On-Camera Flash Jul 10 2020 Photographers are always looking for perfect light. Unfortunately, the quality of available light, and the situations in which photos are created, are rarely perfect. This is especially true when photographing weddings or portraits on location. So while finding beautiful existing light is every photographer's ideal, it isn't always possible. This is the point at which photographers tend to reach for a portable, on-camera flash. Indeed, these intense light sources can prove invaluable, but only if you know how to use them

effectively. In the hands of an inexperienced photographer, on-camera flash will produce images that look flat and lifeless—images with harsh shadows, washed-out skin tones, cavernous black backgrounds, and other unappealing visual characteristics. In this book, acclaimed wedding and portrait photographer Neil van Niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on-camera flash. You'll learn to use simple accessories to manipulate the quality of light from

your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing light. When the available light is too low and too uneven to be combined with flash, he shows you how to override it completely with flash and, with some thought and careful application of specialized techniques, still get results that look great. On-camera flash is one of the most challenging light sources to master, but with the techniques in this book you'll learn to use it with confidence. For wedding and environmental portrait photographers who must work in ever-changing lighting

scenarios, this can mean better images and better sales.

**Romancing the Market** Aug 03 2022 Romancing the Market is a radical rethinking of marketing understanding. Marketing and consumer research are dominated by the neo-classical ideals of the Enlightenment such as rigour, dispassion and the search for scientific 'truth'. In a series of provocative essays, the contributors challenge these assumptions with reference to the individuality, innovation and imagination of the Romantic movement. The book contains essays by an international

selection of the most creative contemporary marketing scholars, including Elizabeth Hirschman, Russell Belk, Craig Thompson and Robin Wensley. Illuminating, controversial and cutting edge, this is an essential work for all those interested in new directions in marketing and consumer research.

**Analog**

**Photography** Jul 02 2022

Photography on analog film has simply put received a recent renaissance. In our digital age, I guess a romantic veil surrounds the analog approach to photography. Even when shooting digital cameras, we do postprocessing to simulate the look of analog film. We talk about the specific and beloved look of certain films, and how their sensitivity and grain add a charm to the image. Delving deeper, a reason for the

analog renaissance might be our growing desire to slow down; to immerse ourselves and sharpen our creative senses by restraining the means with which we photograph. Where the digital camera is soon so perfect that we as photographers can sometimes feel redundant, the analog camera requires our undivided presence. These cameras are subject to the same limitations as they were in the dawn of photography. You must visualize what you want to create beforehand, and you cannot rely on an lcd to feed you the result. Thus, in analog photography we are forced to slow down, plan, create the right

circumstances, and capture the wanted picture at the decisive moment.
