[The Fifth Beginning](#) Oct 26 2022 “I have seen yesterday. I know tomorrow.” This inscription in Tutankhamun’s tomb summarizes **The Fifth Beginning**. Here, archaeologist Robert L. Kelly explains how the study of our cultural past can predict the future of humanity. In an eminently readable style, Kelly identifies four key pivot points in the six-million-year history of human development: the emergence of technology, culture, agriculture, and the state. In each example, the author examines the long-term processes that resulted in a definitive, no-turning-back change for the organization of society. Kelly then looks ahead, giving us evidence for what he calls a fifth beginning, one that started about AD 1500. Some might call it “globalization,” but the author places it in its larger context: a five-thousand-year arms race, capitalism’s global reach, and the cultural effects of a worldwide communication network. Kelly predicts that the emergent phenomena of this fifth beginning will include the end of war as a viable way to resolve disputes, the end of capitalism as we know it, the widespread shift toward world citizenship, and the rise of forms of cooperation that will end the near-sacred status of nation-states. It’s the end of life as we have known it. However, the author is cautiously optimistic: he dwells not on the coming chaos, but on humanity’s great potential.

Why the Tax Year Begins On Sixth April May 21 2022 This book explains why the UK tax year begins on 6 April and traces the history of the old tax year which began on 25 March. It also covers other aspects of calendar history. The move from the Julian to the Gregorian calendar in 1752 resulted in the omission of 11 days from September 1752. The omitted days were later added to the tax year and that apparently meant a new tax year beginning on 5 April - not 6 April. There are various explanations for the addition of a further day so the year began on 6 April, including the suggestion that a day was added in 1800. In fact the old tax year ran "from" 25 March and an ancient legal rule said "from" meant the year began on the following day, 26 March. Hence adding 11 days to 26 March produced a new tax year beginning on 6 April. It is often said that the Treasury extended the tax year by 11 days to avoid losing money. This is untrue. The taxpayer paid a full year's tax for a short year. This work is also available as a free eBook.
