**A Practical Guide to Supporting People with Epilepsy** Aug 01 2019 This book is a practical guide, with rationale to supporting people with epilepsy. It encompasses epilepsy guidance such as NICE (2012, revised 2019), The Equality Act (2010), the children and families act (2014), current evidence based-practice, and regulatory organisation standards. It is predominantly aimed at nurses and student nurses, especially, those studying learning disability nursing but also residential, respite and supported living services, schools and family carers, to enable them to offer appropriate and evidence-based support to people with epilepsy of all ages. It is estimated there are approximately 1200 epilepsy related deaths each year in the UK. Many of these are considered to be preventable. High-profile cases have led to an increase in anxiety in people providing services, and greater scrutiny of those services by regulatory bodies. Over the years, the authors have been asked the same questions and witnessed the same misunderstandings and mistakes, by people supporting individuals with epilepsy. So they looked at the common themes and the resources available. It became clear that the information to address these gaps is available, but not easily accessible. There is lots of information in the public domain, however much of it is factual, rather than practical. This book provides practical information and resources with the focus on "what needs to happen", "how to make it happen" and "who needs to do it". This book is useful for supporting people with epilepsy wherever they live (both within and outside the United Kingdom).

**A People's Guide to Orange County** Dec 29 2021 "At first encounter, Orange County can resemble the incoherent sprawl that geographer James Howard Kunstler named The Geography of Nowhere: a car-dependent, seemingly bland space designed most of all for efficient capitalist consumption. But it is somewhere, too, and learning its stories helps it become more than its boosters' slogans. Writers Lisa Alvarez and Andrew Tonkovich, residents of Orange County's remote Modjeska Canyon, describe this

whole county as "a much-constructed and -contrived locale, a pestered and paved landscape built and borne upon stories of human development... of destruction as well as, happily, of enduring wild places." In a similar vein, essayist D. J. Waldie, chronicler of the bordering suburb of Lakewood, asserts that "becoming Californian ... means locating yourself" in "habitats of memory" that connect ordinary, local areas with broader themes. Moving beyond sentimentality, nostalgia, and so many sales pitches that omit far too much, Waldie echoes Michel de Certeau's call to "awaken the stories that sleep in the streets." That is the goal of this book. Inspired by Laura Pulido, Laura Barraclough, and Wendy Cheng's *A People's Guide to Los Angeles* (University of California Press, 2012), as well as the *People's Guides to Boston and San Francisco* that have followed it, we offer this guidebook for locals, tourists, students, and everyone who wants to understand where they really are. This book is organized with regional chapters, sorted roughly north to south by community. Within each city, sites are listed alphabetically. After the group of entries for each city, we recommend nearby restaurants as well as other sites of interest for visitors. Readers may explore this book geographically or use the thematic tours in the appendix to consider environmental politics, Cold War legacies, the politics of housing, LGBTQ spaces, or Orange County's carceral state. The appendix also contains suggestions for teachers using this book, engaging students in cognitive mapping, close reading, popular-culture analysis, and creating additional entries of people's history. While many local histories tend to focus on a few white settlers, this book places attention on the people, especially the subaltern ones who are hierarchically under others, including workers, people of color, youth, and LGBTQ individuals. No single book can represent an entire county, so we have chosen to concentrate on the lesser-known power struggles that have happened here and influenced the landscape that we all share. We could not include everyone, of course. We are mindful that other groups are currently creating more people's history on this landscape that we hope our readers will continue to explore. In Orange County, excavating the diverse past can be frowned upon or actively repressed by those invested in selling Orange County in the style of its booster Anglo settlers from 150 years ago. This book tells the diverse political history beyond the bucolic imagery of orange-crate labels. We hope it will inspire readers to further explore Orange County and reflect on even more sites that could be included in the ordinary, extraordinary landscape here"--

**The Social Worker's Guide to the Care Act 2014** Nov 03 2019 The Care Act 2014 is arguably the most significant piece of legislation for social workers who work with adults, since the NHS and Community Care Act 1990. This book presents the information from the act, regulations and statutory guidance in a way that provides social workers with a good understanding of the legislation and how it applies to their role. Making extensive use of case examples that derive from the author's experience as a social worker, the book highlights the circumstances where professional judgment is required and explores issues that need interpretation such as significant impact on wellbeing. It covers the key stages of the 'care and support journey' - first contact, assessment of needs, prevention, consideration of eligibility, charging and financial assessment, care and support planning, and review. In addition, other chapters look at significant issues such as safeguarding and working with NHS colleagues. This book helps to improve the 'legal literacy' of social workers, i.e. the connecting of legal rules with professional priorities and ethical practice. It achieves this by helping social workers to better understand the legal framework within which they make professional judgements, and to apply their expertise in interpreting the law for the benefit of people with care and support needs. This readable and jargon-free book provides: a solid foundation for social work students in developing a critical understanding of the Care Act and its application, help for experienced social workers with developing the critical reflection necessary to enhance their ability to make professional judgements a source of reference which social workers can use to evaluate their local systems, policies and procedures.

**A People's Guide to an Interfaith Christian Theology in a Time of Transformation** Feb 28 2022 Harvey H. Honig began his life's work as a Lutheran minister but soon recognized his need for a more spacious and inclusive approach through which to heal and understand his inner self. This led him to spend many years exploring and experiencing other paths of religion and spirituality. In recent years, though, he found that the message, mission, and being of Jesus still played a powerful and transformative role in his life. Since common understandings of the life of Jesus are embedded within a biblical and historical framework, Honig wanted to explore the meaning of Christianity within the framework of our current world. An Interfaith Christian Theology is for fellow seekers who are drawn to the being and message of Jesus but can no longer relate to the dissonance between reality and belief that so many churches require. Honig's approach differs from traditional Christian theology in two ways: first, it does not stem from the framework of a specific denomination, and second, it presents itself as a way of thinking about Christianity rather than the only way. After several years as a minister, Honig began Jungian analytic training and earned a PhD in psychology

at Loyola University Chicago. Jung gave Honig the tools he needed to continue his personal search for a life-affirming view of Christianity and to assist others in their search for inner truth and healing.

Written with passion, humour and wisdom, Reading Like a Writer will inspire readers to return to literature with a fresh eye and an eager heart – to take pleasure in the long and magnificent sentences of Philip Roth and the breathtaking paragraphs of Isaac Babel; to look to John le Carré for a lesson in how to advance plot through dialogue and to Flannery O'Connor for the cunning use of the telling detail; to be inspired by Emily Brontë's structural nuance and Charles Dickens's deceptively simple narrative techniques. Most importantly, Prose cautions readers to slow down and pay attention to words, the raw material out of which all literature is crafted, and reminds us that good writing comes out of good reading. /div

**The "People Power" Education Superbook: Book 18. School Teacher Resource Guide** Nov 27 2021 I was a teacher for awhile. I started because I liked education and wanted to do something to express myself creatively but after I taught a basic psychology course called Human Growth & Development over 30 times, I said to myself I don't believe in the fake science of psychology anymore. I could keep doing this to earn a living but everyday I feel like I'm wasting my life. The point is that it's a great profession if you like the course material and the students who are mostly young, well-intentioned and inspired. I'm pro-teacher because I was one. I think it's one of the few truly honorable professions. This is not a teacher job book. I wrote a separate book for that. In a completely rational society, the best of us would be teachers and the rest of us would have to settle for something less, because passing civilization along from one generation to the next ought to be the highest honor and the highest responsibility anyone could have. *The "People Power" Education Superbook: Book 19. College Prep Guide (There Are Several Ways to Get Into College)* Jul 12 2020 Chances are you will go to a college near where you live or go to one online. Many people now do parts of their degrees online then attend the college physically for awhile. In-state is always cheaper than going to a college out of state because your local government subsidizes residents at the local public universities, not the private ones. Private universities charge whatever they want to everybody. Publicly-funded ones are much cheaper. The real issue is what do you study. Do you listen to what everybody else says including the world system or yourself? That's the eternal question. Will I be the hero of my own life or will I be a clone, following everybody else? College is not necessarily the answer to life. You are. Whatever lives inside of you is strong, unique and vital. College can help you find it but by itself college is a fantasy land for young people.

**The No-nonsense Guide to Indigenous Peoples** Oct 07 2022 Indigenous peoples have long suffered from exoticization. Outsiders elevate their beauty, remoteness and difference and do not see beyond this to the real problems they face. The No-Nonsense Guide to Indigenous Peoples looks beyond the exotic images, tracing the stories of different indigenous peoples from their first (and often fatal) contact with explorers and colonizers. Much of this history is told here by indigenous people themselves. They vividly describe why land and the natural world are so special to them; how it feels to be snatched from your family as a child because the government wants to "make you white"; why they are demanding that museums must return the bones of their ancestors; how can they retain their traditional culture while moving with the times; and what kinds of development are positive. This short guide discusses all this and more, raising countless issues for debate.

**A People's Guide to the San Francisco Bay Area** Sep 25 2021 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South

Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.

An Indigenous Peoples' History of the United States Aug 05 2022 New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

A People's Guide to the San Francisco Bay Area Jun 30 2019 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.
