Our jaws are getting smaller and our teeth crooked and crowded, creating not only aesthetic challenges but also difficulties with breathing. Modern orthodontics has persuaded us that braces and oral devices can correct these problems. While teeth can certainly be straightened, what about the underlying causes of this rapid shift in oral evolution and the health risks posed by obstructed airways? Sandra Kahn and Paul R. Ehrlich, a pioneering orthodontist and a world-renowned evolutionist, respectively, present the biological, dietary, and cultural changes that have driven us toward this major health challenge. You're Not Broken Oct 28 2019 In one way or another, we all carry trauma. It can manifest as anxiety, shame, low self-esteem, over-eating, under-eating, addiction, depression, confusion, people-pleasing, under-earning, low mood, negative thinking, social anxiety, anger, brain fog and more. Traumas, big or 'little', leave us trapped in cycles of dysfunctional behaviours, negative thoughts and difficult feelings. Yet many people are unaware they're stuck in old reactions and patterns that stem from their past traumas. Many of us are wary of the word and push it away instead of moving towards it and learning how to break free. Dr Sarah Woodhouse is a Research Psychologist who specialises in trauma and is passionate about helping people face this word and their past. In You're Not Broken she teaches you what a trauma is (it's probably not what you think), and how to recognise when, why and how your past is holding you back. She gently explains the pitfalls of ignoring awkward, upsetting episodes and how true freedom comes from looking back at your past with honesty. Then, sharing the latest research-based techniques and her own personal experience, she guides you towards breaking the trauma loop, reawakening your true self and reclaiming your future.

A Life Less Stressed Apr 14 2021 A holistic guide to the stresses that wear us down and the simple changes we can make to lead happier, healthier, and more resilient lives. Life has never been more stressful. It is no coincidence that chronic degenerative disorders such as cancer, heart disease, autoimmune illnesses, and mental-health conditions are on the rise. But if we want to tackle them, we need to look beyond their symptoms. That is the message of dentist and health advocate Ron Ehrlich. He explores why public health messages have been so confusing and often contradictory, including the role of the food and pharmaceutical industries in all parts our healthcare system. It's a story that's easy to miss but difficult to ignore. He then untangles how problems in one part of the body are intimately connected to the whole and how we as individuals are inextricably linked to our own environment. Ehrlich redefines the stresses that affect us in our modern world, and shows how to strengthen the five pillars — sleep, breathing, nutrition, movement, and thought — that support our health. *A Life Less Stressed* will help you develop a broader understanding of the challenges we face today and empower you to take control, build resilience, and be the best you can be.
