Crap CVs May 19 2021 Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

British Tractors Jul 21 2021 From Allis-Chalmers to Vickers, here is an A-Z of tractors made in Britain between 1945 and 1965, written by a universally acknowledged expert in the subject, whose work has been widely published in books and magazines. British Tractors deals with the products of not only British manufacturers such as David Brown, Ferguson and Nuffield, but also the American makers who established plants in Britain to overcome postwar import restrictions, which included International Harvester, Massey-Harris and Minneapolis-Moline. Demand for tractors after the War was insatiable, and the period covered saw extraordinary growth in production and innovation in design. The text is illustrated exclusively with images - some 400 in all - from the manufacturers' sales brochures and publicity material, giving a unique flavour of the times and an impression of the features the manufacturers were highlighting in the promotion of their tractors.

The Outstretched Shadow May 07 2020 The Outstretched Shadow, the first book in The Obsidian Trilogy from Mercedes Lackey and James Mallory Kellen Tavaddon, son of the Arch-Mage Lycaelon, thought he knew the way the world worked. His father, leading the wise and benevolent Council of Mages, protected and guided the citizens of the Golden City of the Bells. Young Mages in training--all men, for women were unfit to practice magic--memorized the intricate details of High Magic and aspired to seats on the council. Then he found the forbidden Books of Wild Magic--or did they find him? The three slim volumes woke Kellen to the wide world outside the City's isolating walls. Their Magic was not dead, strangled by rules and regulations. It felt like a living thing, guided by the hearts and minds of those who practiced it and benefited from it. Questioning everything he has known, Kellen discovers too many of the City's dark secrets. Banished, with the Outlaw Hunt on his heels, Kellen invokes Wild Magic--and finds himself running for his life with a unicorn at his side. Kellen's life changes almost faster than he can understand or accept. Rescued by a unicorn, healed by a female Wild Mage who knows more about Kellen than anyone outside the City should, meeting Elven royalty and Elven warriors, and plunged into a world where the magical beings he has learned about as abstract concepts are flesh and blood creatures--Kellen both revels in and fears his new freedom. Especially once he learns

about Demons. He'd always thought they were another abstract concept—a stand-in for ultimate evil. But if centaurs and dryads are real, then Demons surely are as well. And the one thing all the Mages of the City agreed on was that practicing Wild Magic corrupted a Mage. Turned him into a Demon. Would that be Kellen's fate? Deep in Obsidian Mountain, the Demons are waiting. Since their defeat in the last great War, they've been biding their time, sowing the seeds of distrust and discontent between their human and Elven enemies. Very soon now, when the Demons rise to make war, there will be no alliance between High and Wild Magic to stand against them. And all the world will belong to the Endarkened. The Tree of Life Sep 22 2021 The human race has been asleep, and has dreamed that property and money are the true wealth of a nation, sacrificing men, women and children to the chimerical idea that danced in visionary splendor through their brains. The result of this is to be seen in the uneasiness that prevails everywhere. But humanity is waking up, slowly but surely and beginning to realize that it, itself, is the most precious thing on earth. In this book the author thoroughly explains the process of physical regeneration by applying the principles of bodily chemistry and spiritual operation.

Ford Tractor Conversions Jul 01 2022 This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural, earthmoving or construction machinery. County, Doe, Chaseside, Muir-Hill, Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four-wheel drive agricultural tractor in Britain. Stuart Gibbard gives details of all the main models and machines of these manufacturers. He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved.

The Tales of Swaggy Joe Dec 14 2020 It all started in the 1970s when my own children were on the threshold of adulthood. The Roving Roo adventures were created around 1989 after a trip to the USA, where my daughter introduced me to a mascot named Kirby Kangaroo. Swaggy Joe became the romantic character of my childhood—when itinerant workers still walked the roads. I have fond memories of some of them, notably an old timer of Bacchus Marsh, Victoria, named Brian Rice, who my Grandma Lyle employed in exchange for food and rudimentary accommodation in the back shed. Another was a chap named Ruben Webb, who my dad gave work to at our home. He worked well and then wandered his way. Great icons of honesty, integrity, and the freedom to live as they would were both of these men and others of their ilk. I recognize that the normal way of life for me as a child has slipped by as prosperity and technology altered what my grandchildren know as their way of life. I felt that it could assist the new generations if they could be given some insights into life as it once was before their time, albeit in romantic tales of the imagination. For me to express this, I found the lyric ballad came naturally to be the utility of sharing. Although untrained as a writer and communicator, the urge to share a little of “what was” or “maybe was” prompted this little booklet. I hope that the readers, those young and those not so, enjoy the unique sharing reading provides.
