Competitive tendering. An effective tool in ensuring value for money in public sector Jun 08 2020
Masterarbeit aus dem Jahr 2014 im Fachbereich BWL - Unternehmensführung, Management, Organisation, Note: A, , Veranstaltung: Economiics, Sprache: Deutsch, Abstract: This research

report was carried out on the topic, “competitive tendering as an effective tool in ensuring value for money in public sector procurement”. The main objective for this study was to examine how competitive tendering could be used as an effective tool to achieve value for money in public sector procurement at the Ahanta West District Assembly. The researcher administered twenty (20) questionnaires to some selected departments in the organization, specifically the procurement unit, the stores department, the accounting department and then the engineering department. The researcher used purposive sampling as a technique to gather ample information for this work. By purposive sampling, the researcher targeted those departments within the organization whose daily activities have direct bearing on procurement. Information gathered were analyzed critically and presented in the form of tables which is readily understandable. It was found out from the analyses that the Ahanta West District Assembly uses the competitive tendering methods in awarding most of their contracts thereby procuring goods, works and services at affordable and competitive prices. However the major problem identified was that, the processes involved are seen to be complex more especially for some contractors and those employees who have little knowledge in procurement when it comes to works and also the problem of political interference. The researcher finally recommended that series of workshops and seminars should be organized for both procurement officers especially new ones who have little knowledge in practical procurement when it comes to works and potential contractors so that they will have more insight into what goes into the preparations or processing of tender documents and lastly the Public Procurement Authority (PPA) should institute measures to monitor the adherence to the public procurement Act 663 in all public institutions.

Estimating and Measurement for Simple Building Works in Hong Kong Aug 30 2019 This book is an introductory text on building measurement and estimating for simple buildings in Hong Kong, based on the Hong Kong Standard Method of Measurement of Building Works 4th Edition Revised 2018 (HKSMM4 Rev 2018). It provides a toolkit for students and surveying technicians who are new to the subject. This second edition updates the contents in line with the HKSMM4 Rev 2018 and incorporates the latest industry developments such as BIM. The main text is divided into five parts following the development of a typical project. Part 1, Building the project team, introduces the team setup for a typical project. Part 2, Deciding the procurement strategy, explains the various procurement decisions to be made by an employer before any cost estimating and measurement work takes place. Part 3, Preparing for tender, covers the tendering methods, tender documentation and approximate estimating techniques used by Quantity Surveyors. Part 4, Measuring quantities, introduces measurement principles and HKSMM4 Rev 2018, followed by a detailed review of the measurement methods for each major trade, with worked examples. Part 5, Estimating unit rates, explores the basic techniques for unit rate preparation. The book contains worked examples from real Hong Kong building projects, self-assessment questions, reminders and points of note. It is essential reading for Hong Kong construction and surveying students, international Quantity Surveyors working in the local area and those wanting international examples of Quantity Surveyors practice.

Bids, Tenders and Proposals Jan 28 2022 This unique book is a practical guide to winning contracts and funding through competitive bids, tenders and proposals. Written in a crisp, accessible style using examples and checklists, it explains how to create bids that are outstanding in both technical quality and value for money. This fully updated edition extends the scope and content of the book to make it an even more useful and practical guide to successful tendering. This book puts at the reader's disposal techniques that the author has perfected as a specialist writer in this field, and insights gained from his experience as an evaluator of tenders with client organizations in the public and private sectors. Those who are new to bid writing will learn how

to build the confidence to start producing successful bids. Those who are more experienced will be shown new ideas that extend and reinforce their skills. This book covers a broad range of procurement and funding, and its advice is relevant to tendering for supplies and works contracts. Much of the material will be pertinent also to public-private partnerships. Based on examples drawn from actual bids and tenders, with new topics on business development and market intelligence, *Bids, Tenders and Proposals* now includes advice on winning competitive tenders from international funding institutions and aid agencies as well as the latest information on EU procurement framework, method statements, prequalification documents and e-tendering.

Estimating and Tendering for Construction Work Jan 08 2023 The job of the estimator is explained in detail at every key stage, from early cost studies, through the preparation of the estimate, to the creation of budgets for successful tenders. Each step is illustrated with examples and notes, and appropriate technical documentation. Over recent years there have been significant developments in construction management, notably new procurement methods, greater emphasis on innovation and partnering, a greater reliance on cost planning as a methodology, and new developments in both industry and governmental reports and guidance. This new and updated edition of a well-established textbook addresses each of these developments in turn, placing them firmly in the context of a thorough and easy to understand introduction to the roles of the estimator in preparing and winning tenders.

Fasttrack Finding the Winning Solution Sep 11 2020 FastTrack(c) Finding The Winning Solution Edition 2: Do you wish to bid or tender for business and not sure how to go about it? Do you keep bidding and never seem to be considered? Does your company wish to tender for extra work in order to expand? This book will show you not only how to prepare your company, but also present your capabilities and strengths in the best possible manner. Preparing the proposed solution is always a problem for companies that do not normally undertake project management. This book provides the basics of project management and how to define the proposed solution to the tendering body. Risks are the greatest reason for failure to make a profit from your winning bid. We will show you how to identify and mitigate risks found lurking in those invitations to tender documents. We will also show you what can go wrong with a proposal and how you can learn the lessons for the future. We show you how to highlight the great things about your business and hide your weaknesses. www.Bid-Manager.c

Invitations to Tender for Facility Management Services May 08 2020 This book deals with Invitations to Tender (ITTs) for the provision of Facility Management (FM) services. It presents a framework to support companies in preparing clear, comprehensive and effective ITTs, focusing on such key aspects as: organizational structures, tools and procedures for managing information, allocation of information responsibilities, procedures for services monitoring and control, quality policies, and risk management. It discusses and analyzes a range of basic terms and concepts, procedures, and international standards concerning the Tendering Process, as well as the contents of ITTs, which should represent the translation of information needs into requirements related to: the client's goals, main categories of information to deal with, expected organization of information, modalities of reporting and control, and level of knowledge to be reached. A further major focus is on potential key innovation scenarios concerning current FM practice, such as Sustainable Procurement, Building Information Modeling (BIM), Big Data and

Internet of Things (IoT) technologies, highlighting both the possible benefits and the possible risks and implications that could negatively affect the quality of FM service provision if not properly treated within the ITT. The book will be of interest to real estate owners, demand organizations and facility managers, enhancing their ability to prepare, interpret and/or critically analyze ITTs.

Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations Nov 13

2020 *Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations*

analyzes the international operations of consulting firms. Apart from developing a theoretical framework which differs from traditional theories about international trade, the main issues analyzed in this book are: 1) Success determinants when tendering for international consulting contracts; 2) The choice between exports, acquisition of a local firm or establishing a greenfield office when entering foreign markets; 3) The extent and nature of knowledge transfer to emerging markets; 4) The role of development agencies in international consulting projects; 5) The trend towards, and consequences of, more management services included in international projects; 6) The effects on competition when state-owned consulting firms are allowed to operate in the international market. The empirical analysis of these issues is based on a unique database of individual tender documents which Swedish consulting firms have submitted abroad.

Conflict Avoidance and Dispute Resolution in Construction Aug 11 2020

Basics Building Contract Feb 14 2021 Once the design has been completed, the architects

prepare the tender documents for the contractors, and provide support during the tender procedure. For the purpose of commissioning various building works it is necessary to set up building contracts which contain standard content as well as very individual provisions. The building contract and its extensive drawings and specifications are the basis for the building work; they must be understood by the supervising architect and implemented to create the building. The complexity and diversity of building contracts is increased by the fact that there is hardly a building contract that does not have to be modified after it has been signed. *Basics Building Contract* offers the typical structures and explanations, as well as the tools for creating project-specific contracts and understanding the inherent complexity.

New Code of Estimating Practice Nov 01 2019 The essential, authoritative guide to providing accurate, systematic, and reliable estimating for construction projects—newly revised Pricing and bidding for construction work is at the heart of every construction business, and in the minds of construction consultants' poor bids lead to poor performance and nobody wins. *New Code of Estimating Practice* examines the processes of estimating and pricing, providing best practice guidelines for those involved in procuring and pricing construction works, both in the public and private sectors. It embodies principles that are applicable to any project regardless of size or complexity. This authoritative guide has been completely rewritten to include much more contextual and educational material as well as the code of practice. It covers changes in estimating practice; the bidding process; the fundamentals in formulating a bid; the pre-qualification process; procurement options; contractual arrangements and legal issues; preliminaries; temporary works; cost estimating techniques; risk management; logistics; resource and production planning; computer-aided estimating; information and time planning; resource planning and pricing; preparation of an estimator's report; bid assembly and adjudication; pre-production planning and processes; and site production. Established standard for the construction

industry, providing the only code of practice on construction estimating Prepared under the auspices of the Chartered Institute of Building and endorsed by a range of other professional bodies Completely rewritten since the 7th edition, to include much more contextual and educational material, as well as the core code of practice New Code of Estimating Practice is an important book for construction contractors, specialist contractors, quantity surveyors/cost consultants, and for students of construction and quantity surveying.

Electrical Contracting Tendering and Estimating Oct 01 2019 'Electrical Contracting Tendering & Estimating - An Introductory Short Guide' is aimed at electrical contractors within the construction industry who are new to the process of tendering and estimating, or who wish to improve their current skills. The book is an easy-to-follow, short and concise introductory guide, covering the step-by-step basics of tendering and estimating electrical contracting projects with values in the region of •10k to •1m. It provides readers with relevant pointers and tips, helping them to make the transition from pricing small jobs to estimating costs on larger projects which may involve multiple drawings, specifications and complex tender documents. Topics covered include: How to source tender enquiries, Determining which tender documents are relevant, Compiling & issuing RFIs, Drawing take-offs, Evaluating specialist sub-contractor quotes, Inputting, Applying labour costs, Mark-ups, Submitting the tender and Value engineering. This book can help the reader to develop their skills in the electrical tendering and estimating processes, potentially meaning costly mistakes are avoided, risks are reduced and efficiency savings are made. All for the cost of what is approximately an hour of on-site electrical contracting labour. Awarded "Electrical Times Product of the Month" - March 2017 Published: 2017

Introduction to Estimating for Construction Feb 03 2020 Students and professionals encountering estimating for the first time need an approachable introduction to its principles and techniques, which is up to date with current practice. This title explains both the traditional techniques, and best practice in early contractor involvement situations, within the framework of modern construction procurement.

How to Write Bids that Win Business Mar 30 2022 How To Write Bids That Win Business brings together over 30 years of know-how in creating and crafting successful bids for tendered contracts. This book is an invaluable guide for bid managers and bid writing teams. It shows you how to: - create a bid writing strategy that plays to your organisation's strengths - increase your success rate by focusing on bids you are more likely to win - avoid at the outset bidding for contracts you don't want to win - embed robust bid writing management systems that deliver results time after time - ensure you follow the three golden rules for bid writing success Based on extensive research, How To Write Bids That Win Business explains what bid evaluators are really looking for, by deconstructing the questions asked and explaining how to answer them to achieve top scores. Parts I to III guide you through the complete bid creation process, providing the tips, techniques and tactics for maximising your effectiveness at the shortlister interview. In Part IV the book examines the forces shaping the future of bid writing, and outlines the three key factors for success in the years to come. Co-authors Martyn Curley and Stephen Oldbury, co-founders of Bidwriting.com, have advised many UK business-to-business organisations across 35 commercial sectors. David Molian was for many years Director of Cranfield School of Management's renowned Business Growth Programme and has consulted for numerous

companies on developing their brands and growing their businesses. He is a Criticaleye Thought Leader and remains a visiting Fellow at Cranfield. If you are looking to take your organisation's bidding performance to the next level, improving profitability and morale throughout the business, *How To Write Bids That Win Business* is the book you need.

Urban Drainage Project in the City of Jakarta Apr 30 2022

Board of Trade Journal Feb 26 2022

Code of Practice for the Selection of Subcontractors Jun 01 2022 This code of practice is one of a set of documents from the CIB aimed at improving the quality, effectiveness and efficiency of the construction industry. It should be used in conjunction with the other documents in the series. 1~ The good practice recommended should be observed in commercial relationships throughout the contractual chain and throughout the duration of a construction project. Subcontractors can be selected by competitive tendering, by negotiation or as a result of partnering or a joint venture arrangement. Competitive tendering is complex and requires everyone involved to follow a common set of procedures; inevitably it occupies the bulk of this code. In competitive tendering for small or simple works all the steps described are required but many may take place informally, and these are indicated by dotted lines in the diagrams which accompany each section of the code. Negotiation, partnering or joint ventures should all be carried out in the same spirit of good practice although specific procedures will vary. For competitive tendering to be effective in providing good value for money it must be seen to be fair and the processes by which decisions are reached must be as open as possible. This applies to all forms of subcontractor selection.

LISS 2020 Dec 03 2019 This book contains the proceedings of the 10th International Conference on Logistics, Informatics and Service Sciences (LISS 2020), which is co-organized by Beijing Jiaotong University, Budapest University of Technology and Economics, in July 25–28 2020. This book focuses on the “AI and data-driven technical and management innovation in logistics, informatics and services” and aims to provide new research methods, theories and applications from various areas of management and engineering. In detail the included scientific papers analyse and describe communication processes in the fields of logistics, informatics, service sciences and other related areas. The variety of papers delivers added value for both scholars and practitioners. Information and communication technologies have been providing an effective network infrastructure and development platform for logistics and service operations.

Basics Project Planning Apr 06 2020 The main task of the classical architect is project planning, from basic evaluation to design all the way to execution planning, the call for bids, construction management, and completion of the building. This volume explains the individual planning steps in context, presents the networking of the various specialists involved in the project, and offers a clear and practical description of the various levels of organization. Themes are - Planning steps from basic evaluation to handing over the keys, - Project participants (including the authorities, specialized planners, construction firms, etc.), - Organizing the plan (sequence, what's needed when?, work organization, documentation), - Coordination of the participants.

The Aqua Group Guide to Procurement, Tendering and Contract Administration Dec 27 2021 This key text for the building team is an authoritative guide and gives a detailed account of the team's roles and responsibilities, with best industry practice required to ensure that building projects meet clients' expectations on time, cost and quality. The second edition of *The Aqua Group Guide to Procurement, Tendering and Contract Administration* has been edited, enlarged and updated by a high-profile author team with unparalleled experience of both private and public sectors, as well as of teaching on QS courses. It covers the entire building process from

inception to final account and throughout, the emphasis is on current best practice. This edition has new material on the CDM regulations; JCT contracts; the RIBA Plan of Work; the RICS New Rules of Measurement; BIM; and Sustainability - as well as a general update for industry changes, especially on procurement; internationalisation; and PFI. With clear and thorough explanations, you are taken through self-contained chapters covering the detail of the briefing stage, procurement methods, tendering procedures, and contract administration. The period from starting a college course to successful completion of professional examinations represents a long and steep learning curve. The range of skills and the knowledge required to perform work efficiently and effectively might, at first, seem rather daunting. Although designed as an introductory textbook for undergraduates in construction, architecture and quantity surveying, The Aqua Group Guide offers an excellent overview of contract administration and will provide you with sufficient understanding to hold you in good stead for your early years in professional practice.

Surveyor Oct 25 2021

Procurement of Works Dec 07 2022 These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Code of Estimating Practice Dec 15 2020 This code of practice, long established as a leading publication for the construction industry, provides an authoritative guide to essential principles and good practice in estimating for building work. The seventh edition includes new material on estimating strategy, tendering, procedures and best practice, as well as the build-up of unit rates of cost, overheads and profit, and e-commerce.

Tender Documents for the Construction of St Oct 05 2022

Supplement to the Official Journal of the European Communities Jan 16 2021

Indian Trade Journal Oct 13 2020

Managing Sport and Leisure Facilities Jul 22 2021 Concise and thoroughly detailed *Managing Sport and Leisure Facilities* is a clean operating guide to leisure management by contract, providing expert advice for both contractor and client. The author includes extracts from the relevant legislation and tender documents, and shows you how to submit a winning tender. He provides guidance on how to carry out customer surveys and also covers special items such as operating leisure facilities in hotels and sub-contracting catering services.

An Employer's and Engineer's Guide to the FIDIC Conditions of Contract Jul 02 2022 When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer's and Engineer's Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer's role in the preparation of tenders, which fully reflect his requirements and duties and obligations

arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language).

Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author's earlier book, Contractor's Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor - represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book's companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer's Order for Varied Works Model Form of Daywork/Daily Record Sheets

Bids, Tenders & Proposals Jun 20 2021 * Huge scope - covers all aspects of tender writing for public sector, private sector and research funding * Expert guidance from a specialist who has written over 200 successful tenders and proposals * Highly practical approach - based on examples drawn from actual bids and tenders With more and more corporations opting for "preferred supplier" lists, bids and tenders have become a fact of business life. For the small or medium sized corporation without a specialist bids-and-tenders team, the research unit, or the university team, bid preparation can take great amounts of senior management time. Here's where this book comes in: practical and written in an accessible style, it uses examples and checklists to explain how to create bids that are outstanding in both technical quality and value for money, bids that stand a good chance of being successful. Lewis provides "best-practice" advice on every step in the process, including: Bidding for public sector contracts; tendering for the private sector and for research projects; analyzing client requirements; managing, resourcing and researching the bid; developing and writing the bid; defining outputs and deliverables; communicating added value; describing professional experience; producing and submitting tenders; stating the price; understanding tender evaluation; and making presentations.
