Omul de castane Feb 26 2020 Cea ma bun? carte a anului New York Times Book Review Dac? ai g?sit unul înseamn? c? EL te?a ales. În curând serial Netflix "E o carte pe care n?o po?i l?sa din mîn?, dar care te va face s? ezi?i înainte s? dai pagina, atît de tulbur?toare este." – Kirkus Reviews Un psihopat terorizeaz? Copenhaga. Semn?tura lui — figurine f?cute din be?e de chibrit ?i dou? castane, l?sate la locul fiec?rei crime sângeroase. Pe figurine, poli?ia g?se?te amprenta unei feti?e r?pite ?i ucise cu un an în urm?. O coinciden?? tragic? sau un mesaj diabolic? Ca s? pun? cap?t seriei de crime, cei doi detectivi care ancheteaz? cazul trebuie s? lase

deoparte neîn?elegerile ?i s? descrieze indiciile macabre l?sate de asasin. Pentru c? acesta nu d? niciun semn c? se va opri. ?i nimeni nu este în siguran???. „Un debut plin de suspans ?i tensiune... Incendiar.” – Financial Times „O intrig? poli?ist? a c?rei profunzime este sporit? de comentariul social tulbur?tor.” - Booklist „De?i e greu s???i desprinzi privirea de la personajul diabolic al lui Svestrup, ?i b?ie?ii buni merit? toat? aten?ia.” - New York Times Book Review „Svestrup creeaz? o intrig? atît de complex?, încât nici chiar cititorii de romane poli?iste versa?i nu vor ghici finalul. Este o carte înfrico??toare în cel mai bun sens.” – Library Journal

New Perspectives on the Theory of Inequalities for Integral and Sum Oct 04 2020 This book provides new contributions to the theory of inequalities for integral and sum, and includes four chapters. In the first chapter, linear inequalities via interpolation polynomials and green functions are discussed. New results related to Popoviciu type linear inequalities via extension of the Montgomery identity, the Taylor formula, Abel-Gontscharoff's interpolation polynomials, Hermite interpolation polynomials and the Fink identity with Green's functions, are presented. The second chapter is dedicated to Ostrowski's inequality and results with applications to numerical integration and probability theory. The third chapter deals with results involving functions with nondecreasing increments. Real life applications are discussed, as well as and connection of functions with nondecreasing increments together with many important concepts including arithmetic integral mean, wright convex functions, convex functions, nabla-convex functions, Jensen m-convex functions, m-convex functions, m-nabla-convex functions, k-monotonic functions, absolutely monotonic functions, completely monotonic functions, Laplace transform and exponentially convex functions, by using the finite difference operator of order m. The fourth chapter is mainly based on Popoviciu and Cebysev-Popoviciu type identities and inequalities. In this last chapter, the authors present results by using delta and nabla operators of higher order.
