**An Irish Sanctuary** Jun 04 2020 The monograph provides the first comprehensive, detailed account of German-speaking refugees in Ireland 1933-1945 - where they came from, immigration policy towards them and how their lives turned out in Ireland and afterwards. Thanks to unprecedented access to thousands of files of the Irish Department of Justice (all still officially closed) as well as extensive archive research in Ireland, Germany, England, Austria as well as the US and numerous interviews it is possible for the first time to give an almost complete overview of how many people came, how they contributed to Ireland, how this fits in with the history of migration to Ireland and what can be learned from it. While Exile studies are a well-developed research area and have benefited from the work of research centres and archives in Germany, Austria, Great Britain and the USA (Frankfurt/M, Leipzig, Hamburg, Berlin, Innsbruck, Graz, Vienna, London and SUNY Albany and the Leo Baeck Institutes), Ireland was long neglected in this regard. Instead of the usual narrative of "no one was let in" or "only a handful came to Ireland" the authors identified more than 300 refugees through interviews and intensive research in Irish, German and Austrian archives. German-speaking exiles were the first main group of immigrants that came to the young Irish Free State from 1933 onwards and they had a considerable impact on academic, industrial and religious developments in Ireland.

Climate Change Jun 28 2022 This programme sets out the Government's policies and priorities for action on climate change in the UK and internationally. The first section examines the nature and scale of the challenge posed by climate change. It describes the existing international framework for action, including the G8 and EU meetings and resulting plans of action. The Government intends to build on these developments, and also try to influence the rapidly growing economies of India, China, Brazil and others so that they evolve as low-carbon economies. The major part of the report is concerned with the UK's attempt to deliver the Kyoto Protocol target of reducing emissions of six greenhouse gases by 12.5 per cent below base year levels over the 2008-2012 period, and also the domestic goal of reducing carbon dioxide emissions by 20 per cent below 1990 levels by 2010. Projections indicate that CO2 reduction by 2010 will only be some 10.6 per cent below the 1990 level. Sections on the UK emission inventory and projections, the strategy to reduce emissions, and the energy supply sector, are followed by chapters covering particular economic sectors: business; transport, domestic; agriculture and forestry; the public sector. Among policies outlined here are: encouragement of microgeneration and renewable sources of energy; investigation of carbon capture and storage; support for energy efficiency in business, local and central government; increase uptake of biofuels; include aviation in the emissions trading scheme for the EU from 2008; raise energy standards of new and refurbished buildings; introduce the Code for Sustainable Homes; strengthen consumer demand for energy efficiency. The Government also sets out its approach to encourage personal action, as citizens, consumers, motorists and business people. Provision of better information to the public, including an online service on the

environmental impact of everyday products and services, will be supplemented by a plan for action on sustainable consumption by the end of 2006.

Contestations Over Gender in Asia Jan 12 2021 This book brings together the work of scholars from around the world in a consideration of how gender is contested in various parts of Asia – in China, India, Indonesia, Japan, and the Philippines. Part I of this collection explores notions of agency in relation to women's domestic and everyday lives. While 'agency' is one of the key terms in contemporary social science, scholarship on women in Asia recently has focussed on women's political activism. Women's private lives have been neglected in this new scholarship. This

volume has a special focus on women's relational and emotional lives, domestic practices, marriage, singlehood and maternity. Papers consider how women negotiate enhanced space and reputations, challenging negative representations and entrenched models of intra-family and intimate relations. There is also a warning about too free feminist expectations of agency and the repercussions of the exercise of agency. The three essays in Part II examine the historical construction of masculinities in colonial and postcolonial South and Southeast Asia, and the ways that manhood is interpreted, experienced and performed in daily life in the past and in present times. They highlight the centrality and continued relevance of masculinity to analyses of empire and nation and underscore the highly gendered and (hetero)sexualized nature of political, military, and economic institutions. Collectively, the essays explore a wide range of competing articulations and experiences of gender within Asia, emphasising the historical and contemporary plurality and variability of femininity and masculinity, and the dynamic and intersectional nature of gender identities and relations. This book was published as a special issue of *Asian Studies Review*.

BMW Business Strategy - An Overview Apr 02 2020 Seminar paper from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 70%, Glyndŵr University, Wrexham known as NEWI, course: Strategic Business, language: English, abstract: BMW - the Bavarian based luxury car producer is seen as one of the most prestigious, stable and admired companies in the world. By 2008 the company sold 1.2 million automobiles under its largest brand - the BMW. In 2001 it very successfully launched the new Mini which is the only brand kept after the failed acquisition of the Rover group with sales rising to over 230 thousand in 2008. In 2003 Rolls Royce was added to BMW's portfolio and sold 1,212 units in 2008 - an increase of 53% compared to 2004 (BMW Annual Report 2008, pp6-7). The company has not only one of the strongest brands worldwide and exclusively high profit margins of 8 - 10% but since 2007 it has been the world's top seller in the premium class (Hawranek, 2008). In the last 50 years BMW has built a powerful brand image and distinctive competitive advantage. However, with rising fuel prices and climate change BMW will have to work hard to develop an environmentally-friendly car that still supports the values that the company has been standing for. Despite the fact that recent recession has hit hard the luxury market BMW considers itself in fundamentally good shape as it began preparing for a downturn in early 2008 (Ewing, 2009). However, there are no reliable predictions on how long the crises will last and how the automobile industry will develop in the future but the direction BMW has to work to is certainly clear - to a greener, more environmentally-friendly Beemer.

*Pre-budget 2005 Tax, Economic Analysis, And Climate Change* Jul 06 2020 The Committee reports on the progress made by the Treasury in placing environmental objectives at the heart of its fiscal policies. This year's pre-Budget report (Cm. 6701, December 2005, ISBN 0101670125) is found to be inadequate, especially in the context of UK CO2 emissions actually increasing once more. No significant new measures were announced, and the Committee sees a continued slowing down of the Treasury's momentum in turning rhetoric into action. It believes the Treasury should redefine Air Passenger Duty (APD) as an environmental tax and that APD rates should more accurately reflect the carbon emissions of the flights to which they apply. Charging APD on flights rather than passengers could also act as an incentive to more efficient use of aviation fuel. The Committee also recommends action on aviation fuel duty, biofuels, car energy efficiency, steps to wean the economy off over-reliance on oil, stamp duty and council tax reductions for homes built or refurbished to high environmental standards. Each pre-Budget report should include figures on total revenue from the climate change levy, aggregates levy, and landfill tax. Although the Treasury accepts the principle of increasing taxes on "bads" rather than "goods" its reluctance for bold reform of the tax system mystifies the Committee. A Green tax Commission should be reconsidered, to develop a proper communications strategy to sell the environmental programme to the public. The Committee exhorts the Government to make moves on the climate change problem, as waiting for universal agreement is a recipe for stasis. Finally, the Committee regrets the Treasury's decision to abolish the Operating and Financial Review required from large companies, in that it appears to view sustainable reporting as an optional extra. It hopes that the proposed new business reviews will continue to require some form of social and environmental disclosure from companies.

**Cars and Carbon** Sep 19 2021 This volume contains articles from leading analysts and researchers on sustainable transportation, who provide critical reflections on how automobile-related climate policies have evolved up to now in Europe and around the world, in view of the widely recognized need to substantially curb global emissions of greenhouse gases in the coming decades. Authors describe the policies which have been most effective, outline their economic and social implications, present success stories while critically reviewing less successful examples, and suggest strategies to decarbonize passenger transportation on a global scale.

Auto Brand Dec 11 2020 The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo

*Corvette Special Editions* Oct 01 2022 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} When the first Corvette was introduced to the public through the travelling caravan known as Motorama, everyone knew there was something special about it. Each subsequent model continued to strengthen that position. But how do you upgrade America's favorite sports car? Make it a special edition! Special edition Corvettes are the tip of the spear when it comes to the American auto manufacturers special models. Luminous cars such as the 1967 L88 convertible, 1969

aluminum block ZL1, and 2015 Z06 #001 have all commanded a million dollars or more. Modern dealer-tuned cars from Lingenfelter, Calloway, and Hennessey have carried the tradition of making a great Corvette even better. Extremely low mileage on 1978 Pace Cars indicate that people have thought of these cars as investments for nearly 40 years. Keith Cornett of Corvetteblogger.com compiles a murderer's row of special-edition Corvettes in this first-ever compilation on the subject. This book is an encyclopedia of information, as you will learn about some of the rarest Corvettes on the planet. It will serve as a guide if you're looking to add one of these special machines to your collection. Everything you've ever wanted to learn about collectible Corvettes is in Corvette Special Editions.
