*Recueil Des Cours, Collected Courses, Tome 408* Feb 12 2021 Reflections on the realization of justice are much needed in the era of contemporary international tribunals, given the significant role they play now facing new challenges, with the recent restrictions unduly imposed upon the United Nations Organization itself. International jurisdiction has lately expanded with the operation of international tribunals, protecting vulnerable persons in distinct domains of international law, and seeking to face new needs in their jurisprudential construction.

*Collected Courses of the Academy of European Law 1995 Vol. VI - 1* Aug 09 2020 The Academy of European Law was established by the European University Institute in 1990 and extends the Institute's current programmes into a larger field of interest. It has as its main activity the holding of annual Summer Courses in the law of the European Community and the protection of human rights in Europe. In addition to General Courses, shorter courses are held on subjects of special academic and practical interest in both fields. Finally, special guest lectures on topical issues are given by policy makers, judges and persons who have held or currently hold the highest position in these fields. The courses are published in the language in which they were delivered (English and French).

[Reframing Human Rights in a Turbulent Era](#) Dec 05 2022 In recent years, human rights have come under fire, with the rise of political illiberalism and the coming to power of populist authoritarian leaders in many parts of the world who contest and dismiss the idea of human rights. More surprisingly, scholars and public intellectuals, from both the progressive and the conservative side of the political spectrum, have also been deeply critical, dismissing human rights as flawed, inadequate, hegemonic, or overreaching. While acknowledging some of the shortcomings, this book presents an experimentalist account of international human rights law and practice and argues that the human rights movement remains a powerful and appealing one with widespread traction in many parts of the globe. Using three case studies to illuminate the importance and vibrancy of the movement around the world, the book argues that its potency and legitimacy rest on three main pillars: First, it is based on a deeply-rooted and widely appealing moral discourse that integrates the three universal values of human dignity, human welfare, and human freedom. Second, these values and their elaboration in international legal instruments have gained widespread - even if thin - agreement among states worldwide. Third, human rights law and practice is highly dynamic, with human rights being activated, shaped, and given meaning and impact through the on-going mobilization of affected individuals and groups, and through their iterative engagement with multiple domestic and international institutions and processes. The book offers an account of how the human rights movement has helped to promote human rights and positive social change, and argues that the challenges of the current era provide good reasons to reform, innovate, and strengthen that movement, rather than to abandon it or to herald its demise.

**Human Rights** Aug 01 2022 This third edition of *Human Rights: Between Idealism and Realism* presents human rights in action, focusing on their effectiveness as legal tools designed to benefit human beings. By combining conceptual analysis with an emphasis on procedures and mechanisms of implementation, this volume provides a multidimensional overview of human rights. After examining briefly the history of human rights, the author analyses the intellectual framework that forms the basis of their legitimacy. In particular, he covers the concept of universality and the widely used model that classifies human rights into clusters of different 'generations'. In this edition, the author brings together the fundamental aspects of human rights law, addressing human dignity as the ethical foundation of human rights, the principle of equality and non-discrimination as the essence of any culture of human rights, the protections against racial discrimination and discrimination against women, and assesses the individual as a subject of international law. The volume then moves on to assess the activities of the political institutions of the United Nations, the expert bodies established by the relevant treaties, and the international tribunals specifically entrusted at the regional level with protecting human rights. This edition also includes specific analysis of the actions mandated by the UN Security Council against Libya in 2011. It also includes greater coverage of the jurisprudence of the Inter-American Court of Human Rights and the African Commission on Human and Peoples' Rights. The author explains how and why the classical array of politically inspired informal devices has been enriched by the addition of international criminal procedures and by endeavors to introduce civil suits against alleged individual violators of human rights. Finally, the volume is rounded off by a consideration of the importance of humanitarian law as an instrument for the protection of human life and dignity and an exploration of the future of human rights.

*Collected Courses of the Academy of European Law / Recueil des cours de l'Académie de droit européen* Jun 18 2021 Your invitation to me, as the President of the European Court of Human Rights, to conclude this year's study programme on the protection of human rights in Europe by delivering the prestigious Winston Churchill lecture is a great honour not only for me personally but for the European Court of Human Rights as a whole, and I should like to thank the European University Institute and its Academy of European Law most warmly for giving me this opportunity. You are fortunate to have had the opportunity of following a week long general course on the protection of human rights in Europe given by my colleague and friend Carl Aage Nørgaard, the President of the European Commission of Human Rights. To speak after him, in order to bring to a close your study programme, makes my task in some respects easier because I can take it for granted that you now have a clear and comprehensive understanding of the guarantees and the functioning of the European Convention on Human Rights. On the other hand, it is, I must confess, not without a certain apprehension that I take the floor at this juncture because I am very well aware of how difficult it is to keep the attention of an audience which has had the privilege of hearing Carl Aage Nørgaard on more or less the same subject.

All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law. This volume contains: Since the end of the Second World War, cross-border relations among nations have intensified on a large scale, and, in addition to international peace and security, many other problems have arisen that possess worldwide dimensions. However, international law is still predicated on the basic rule of national sovereignty. Given this discrepancy, humankind is called upon to establish a system of international governance that is able to deal effectively with all the challenges that threaten its survival as a civilized community of nations. Practice is already evolving in that direction.

International Humanitarian Law and International Human Rights Law Mar 28 2022 The idea that international humanitarian law (IHL) and international human rights law (IHRL) are complementary, rather than mutually exclusive regimes generated a paradigmatic shift in the international legal discourse. The reconciliation was driven by a humanistic ethos and its purpose was to offer greater protection of the rights to life, liberty and dignity of all individuals under all circumstances. The complementarity of both regimes currently enjoys the status of the new orthodoxy and simultaneously invites critical reflection. This collection of essays accepts the invitation, offering diverse assessments of the merits of taking human rights to the battlefields of the twenty-first century. The book comprises three parts: part I focuses on the paradigmatic (security based "armed conflict" vs. human rights centered "law enforcement" paradigms) and the normative complexities of the interaction between both regimes in the "fight against terror" and in other, allegedly new, types of wars. Part II discusses the interplay between IHRL and IHL in the context of three specific regimes: belligerent occupation; the European Court of Human Rights and the protection of cultural heritage. Part III explores the potential fusion of IHL and IHRL into a new paradigm in two areas: post-bellum accountability and compensation to victims of war crimes. The range of issues, multitude of competing norms and narratives, and shifting paradigms explored in this collection, converse with each other. This conversation mirrors the process through which international law - paying deference to political realities while simultaneously seeking to transcend them - charts new pathways to advance its humanizing project.

**Contemporary Challenges to EU Legality** Aug 28 2019 This volume on the law of the European Union focuses on contemporary challenges

to EU legality. Such challenges include actions or activities that cast doubt on, or sit uncomfortably with, the premises, principles, and norms that underpin the EU's legal order as proclaimed by the Treaties and the authoritative judgments of the European Court. These premises, principles, and norms range from the precisely formulated to the noticeably vague. The book develops a broader theoretical perspective as well as delving into a range of substantive areas including the Common Foreign and Security Policy, the EU's relationship with international law, migration, the sovereign debt crisis, and Brexit.

**Recueil Des Cours, Collected Courses, Tome/Volume 365** Apr 04 2020 The course of international law over time needs to be understood if international law is to be understood. This work aims to provide such an understanding. It is directed not at topics or subject headings — sources, treaties, states, human rights and so on — but at some of the key unresolved problems of the discipline. Unresolved, they call into question its status as a discipline. Is international law "law" properly so-called? In what respects is it systematic? Does it — can it — respect the rule of law? These problems can be resolved, or at least reduced, by an imaginative reading of our shared practices and our increasingly shared history, with an emphasis on process. In this sense the practice of the institutions of international law is to be understood as the law itself. They are in a dialectical relationship with the law, shaping it and being shaped by it. This is explained by reference to actual cases and examples, providing a course of international law in some standard sense as well.

Recueil Des Cours, Collected Courses, Tome 410 Aug 21 2021 American Schools of International Law, by H. H. KOH, Sterling Professor of International Law at Yale Law School. 0 Is there still one international law and does the United States of America really believe in it? This lecture inaugurating the Hague Academy's first Winter Session, by an American scholar who served as US State Department Legal Adviser, argues that Americans do believe in international law as part of their nation's founding credo. Although recent US administrations have challenged 21st century international law, most American lawyers and legal scholars remain committed to the rule of international law. This dominant strand of international thinking among American academics and practitioners inhabits a school with strong historical roots known as the "New" New Haven School of International Law. 00Animals in International Law, by A. PETERS, Director at the Max Planck Institute for Comparative Public Law and International Law Heidelberg. 00The plight of animal individuals and species inflicted on them by human activity is a global problem with detrimental repercussions for all humans and for the entire planet. The book gives an overview of the most important international legal regimes which directly address animals and which indirectly affect them. It covers species conservation treaties, notably the international whaling regime, the farm animal protection rules of the EU, international trade law, and the international law of armed conflict. It also analyses the potential of international fundamental rights for animals.
