*Mission* Nov 06 2022 Where do the spies, diplomats, soldiers and FBI agents go when their formal service ends? For most of us, full retirement is not an immediate reality. The decision to leave or retire from government is hard! Deciding what to do next is even harder. Author and Career Coach Alison P.

Bouwmeester served for 28 years as a senior leader in the Central Intelligence Agency's Directorate of Operations. After retiring from the CIA, she spent nearly a decade as a senior business executive in the defense contracting industry, rising to Vice President for Business Development. In 2018, Alison became a Certified Professional Career Coach and founded Futurity to coach others through successful career transitions as someone who has "walked the walk". In this book, dozens of former intelligence, diplomatic, military and national security professionals provide candid comments, valuable tips and sage advice. These careerists represent those who chose full retirement in warm, sunny climates to play golf, and others who aspired to high-powered second careers in industry, sought part-time work or chose to be self-employed, and still others who opted to continue with the government in some capacity. In this guide, these individuals talk about their own decisions to leave, their biggest fears, and the many positives (and few negatives) that came out of leaving government. This guide also addresses key questions facing many government employees who consider leaving, such as: -Making the decision to go: how/when/why- Potential paths to consider (from full retirement to full time employment, and all the options in-between)-The mechanics of leaving, as well as job hunting tips, job search strategies, self-

assessment, resumes, networking, LinkedIn, interviewing, and the dreaded contract negotiation. Considering a job change? Pondering a second career? Thinking about potential retirement? Read on!

Times Square Red, Times Square Blue 20th Anniversary Edition Jan 16 2021 Twentieth anniversary edition of a landmark book that cataloged a vibrant but disappearing neighborhood in New York City In the two decades that preceded the original publication of Times Square Red, Times Square Blue, Forty-second Street, then the most infamous street in America, was being remade into a sanitized tourist haven. In the forced disappearance of porn theaters, peep shows, and street hustlers to make room for a Disney store, a children's theater, and large, neon-lit cafes, Samuel R. Delany saw a disappearance, not only of the old Times Square, but of the complex social relationships that developed there. Samuel R. Delany bore witness to the dismantling of the institutions that promoted points of contact between people of different classes and races in a public space, and in this hybrid text, argues for the necessity of public restrooms and tree-filled parks to a city's physical and psychological landscape. This twentieth anniversary edition includes a new foreword by Robert Reid-Pharr that traces the importance and continued resonances of Samuel R. Delany's groundbreaking Times Square Red, Times Square Blue.

*Working Identity* Jun 28 2019 How Successful Career Changers Turn Fantasy into Reality Whether as a daydream or a spoken desire, nearly all of us have entertained the notion of reinventing ourselves. Feeling unfulfilled, burned out, or just plain unhappy with what we're doing, we long to make that leap into the unknown. But we also hold on, white-knuckled, to the years of time and effort we've invested in our current profession. In this powerful book, Herminia Ibarra presents a new model for career reinvention that flies in the face of everything we've learned from "career experts." While common wisdom holds that we must first know what we want to do before we can act, Ibarra argues that this advice is backward. Knowing, she says, is the

result of doing and experimenting. Career transition is not a straight path toward some predetermined identity, but a crooked journey along which we try on a host of "possible selves" we might become. Based on her in-depth research on professionals and managers in transition, Ibarra outlines an active process of career reinvention that leverages three ways of "working identity": experimenting with new professional activities, interacting in new networks of people, and making sense of what is happening to us in light of emerging possibilities. Through engrossing stories—from a literature professor turned stockbroker to an investment banker turned novelist—Ibarra reveals a set of guidelines that all successful reinventions share. She explores specific ways that hopeful career changers of any background can:

- Explore possible selves
- Craft and execute "identity experiments"
- Create "small wins" that keep momentum going
- Survive the rocky period between career identities
- Connect with role models and mentors who can ease the transition
- Make time for reflection—without missing out on windows of opportunity
- Decide when to abandon the old path in order to follow the new
- Arrange new events into a coherent story of who we are becoming.

A call to the dreamer in each of us, *Working Identity* explores the process for crafting a more fulfilling future. Where we end up may surprise us.

Multiple changes of a fundamental and complex nature, as well as related challenges in the world of work, have necessitated career counselling to undergo such an evolution. The authors examine the future nature and scope of new directions in the field of career counselling psychology and they critically reflect on, as well as promote the predominant theoretical and conceptual framework of the field of career counselling. The latest models and methods in and for the 21st century are explored and teased out, including Mark Savickas' proposal to shift the focus in interventions from conceptualising the self as content to seeing the self as a process. This approach is in keeping with the notion of career as a story and consistent with leading theories such as Jean Guichard's self-construction framework and the life design paradigm. The authors deliver an avant garde text that is easy to read and use without diluting the conceptual and terminological complexities of the field. The book is an invaluable resource for new, emerging and experienced researchers, academics, scholars, researchers, psychologists, social workers, teachers and clients: • It merges what is known about the field with emerging approaches. • It gives an overview of theoretical paradigms that can be applied to a changing world of work. • It makes a critical analysis of germane questions such as "What does the future hold for the field of career counselling and how can challenges be turned into opportunities?" and "How can different paradigms, approaches and strategies be harnessed to promote clients' career-life wellbeing and resilience?" • It facilitates an understanding of the skills necessary to deal with career-related transitions, challenges and barriers to help people acquire

transferable career-life skills and career(-choice) readiness. • It examines the importance of career adaptability and how people can develop this vital 21st century (survival) competency. • It challenges career counsellors to grasp and acquire skills to promote and advocate social justice agendas. • It promotes and demonstrates the exciting and promising notion of dialogue writing to enhance the dialogical work of the career counsellor and client. Individually and collectively, the authors team up to blend retrospect and prospect, and they make a concerted effort to convert 21st century challenges and frontiers in career counselling into opportunities, hurt into hope, hopelessness into inspiration."
