*The NICE Reboot* Dec 05 2022 Lack of confidence and fear of failure often hold women back from being entrepreneurs. In *The NICE Reboot*, Penina Rybak provides a self-help manual for today's female entrepreneurs who are looking for practical help, who need to stay current, and who want to be more tech-savvy. Entrepreneurs who are also trying to juggle work, family, personal growth, and satisfaction with their lives. This inspirational as well as practical book is for entrepreneurs who need to learn about current technological trends and how these trends affect marketing, productivity, and their success. Based on her extensive personal experience, Rybak reveals: Practical strategies to increase your business and technology IQs; The imperatives you need to fulfill to orchestrate change and make a difference for future generations; How the iPad can be used to help you forge a path to create innovative services/products. The book is filled with examples and inspiring advice from entrepreneurial thought leaders, hyperlinks to hundreds of helpful articles, and philosophical questions for you to consider. It's a blueprint of best practices to help you become a better female entrepreneur in today's start-up culture.

*Energy Density Functional Methods for Atomic Nuclei* Jun 18 2021 "Energy density functional (EDF) approaches have become over the past twenty years a powerful framework to study the structure and reactions of atomic nuclei. This book gives an updated presentation of non-relativistic and covariant energy functionals, single- and multi-reference methods, and techniques to describe small- and large-amplitude collective motion or nuclei at high excitation energy. Edited by an expert in energy density functional theory, Dr Nicolas Schunck, alongside several experts within the field, this book provides a comprehensive and informative exploration of EDF methods. Detailed derivations, practical approaches, examples and figures are used throughout the book to give a coherent narrative of topics that have hitherto rarely been covered together." -- Prové de l'éditeur.

**OGT Reading** Nov 04 2022 OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. **Encyclopedia of Life Writing** Jan 14 2021 This is the first substantial reference work in English on the various forms that constitute "life writing." As this term suggests, the Encyclopedia explores not only autobiography and biography proper, but also letters, diaries, memoirs, family histories, case histories, and other ways in which individual lives have been recorded and structured. It includes entries on genres and subgenres, national and regional traditions from around the world, and important auto-biographical writers, as well as articles on related areas such as oral history, anthropology, testimonies, and the representation of life stories in non-verbal art forms.

**Ender's Game and Philosophy** Feb 12 2021 Ender's Game, Orson Scott Card's award-winning 1985 novel, has been discovered and rediscovered by generations of science fiction fans and young adult readers, banned and challenged in schools, assigned in high school English classes, and adopted as reading by the US Marine Corps. Ender's Game and its sequels explore rich themes—the violence and cruelty of children, the role of empathy in war, and the balance of individual dignity and the social good—with compelling elements of a coming-of-age story and exciting and immersive battle scenes. Ender's Game and Philosophy brings together over thirty philosophers to engage in wide-ranging discussion on the troubling, exciting, and fascinating issues raised in and amidst the excitement and fear of Orson Scott Card's novels and Gavin Hood's film. Authors address issues such as: the justifiability of pre-emptive strikes, how Ender's disconnected and dispassionate violence is mirrored in today's drone warfare, whether the end of saving the species can justify the most brutal means, the justifiability of lies and deception in wartimes, how military schools produce training in virtue, how Ender as the "good student" is held to a different educational standard, which rules can be broken in games and which cannot, Ender's world as a mirror of our own surveillance society, the moral hazards of child warriors, the value of Ender's ability to sympathize with his enemies, the meaning of a "hive-mind," the limits of our ability to relate to one, the relationship between Ender's story and Card's Mormonism. The authors of Ender's Game and Philosophy challenge readers to confront and work through the conceptual and emotional challenges that Ender's Game presents, bringing a new light on the idea of a just war, the virtues of the soldier, the nature of childhood, the social value and moral corruption of lies and deception, the practices of education and of leadership, and the serious work of playing games.

**Introduction to Aircraft Structural Analysis** Oct 03 2022 Introduction to Aircraft Structural Analysis is an essential resource for learning aircraft structural analysis. Based on the author's best-selling book Aircraft Structures for Engineering Students, this brief text introduces the reader to the basics of structural analysis as applied to aircraft structures. Coverage of elasticity, energy methods and virtual work sets the stage for discussions of airworthiness/airframe loads and stress analysis of aircraft components. Numerous worked examples, illustrations, and sample problems show how to apply the concepts to realistic situations. The book covers the core concepts in about 200 fewer pages by removing some optional topics like structural vibrations and aero elasticity. It consists of 23 chapters covering a variety of topics from basic elasticity to torsion of solid sections; energy methods; matrix methods; bending of thin plates; structural components of aircraft; airworthiness; airframe loads; bending of open, closed, and thin walled beams; combined open and closed section beams; wing spars and box beams; and fuselage frames and wing ribs. This book will appeal to undergraduate and

postgraduate students of aerospace and aeronautical engineering, as well as professional development and training courses. Based on the author's best-selling text *Aircraft Structures for Engineering Students*, this Intro version covers the core concepts in about 200 fewer pages by removing some optional topics like structural vibrations and aeroelasticity. Systematic step by step procedures in the worked examples. Self-contained, with complete derivations for key equations.

**Energy Transitions: Global and National Perspectives, 2nd Edition** Jan 02 2020 This book provides a detailed, global examination of energy transitions, supplying a long-term historical perspective, an up-to-date assessment of recent and near-term advances in energy production technology and implementation, and an explanation of why efforts to limit global warming and to shift away from fossil fuels have been gradual. • Presents historical coverage of energy production, energy use, and key technical and economic factors that affect the currently unfolding transitions • Offers insightful analysis of energy transitions on both the national and global scale to explain the possibilities and limitations of the process • Supplies a critical appraisal of new renewable conversions that makes clear their advantages and potential benefits as well as their inherent unavoidable limitations • Enables general readers to gain an in-depth understanding of energy transitions from the perspective of an acclaimed scientist with expertise in the fields of energy, environmental and population change, technical innovation, and public policy

**Digital Color Imaging** Sep 02 2022 This collective work identifies the latest developments in the field of the automatic processing and analysis of digital color images. For researchers and students, it represents a critical state of the art on the scientific issues raised by the various steps constituting the chain of color image processing. It covers a wide range of topics related to computational color imaging, including color filtering and segmentation, color texture characterization, color invariant for object recognition, color and motion analysis, as well as color image and video indexing and retrieval. Contents 1. Color Representation and Processing in Polar Color Spaces. Jesús Angulo, Sébastien Lefèvre and Olivier Lezoray. 2. Adaptive Median Color Filtering. Frédérique Robert-Inacio and Eric Dinet. 3. Anisotropic Diffusion PDEs for Regularization of Multichannel Images: Formalisms and Applications, David Tschumperlé. 4. Linear Prediction in Spaces with Separate Achromatic and Chromatic Information. Olivier Alata, Imtihan Qazi, Jean-Christophe Burie and Christine Fernandez-Maloigne. 5. Region Segmentation, Alain Clément, Laurent Busin, Olivier Lezoray and Ludovic Macaire. 6. Color Texture Attributes, Nicolas Vandenbroucke, Olivier Alata, Christèle Lecomte, Alice Porebski and Imtihan Qazi. 7. Photometric Color Invariants for Object Recognition, Damien Muselet. 8. Color Key Point Detectors and Local Color Descriptors, Damien Muselet and Xiaohu Song. 9. Motion Estimation in Color Image Sequences, Bertrand Augereau and Jenny Benois-Pineau.

*Ending Terrorism in Italy* Feb 01 2020 Ending Terrorism in Italy analyses processes of disengagement from terrorism, as well as the connected issues of reconciliation, truth and justice. It examines in a critical and original way how terrorism came to an end in Italy (Part I), and the legacy it has left behind (Part II). The book interrogates a wide array of published memoirs and a considerable number of new face-to-face interviews with both former terrorists and first and second generation victims. In the last two decades, and especially in recent years, former extreme-right terrorists in Italy have started to talk about their past involvement in terrorist violence, including, for the first time, acts of violence which have for decades been considered taboo, that is to say, bomb attacks against innocent civilians. These narratives add to the perspectives offered by members of left-wing terrorist groups, such as the Red Brigades and Prima Linea. Surprisingly, these narratives have not been systematically examined, yet they form a unique and extremely rich source of first-hand testimony, providing invaluable insights into processes of youth radicalization and de-radicalization, the social re-integration of ex-terrorists, as well as personal and collective healing. Even less attention has been paid to the victims' narratives or stories. Indeed, the views and activities of the victims and their associations have been seriously neglected in the scholarly literature on terrorism, not just in Italy, but elsewhere in Europe. The book therefore examines the perspectives of the victims and relatives of victims of terrorism, who over the years have formed dedicated associations and campaigned relentlessly to obtain justice through the courts, with little or no support from the state and, especially in the case of the bombing massacres, with increasing awareness that the state played a role in thwarting the course of justice. Ending Terrorism in Italy will be of interest to historians, social scientists and policy makers as well as students of political violence and post-conflict resolution. .

**Energetic Materials at Extreme Conditions** Apr 04 2020 David I.A. Millar's thesis explores the effects of extreme conditions on energetic materials. His study identifies and

structurally characterises new polymorphs obtained at high pressures and/or temperatures. The performance of energetic materials (pyrotechnics, propellants and explosives) can depend on a number of factors including sensitivity to detonation, detonation velocity, and chemical and thermal stability. Polymorphism and solid-state phase transitions may therefore have significant consequences for the performance and safety of energetic materials. In order to model the behaviour of these important materials effectively under operational conditions it is essential to obtain detailed structural information at a range of temperatures and pressures.

**Endgame, Volume 1** Jul 08 2020 The long-awaited companion piece to Derrick Jensen's immensely popular and highly acclaimed works *A Language Older Than Words* and *The Culture of Make Believe*. Accepting the increasingly widespread belief that industrialized culture inevitably erodes the natural world, *Endgame* sets out to explore how this relationship impels us towards a revolutionary and as-yet undiscovered shift in strategy. Building on a series of simple but increasingly provocative premises, Jensen leaves us hoping for what may be inevitable: a return to agrarian communal life via the disintegration of civilization itself.

**Deadly Duet** Aug 21 2021 Deadly Duet, 1 Caleb Cassell always gets what he wants. Starting out as a fighter, Caleb and his friend, Henry, have fought their way to the top.

They've left a trail of bodies behind them and forged a life out of violence and illegal dealings. They control girls, guns, drugs, and are not afraid of taking out anyone who threatens their business. When Caleb first sees Donna working in the jewelry store, he knows he wants her. Donna's latest customer scares and excites her. She tries to fight off his advances but all too soon she gives in. One date turns into a second, and before she knows what's happening they're together. When the truth of who he is comes out, can Donna find it in her heart to remain with him? Who could love a crime boss that everyone fears? The Scarred One Deadly Duet, 2 Henry is the scarred one of the deadly duet. Everyone fears him, avoids him, and he takes his pleasures out on the whores he controls. He does whatever it takes to get the job done, even kill a woman's boyfriend in front of her. Lydia knows there is more to Henry than meets the eye but she will not be the one to find out the truth. She wants nothing to do with him or the world he's involved in. When they are kidnapped, she has to put her faith in him to get them out. Witnessing the damage done to Lydia, Henry promises to kill everyone responsible. With no other choice, Lydia sees the real man within him. She can no longer walk away as she has fallen in love with the scarred one. What will she do when his need for vengeance puts her at risk once again?

*End of the Alphabet* Dec 01 2019 Having a dream and aiming for it . . . a gentle coming-of-age novel for girls by much-loved YA novelist Fleur Beale. Ruby Yarrow is a 14 year old who lives in a busy, loving, chaotic family with her mum, stepdad, brother and two little stepbrothers. Ruby feels a bit like a doormat - she has to help out while her brother doesn't. He wins lots of prizes at school but she has a learning difficulty and needs a reader/writer to help her in exams. What's more, her surname, Yarrow, is at the end of the alphabet and when the roll gets called out she's always at the end . She hates it. She feels she's always at the end of the line. Not that Ruby is a misery bag at all. She's bright, vibrant and a really neat character. She has great friends and loves clothes, fashion magazines and sewing, which she has a real knack for. She's very keen to go on the school trip to Brazil and so she gets a job to earn the money for her airfare, working in a supermarket for an old grump. She also learns a bit of Portuguese and meeting exchange students. Ruby doesn't get to go on the trip but she stands up to her parents, gets some backbone and starts to see herself in a much better light. There's even a bit of romance. This book is about having a dream and aiming for it. But it's not sentimental - it's a great read, very real and it has a lovely upbeat tone.

**Optical Character Recognition** Jan 06 2023 Optical character recognition (OCR) is the most prominent and successful example of pattern recognition to date. There are thousands of research papers and dozens of OCR products. Optical Character Recognition: An Illustrated Guide to the Frontier offers a perspective on the performance of current OCR systems by illustrating and explaining actual OCR errors. The pictures and analysis provide insight into the strengths and weaknesses of current OCR systems, and a road map to future progress. Optical Character Recognition: An Illustrated Guide to the Frontier will pique the interest of users and developers of OCR products and desktop scanners, as well as teachers and students of pattern recognition, artificial intelligence, and information retrieval. The first chapter compares the character recognition abilities of humans and computers. The next four chapters present 280 illustrated examples of recognition errors, in a taxonomy consisting of Imaging Defects, Similar Symbols, Punctuation, and Typography. These examples were drawn from large-scale tests conducted by the authors. The final chapter discusses possible approaches for improving the accuracy of today's systems, and is followed by an annotated bibliography. Optical Character Recognition: An Illustrated Guide to the Frontier is suitable as a secondary text for a graduate level course on pattern recognition, artificial intelligence, and information retrieval, and as a reference for researchers and practitioners in

industry.

Ornamentation in Baroque and Post-Baroque Music, with Special Emphasis on J.S. Bach Mar 28 2022 Ornaments play an enormous role in the music of the seventeenth and eighteenth centuries, and ambiguities in their notation (as well as their frequent omission in the score) have left doubt as to how composers intended them to be interpreted. Frederick Neumann, himself a violinist and conductor, questions the validity of the rigid principles applied to their performance. In this controversial work, available for the first time in paperback, he argues that strict constraints are inconsistent with the freedom enjoyed by musicians of the period. The author takes an entirely new look at ornamentation, and particularly that of J. S. Bach. He draws on extensive research in England, France, Germany, Italy, and the United States to show that prevailing

interpretations are based on inadequate evidence. These restrictive interpretations have been far-reaching in their effect on style. By questioning them, this work continues to stimulate a reorientation in our understanding of Baroque and post-Baroque music.

**Ending Wars** Aug 09 2020 Many books have been written about war, but few have focused on how wars can be brought to an end. Wars are rarely inevitable however and this book is aimed at understanding how violent conflicts can be brought to a close through intervention, mediation and political negotiation. The simple premise underlying the book is that wars between states and wars within states are generally fought by rational people for particular political goals or perceived interests. War is better understood as a methodology rather than an ideology. When the context, issues and actors in these armed conflicts change then it is often possible to control, or even transform such violence. By bringing together a number of existing debates from peace and conflict research as well as scholars of international relations, the book examines the dynamic forces that lie behind the ending of wars and how these have changed over time. Examples are drawn from a wide range of armed conflicts to analyse the efforts that have been made to move from War-War to Jaw-Jaw, or more typically Jaw-War. Efforts at third-party intervention, mediation and political negotiation across a range of conflict zones from Europe to Sub-Saharan Africa are discussed in full. Neither idealistic nor fatalistic, this book is a must-read for all students of international politics and security studies.

**End Back Pain Forever** Sep 29 2019 By the director of Muscle Pain Research at NYU School of Medicine, a revolutionary book about solving back pain without surgery and drugs.

**Enemy at the Water Cooler** Jun 06 2020 The book covers a decade of work with some of the largest commercial and government agencies around the world in addressing cyber security related to malicious insiders (trusted employees, contractors, and partners). It explores organized crime, terrorist threats, and hackers. It addresses the steps organizations must take to address insider threats at a people, process, and technology level. Today's headlines are littered with news of identity thieves, organized cyber criminals, corporate espionage, nation-state threats, and terrorists. They represent the next wave of security threats but still possess nowhere near the devastating potential of the most insidious threat: the insider. This is not the bored 16-year-old hacker. We are talking about insiders like you and me, trusted employees with access to information - consultants, contractors, partners, visitors, vendors, and cleaning crews. Anyone in an organization's building or networks that possesses some level of trust. \* Full coverage of this hot topic for virtually every global 5000 organization, government agency, and individual interested in security. \* Brian Contos is the Chief Security Officer for one of the most well known, profitable and respected security software companies in the U.S.—ArcSight.
