China and International Adjudication Jun 28 2022 China will eine "Führungsation" im Völkerrecht werden. Dieses Buch zeigt mit einer ersten umfassenden Analyse von Fallrecht und chinesischen akademischen Debatten von 2002 bis 2018, dass die verstärkte Nutzung von internationalen Gerichten Teil eines breiten Unterfangens ist, Chinas wirtschaftliche und politische Erfolge zu konsolidieren, und erneut Großmachtstatus zu erlangen. Handels- und Investmentrecht, Seerecht und territoriale Fragen werden abgedeckt – auch zum Südchinesischen Meer – und ein jahrzehntelanger Prozess zwischen Vorsicht und Ambition nachgezeichnet. Diskussionsmuster und tatsächliches Engagement Chinas in allen Rechtsbereichen zeigen bemerkenswerte Gemeinsamkeiten, lediglich die Zeitpläne sind unterschiedlich.

An IUCN situation analysis of terrestrial and freshwater fauna in West and Central Africa Dec 03 2022 This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa. It draws on a wide range of information to provide information on the status of these species, important sites, pressures, legislation, the effectiveness of protected areas, and both community-based incentives for conservation and institutional responses. The overriding conclusion is of substantial wildlife declines and inadequate responses to either long-standing pressures or rapidly escalating threats that have emerged in recent years.

The Oxford Handbook of International Climate Change Law May 28 2022 "Climate change presents one of the greatest challenges of our time, and has become one of the defining issues of the twenty-first century. The radical changes which both developed and developing countries will need to make, in economic and in legal terms, to respond to climate change are unprecedented. International law, including treaty regimes, institutions, and customary international law, needs to address the myriad challenges and consequences of climate change, including variations in the weather patterns, sea level rise, and the resulting migration of peoples. ... This book addresses the major legal dimensions of the problems caused by climate change: including questions ranging from how to implement international legal frameworks at the national level, to how carbon trading systems can be used as a means of reducing the costs of meeting emission reduction targets."--Book jacket.

The Cadaver King and the Country Dentist Apr 26 2022 A shocking and deeply reported account of the persistent plague of institutional racism and junk forensic science in our criminal justice system, and its devastating effect on innocent lives After two three-year-old girls were raped and murdered in rural Mississippi, law enforcement pursued and convicted two innocent men: Kennedy Brewer and Levon Brooks. Together they spent a combined thirty years in prison before finally being exonerated in 2008. Meanwhile, the real killer remained free. The Cadaver King and the Country Dentist recounts the story of how the criminal justice system allowed this to happen, and of how two men, Dr. Steven Hayne and Dr. Michael West, built successful careers on the back of that structure. For nearly two decades, Hayne, a medical examiner, performed the vast majority of Mississippi's autopsies, while his friend Dr. West, a local dentist, pitched himself as a forensic jack-of-all-trades. Together they became the go-to experts for prosecutors and helped put countless Mississippians in prison. But then some of those convictions began to fall apart. Here, Radley Balko and Tucker Carrington tell the haunting story of how the courts and Mississippi's death investigation system -- a relic of the Jim Crow era -- failed to deliver justice for its citizens. The authors argue that bad forensics, structural racism, and institutional failures are at fault, raising sobering questions about our ability and willingness to address these crucial issues.

PCAOB Standards and Related Rules Oct 09 2020 Pursuant to PCAOB Release No. 2017-001, The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion and Related Amendments to PCAOB Standards, dated June 1, 2017, the PCAOB adopted a new auditor reporting standard and related amendments that will require the auditor to provide new information about the audit and make the auditor's report more informative and relevant to investors and other financial statement users. The standard and related amendments were subsequently approved by the SEC on October 23, 2017, and are effective as of audits of fiscal years ending on or after December 15, 2017 (except for the "Critical Audit Matters" section of the standard and related amendments, which have a phased effective date). This 2018 edition of the AICPA's PCAOB Standards and Related Rules includes the newly approved standard The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion (AS 3101). In addition, this title also features updated staff guidance, included a new question and answers section, updated guidance for firms filing the new Form AP, and a new Staff Audit Practice Alert to assist auditors in applying PCAOB standards when auditing companies' implementation of the new FASB revenue accounting standard.

The Politics of War Memory in Japan Oct 21 2021 Since the 1990s, questions of Japanese wartime conduct, apologies for aggression, and compensation to former victims of the country's imperial policies, have been brought to the fore of national and regional politics. The state is undoubtedly the most important actor in the process of memory production and along with conservative legislators and the grass-root revisionist movement there has been a consistent trend towards denying or undermining the existing acknowledgments of responsibility for Japan's wartime past. However, to fully comprehend war memory in Japan, due attention must be paid to competing discourses that demand an alternative view, and only then can the complexity of Japanese war memory and attitudes towards the legacies of the Asia-Pacific war be understood. The Politics of War Memory in Japan examines the involvement of five civil society actors in the struggle over remembering and addressing the wartime past in Japan today. In studying progressive war memory activists, it quickly becomes clear that the apologia by conservative politicians cannot be treated as representative of the opinion of the majority of the Japanese public. Indeed, this book seeks to remedy the disparity between studies devoted to the official level of addressing the 'history issue' and the grass-root historical revisionist movement on the one side, and progressive activism on the other. Furthermore, it contributes to scholarly debates on the state of civil society in Japan, challenging the characterisation of Japanese civil society as a depoliticised space by demonstrating a more contentious side of civil society activism. Drawing important new empirical research, this book will be of huge interest to students and scholars of Japanese civil society, Japanese politics, Japanese history and memory in Japan.

Procedural Requirements for Administrative Limits to Property Rights Jan 04 2023 Through a comparative survey spanning twelve legal systems and a transnational regime, the fourth volume in this series aims to shed light on the core of administrative activity that exemplifies the 'negative State'. Within the vast field of adjudication, the book addresses one of the most traditional sets of procedures, namely, the exercise of public powers affecting property rights. Following the method adopted in the CoCEAL project, this volume takes the fundamentals of expropriation in a given legal order as its starting point and examines various cases. The main requirements for property rights deprivations and restrictions are presented through national reports and discussed through hypotheticals, while the comparative analysis focuses on procedural propriety and fairness. This book is divided into three parts. The first part introduces the project and the topic. The second part covers the legal systems chosen for this study. The third goes on to present a synchronic comparison across systems, highlighting the relationship between shared and distinctive traits, with a view to the way supranational and international rules increasingly supplement municipal regimes. The concluding chapter discusses the current regime on public regulation of property in contemporary administrative systems.

Minerals Yearbook 2013 Mar 02 2020 This edition of the U.S. Geological Survey (USGS) Minerals Yearbook discusses the performance of the worldwide minerals and materials industries during year 2013 and provides background information to assist in interpreting that performance. These annual reviews are designed to provide timely statistical data on mineral commodities in various countries. This volume covers data from Asia and the Pacific. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook. Audience: Government employees and contractors, as well as businesses and employees, all working in mineral-related trades, especially with interests in statistics about mineral commodities overseas, will find this resource invaluable. Constitutional Law in France Oct 01 2022 Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in France provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in France will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

Cultural Heritage Nov 02 2022 Cultural Heritage is a systematic, interdisciplinary examination of cultural heritage, which provides an up-to-date view of the field by drawing on various disciplines. The book offers a thorough, structured review of extant literature on heritage in tourism and pertinent challenges for cultural heritage. This book offers new ways of looking at cultural heritage assets against a backdrop of increasing economic and environmental pressures. It comprises a number of sections that each examine cultural heritage from the perspective of ethics and values, community relations and development, cultural entrepreneurship, economic viability and conservation, methodologies, impacts of tourism research, consumption, and urban and immaterial heritage. Encompassing global research perspectives from public management, visual culture, environmental management, and cultural entrepreneurship, Cultural Heritage is a crucial text for those working or interested in the heritage field.

White Collar Crime Dec 11 2020 White collar crime has expanded significantly over the course of the past two decades. Yet, not only as the amount of national and international legislation in the field grown, but

it has also endured changes driving it away from the classic criminal law. These trends have been reflected in changes to national legislation, not infrequently prompted by supranational law, for example, in the financial or the environmental sector. New punishing regimes have emerged, such as UN blacklisting, smart sanctions, civil asset forfeiture, financial supervisory powers, compliance law, and anti-money laundering laws. Furthermore, the role of administrative sanctioning law has been growing as well as the role of private actors in the enforcement of punitive sanctions. The aim of this volume is to examine how various national criminal justice systems across Europe deal with the aforementioned challenges. In the first part, it takes a closer look at the following national systems: France, Germany, Poland and Sweden. Furthermore, it compares the European approach with the American one as a source of inspiration for unresolved difficulties and future developments. Further still, the authors explore those challenging issues regarding the field of economic and financial crime, including the Senior Managers Regime, corporate criminal liability, and whistle-blowers' protection. Timely and pertinent, this is an important new work in a fast-moving field.

Inequality, Inclusive Growth, and Fiscal Policy in Asia Aug 26 2019 Developing Asia's sustained rapid growth has improved general living standards and lifted hundreds of millions of Asians out of poverty within a generation. Yet the region now finds itself confronting rising inequality. Countries where inequality has worsened over the past 2 decades collectively account for over 80% of Asia's population. As a result, governments across the region have begun to accord a higher priority to promoting more inclusive growth. The international experience, especially the experience of the advanced economies, suggests that fiscal policy can make a potent contribution to reducing inequality. This book systematically explores the relationship between both sides of fiscal policy—public spending as well as taxes and other fiscal revenues—and inequality in Asia at great depths. On the basis of the analysis, the book sets forth a number of concrete options for rendering fiscal policy a more effective tool for more inclusive growth that benefits all Asians. Inequality, Inclusive Growth, and Fiscal Policy in Asia is written in response to an issue of growing demand in most Asian countries, and it comes at a time when Asian governments are also beginning to use fiscal policy to bridge the glaring disparities between the rich and the poor of the region. As such, the book will be a highly valuable reference for researchers, policy makers, and students as well.

Optimizing the Self Jul 18 2021 This book provides an analysis of the social representations of leading self-help genres, including neurolinguistic programming, cognitive self-help therapy, mindfulness, self-management, self-esteem, self-leadership and self-control. Exploring the globalised therapeutic culture of today, the book argues that psychology as 'science' is often abandoned to aid the individual pursuit for self-realization and self-optimization. Opposing the view that self-help culture is external to psychology, Madsen argues that it is firmly embedded within psychology, playing an important role in people's lives. Each chapter traces and critically interprets a range of self-help philosophies and techniques, examining the claims of self-help literature to represent the most innovative psychological, medical or neurobiological research. Discussing each genre in turn, chapters examine key research alongside self-help literature to explore the effectiveness and impact of leading self-help genres in various social contexts and environments. The book offers a contemporary critical overview of issues concerning self-help, combining critical psychology with the theory of social representation to provide a broad perspective on self-help as a valid psychology. *Optimizing the Self* will be of interest to academics, researchers and postgraduate students in the fields of social representation, critical and cultural psychology and theory, clinical psychology, and the sociology of culture and science. The book will also be of use to critical and cultural psychologists and theorists, as well as clinical psychologists.

Capacity Mechanisms in the EU Energy Market Oct 28 2019 Ensuring an adequate, long-term energy supply is a paramount concern in Europe. EU member states now intervene by encouraging investment in generation capacity, offering an additional revenue stream for conventional power plants in addition to the existing, heavily subsidised investments in renewable energy sources. These capacity remuneration mechanisms (or simply capacity mechanisms) have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected, so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra-national coordination and no consideration for their cross-border impact, they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in-depth analysis of capacity mechanisms, written by an expert team of policy-makers, economists, and legal professionals. It will be a first point of reference for regulators and policy-makers responsible for designing optimal capacity mechanisms in Europe, and will be an invaluable resource for academics and practitioners in the fields of energy, regulation, and competition.--

Corruption and Fraud in Investment Arbitration Dec 23 2021 This book offers an exciting overview of how the investor-state dispute settlement mechanism currently deals with allegations and/or evidence of fraud and corruption. It provides a detailed analysis of the legal framework under which arbitral tribunals usually operate in investment disputes involving allegations of illegality. Readers will find step-by-step examinations of the corruption and fraud arguments employed by arbitral tribunals in ten landmark ISDS cases, followed by a chapter summarizing the status quo on the topic. The final part of the book discusses the identified challenges of addressing illegality issues in investment arbitration and potential solutions, including the creation of a multilateral investment court.

Investment Treaty Law and Climate Change Jan 30 2020 The book deals with the question whether the investment treaty law system could be harmonized with the climate change international legal framework and the climate interest that lies beyond. The answer to this research question is divided into three parts. The first examines the relevance of the climate change international legal framework in investment treaty disputes as a natural pre(logical)interpretative stage. The second focuses on the BIT's content-interpretation, which is the orthodox approach to solve the fragmentation between the system of investment treaty law and the system of international climate change law. Finally, the third part tackles this fragmentation through a heterodox approach that is grounded in the direct application of climate change principles through law ascertainment. Apart from concluding that harmonization between investment treaty law and international climate change law is possible through the orthodox approach to the expropriation and the FET standards, as well as through the direct application of the climate change precautionary principle and the CDBRR principle ? heterodox approach, the book suggests that tribunals are expected soon to openly address climate change disputes in their rulings.

Inclusive Education in China Sep 19 2021 By adopting a comparative approach, this book investigates the philosophy, policy, practices, and challenges of inclusive education in the Chinese contexts, recognizing influences of Chinese culture, such as Confucianism, collectivism, and familism. In the 1980s, the Chinese government promoted a policy named "Learning in Regular Classroom" to ensure educational rights for children with disabilities, which subsequently turned into an inclusive education program in the western sense. Starting from this point, the policy and practice of inclusive education have developed tremendously. To facilitate reflection and future development, this is the latest and most comprehensive attempt at understanding the status quo of inclusive education in China from a variety of perspectives: from early childhood to higher education, from family to schools and communities, from peers to teachers and parents. It also analyzed the unique Chinese philosophy of inclusive education, adding to current debates with a Chinese lens. This book will appeal to academics, students, and practitioners in disciplines such as education, early childhood studies, sociology, social work, social policy, disability studies, and youth studies.

Intelligence Elites and Public Accountability May 04 2020 This book provides a definitive overview of the relationships of influence between civil society and intelligence elites. The secrecy surrounding intelligence means that publication of intelligence is highly restricted, barring occasional whistle-blowing and sanitised official leaks. These characteristics mean that intelligence, if publicised, can be highly manipulated by intelligence elites, while civil society's ability to assess and verify claims is compromised by absence of independent evidence. There are few studies on the relationship between civil society and intelligence elites, which makes it hard to form robust assessments or practical recommendations regarding public oversight of intelligence elites. Addressing that lacuna, this book analyses two case studies of global political significance. The intelligence practices they focus on (contemporary mass surveillance and Bush-era torture-intelligence policies) have been presented as vital in fighting the 'Global War on Terror', enmeshing governments of scores of nation-states, while challenging internationally established human rights to privacy and to freedom from torture and enforced disappearance. The book aims to synthesise what is known on relationships of influence between civil society and intelligence elites. It moves away from disciplinary silos, to make original recommendations for how a variety of academic disciplines most likely to study the relationship between civil society and intelligence elites (international relations, history, journalism and media) could productively cross-fertilise. Finally, it aims to create a practical benchmark to enable civil society to better hold intelligence elites publicly accountable. This book will be of great interest to students of intelligence studies, surveillance, media, journalism, civil society, democracy and IR in general.

Central Bank Balance Sheet and Real Business Cycles Jan 24 2022 *Central Bank Balance Sheet and Real Business Cycles* argues that a deeper comprehension of changes to the central bank balance sheet can lead to more effective policymaking. Any transaction engaged in by the central bank—issuing currency, conducting foreign exchange operations, investing its own funds, intervening to provide emergency liquidity assistance and carrying out monetary policy operations—influences its balance sheet. Despite this, many central banks throughout the world have largely ignored balance sheet movements, and have instead focused on implementing interest rates. In this book, Mustapha Abiodun Akinkunmi highlights the challenges and controversies faced by central banks in the past and present when implementing policies, and analyzes the links between these policies, the central bank balance sheet, and the consequences to economies as a whole. He argues that the composition and evolution of the central bank balance sheet provides a valuable basis for understanding the needs of an economy, and is an important tool in developing strategies that would most effectively achieve policy goals. This book is an important resource for anyone interested in monetary policy or whose work is affected by the actions of the policies of central banks.

Comparative Company Law Dec 31 2019 *Comparative Company Law* provides a systematic and coherent exposition of company law across jurisdictions, augmented by extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.
