Overseas Basing of U.S. Military Forces Sep 13 2020 This independent assessment is a comprehensive study of the strategic benefits, risks, and costs of U.S. military presence overseas. The report provides policymakers a way to evaluate the range of strategic benefits and costs that follow from revising the U.S. overseas military presence by characterizing how this presence contributes to assurance, deterrence, responsiveness, and security cooperation goals.

Air University Style and Author Guide Jan 18 2021 The faculty, staff and students of Air University will find that this Guide is designed to unify their writing stylistically and to give them information about publishing with AU Press. Rapid expansion in the field of electronic media - especially the internet - has made AU research and writing increasingly accessible. Bases on recognized but forward-looking principles of standard English usage, this Guide provides reliable guidance on such matters as punctuation, capitalization, abbreviation, documentation, numbers, spelling, and much more.

[Defense Transportation: Algorithms, Models and Applications for the 21st Century](#) Sep 25 2021 This book contains papers divided into three general sections according to the title of this text: algorithms, models, and applications. The first section on algorithms contains papers that are theoretical in nature or contain new techniques that relate to Defense Transportation System (DTS) processes. A sampling of the papers contained in this section deals with group theoretic "tabu" search techniques, shortest path sailing distance algorithms, and strategic airlift model validation methods. The second section contains papers on various transportation models used throughout the DoD and transportation industry, as well as some newly developed transportation modelling methods that may eventually find their way into larger scale transportation models. A review of the major strategic mobility models is also contained in this section. The

third section contains papers on various transportation applications that have been used to support various DTS studies and analyses. This section also contains a diverse set of topics, with articles ranging from a paper on North Atlantic Treaty Organization (NATO) strategic lift requirements to an analysis paper on theater reception, staging, onward movement, and integration. · Preface by General John W. Handy, Commander, United States Transportation Command · Focus on land, sea, and air transportation models and methods · Manuscripts written by analysts and researchers active in the field and directly supporting the United States Defense Transportation System · Research methods were instrumental in defining the in-place DTS that so efficiently deployed forces for Operation Enduring Freedom and Operation Iraqi Freedom

The Tongue and Quill Nov 15 2020 The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

AFROTC - Field Training Manual Jul 04 2022 Welcome to Field Training Preparation. This Field Training Manual (FTM) is yours to keep, and you must take it with you to Field Training (FT). Everything you need to know to prepare for the in-garrison portion of FT is included within this FTM as well as the Airman's Manual (AFPAM 10-100). Although you will be provided additional instructions upon deployment to Camp Shelby Joint Forces Training Center (CSJFTC), you will be responsible for the content of this manual for the entire duration of FT. You may write in, highlight, tab, or underline this manual as desired. Ensure you have a thorough understanding of this material prior to departing for your Field Training Unit (FTU); you will be held accountable upon arrival. Field Training is a mandatory program for all individuals qualified to pursue an Air Force commission through AFROTC. The program is designed to evaluate military leadership and discipline, determine your potential for entry into the professional officer corps, and stratify you among your peers. FT is conceived as a mock Air Expeditionary Force (AEF) deployment, and is therefore designed in line with the Airman's Manual (provided to you hard copy by your detachment and online at <http://www.e-publishing.af.mil/shared/media/epubs/AFPAM10-100.pdf>). For this reason, all cadets attending FT will be required to demonstrate familiarity with any and all sections of the Airman's Manual at any point during the FT experience. Please reference Attachment 1, FTU Training Phases by Training Day, for the sections of the Airman's Manual cadets will most likely utilize during particular phases of FT. Keep in mind that this is not a hard-and-fast agenda, FTU staff may adjust the timeline when required or when deemed prudent and necessary for the attainment of FT goals. The sections and/or paragraphs of this FTM are identified by three different levels of understanding- Knowledge, Familiarization and Information. Knowledge: These sections will be indicated by a (k). You will memorize and demonstrate proficiency in these areas and will be required to take a closed-book test on the information. Familiarization: These will be indicated by an (f). You will not be required to memorize the information, but will be held accountable for finding the information when necessary. Information: These sections will be indicated by an (i). These areas are for informational purposes only, you will not be required to memorize the information and will not be tested on it. Your detachment staff will provide you with orders, tickets, uniforms and other items, which you are required to take to FT. You'll need to keep two copies of your orders with you at all times. Before you depart, provide your family with a copy of your orders, scheduled departure times and return times, and the FTU address and phone number (annotated within this document). You MUST show up to field training with all required items and proper documentation. If you fail to adhere to these guidelines, you risk being disqualified from FT. Advise your family that if an emergency should arise, the best way to contact you is through the detachment for general information or the American Red Cross. This method is usually faster than a telegram or personal phone call and will provide official verification of the emergency. If you have a pending family/personal issue that may become an emergency while you are at field training, you MUST let your detachment personnel and field training cadre know as soon as possible. Also, it is extremely important that prior to departing for FT, you verify and update your emergency data (name and address of next of kin) with your detachment personnel. Cadets are not permitted to have visitors while at field training. Advise both family and friends they will not be allowed to visit with you while assigned to the FTU.

The Stryker Brigade Combat Team Apr 20 2021 Examines alternative means to decrease the deployment time for the new Army medium-weight brigade, comparing air and sealift from the United States with air and fast (but short-range) sealift from forward bases or preposition sites. Historical experience and an assessment of U.S. regional interests are used to determine how much warning time the United States typically has before major force deployments and where it is most likely to deploy such forces

Airman's Manual Nov 08 2022 This manual applies to Air Force active duty, Air Force Reserve, Air National Guard, emergency essential civilians and contract personnel. This manual contains the latest changed approved by the Air Force effective JUNE 24, 2011. It compiles existing war skill tactics, techniques, and procedures from many sources into a pocket-sized, quick reference guide. This manual implements AFPD 10-25, Emergency Management, and incorporates provisions of various International Agreements and Conventions, US Codes, DOD Directives, Chairman of the Joint Chiefs of Staff Command Instructions, Uniform Code of Military Justice, Air Force Instructions, Manuals, Pamphlets, Visual Aids and Handbooks: AF Occupational Safety and Health Standards, Technical Orders, Guides, and Concepts of Operation. As an expeditionary Airman you must stay ready to deploy anywhere in the world on short notice. This manual doesn't contain everything you must know. It doesn't focus on the integrated joint or multinational nature of combat operations. It doesn't replace regulations or local procedures you'll need to follow. This manual does, however, cover basic warfighting skills and points of knowledge with the intent to help you successfully complete the mission. The tasks outlined in this manual apply at both deployed and home station locations. Keep the Airman's Manual close to you; use it while training and exercising for contingencies and deployments. Refer to it often... you'll need it. Fly, Fight, and Win! AFPAM 10-100.

Professional Development Guide - Air Force Pamphlet 36-2241 May 10 2020 This pamphlet implements AFPD 36-22, Air Force Military Training, and AFI 36-2642, Professional Advancement and Continuous Education. Information in this guide is taken primarily from Air Force publications and based on knowledge requirements from the Military Knowledge and Testing System (MKTS) as determined by the MKTS Advisory Council of the Chief Master Sergeant of the Air Force (CMSAF) and major command (MAJCOM) command chief master sergeants (CCM). Attachment 1 contains references and supporting information used in this publication. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force. This guide is the sole source reference material for the Promotion Fitness Examination (PFE) and United States Air Force Supervisory Examination (USAFSE).

The War Within Jul 12 2020 The increase in suicides among military personnel has raised concern. This book reviews suicide epidemiology in the military,

catalogs military suicide-prevention activities, and recommends relevant best practices.

Dynamic Stochastic Optimization Jul 24 2021 Uncertainties and changes are pervasive characteristics of modern systems involving interactions between humans, economics, nature and technology. These systems are often too complex to allow for precise evaluations and, as a result, the lack of proper management (control) may create significant risks. In order to develop robust strategies we need approaches which explicitly deal with uncertainties, risks and changing conditions. One rather general approach is to characterize (explicitly or implicitly) uncertainties by objective or subjective probabilities (measures of confidence or belief). This leads us to stochastic optimization problems which can rarely be solved by using the standard deterministic optimization and optimal control methods. In the stochastic optimization the accent is on problems with a large number of decision and random variables, and consequently the focus of attention is directed to efficient solution procedures rather than to (analytical) closed-form solutions. Objective and constraint functions of dynamic stochastic optimization problems have the form of multidimensional integrals of rather involved in that may have a nonsmooth and even discontinuous character - the typical situation for "hit-or-miss" type of decision making problems involving irreversibility of decisions or/and abrupt changes of the system. In general, the exact evaluation of such functions (as is assumed in the standard optimization and control theory) is practically impossible. Also, the problem does not often possess the separability properties that allow to derive the standard in control theory recursive (Bellman) equations.

Air Force Officer's Guide Feb 28 2022 - U.S. Air Force organizations and types of assignments - Duties and responsibilities - Privileges, benefits, and restrictions - Customs and courtesies - Career development and promotion - Pay and allowances - Command and leadership - Uniforms and insignia - Complete data on Air Force installations worldwide - Extensive references to regulations and other information Updated to reflect changes in the military in general and the Air Force in particular, this new edition of Air Force Officer's Guide contains professional materials needed for a successful career as an Air Force officer, from cadet to general, both active duty and reserves.

Dietary Reference Intakes for Water, Potassium, Sodium, Chloride, and Sulfate Apr 08 2020 Dietary Reference Intakes for Water, Potassium, Sodium, Chloride, and Sulfate The Dietary Reference Intakes (DRIs) are quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. This new report, the sixth in a series of reports presenting dietary reference values for the intakes of nutrients by Americans and Canadians, establishes nutrient recommendations on water, potassium, and salt for health maintenance and the reduction of chronic disease risk. Dietary Reference Intakes for Water, Potassium, Sodium, Chloride, and Sulfate discusses in detail the role of water, potassium, salt, chloride, and sulfate in human physiology and health. The major findings in this book include the establishment of Adequate Intakes for total water (drinking water, beverages, and food), potassium, sodium, and chloride and the establishment of Tolerable Upper Intake levels for sodium and chloride. The book makes research recommendations for information needed to advance the understanding of human requirements for water and electrolytes, as well as adverse effects associated with the intake of excessive amounts of water, sodium, chloride, potassium, and sulfate. This book will be an invaluable reference for nutritionists, nutrition researchers, and food manufacturers.

Promotion Fitness Examination Nov 03 2019

Air Force Handbook 1 Oct 27 2021 This handbook implements AFD 36-22, Air Force Military Training. Information in this handbook is primarily from Air Force publications and contains a compilation of policies, procedures, and standards that guide Airmen's actions within the Profession of Arms. This handbook applies to the Regular Air Force, Air Force Reserve and Air National Guard. This handbook contains the basic information Airmen need to understand the professionalism required within the Profession of Arms. Attachment 1 contains references and supporting information used in this publication. This handbook is the sole source reference for the development of study guides to support the enlisted promotion system. Enlisted Airmen will use these study guide to prepare for their Promotion Fitness Examination (PFE) or United States Air Force Supervisory Examination (USAFSE).

Chasing Success Feb 05 2020 This book examines how international expectations intersected with the United States Air Force's fight for autonomy and utility, explains how the service began to change, and asks how airpower-and the US military as a whole-might further deepen its efforts. The author expands perspectives on assessing and directing the use of airpower and encourages further work to maximize both mission accomplishment and civilian protection. The recent evolution of US airpower offers inspiring, if incomplete, evidence that the conduct of war can become more humane while remaining effective. Technology, adversaries, and the goals of armed conflict will continue to evolve, but the central challenge of humanizing war will endure. Part one outlines the challenge that contemporary expectations about the American use of force pose for airpower. Part two describes the Air Force's adaptation to modern expectations of civilian protection, tracing operational experiences during the 1990s and the consequent operational and institutional innovation.

Ten Propositions Regarding Space Power Dec 05 2019 This public domain reproduction in durable hardcover matte rides the coattails of Colonel Philip S. Meininger's book, Ten Propositions Regarding Air Power. As the United States ponders its future regarding space operations, the time has come to frame

similar propositions regarding spacepower. Specifically, this study seeks to answer the question, "What is the nature of spacepower?" It also test the aerospace integration school's hypothesis that spacepower is simply a continuation or extension of airpower. Two points come immediately to the forefront of this work. First, spacepower is different from airpower even though both share the vertical dimension of warfare. Second, space operations have matured to a point where valid and unique propositions regarding spacepower are identifiable. The ten propositions presented here do not represent a complete list. The method used to derive these propositions involved literary research that result in a long list. The list evolved over three years during numerous brainstorming with several space experts--most of them space weapons officers with theater and often combat experience--until the list was carefully refined into the ten most salient propositions. There were many ways to present the Ten Propositions Regarding Spacepower, but the author deferred to Meininger's approach of citing each proposition as a thesis statement with supporting material immediately following. The objective of this work is to stimulate discussions and help those who do not yet understand or appreciate the nature of spacepower in modern warfare.
