Department of Transportation and Related Agencies Appropriations for 1976 Dec 27 2021 Sustainability in Energy and Buildings 2022 Aug 03 2022 This book contains the proceedings of the 14th KES International Conference on Sustainability and Energy in Buildings 2021 (SEB2022) held in Split, Croatia, during September 14–16, 2022, organized by KES International. SEB22 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding sustainable energy systems. The conference formed an exciting chance to present, interact and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the full-paper track were subjected to a blind peer-reviewed process. Only the best of these were selected for presentation at the conference and publication in these proceedings. It is intended that this book provides a useful and informative snapshot of recent research developments in the important and vibrant area of sustainability in energy and buildings.

The Monetization of Technical Data Dec 03 2019 The monetization of data is a very young topic, for which there are only very few case studies. There is a lack of strategy or concept that shows decision-makers the way into the monetization of data, especially those who have discovered or are threatened by the digital transformation or Industry 4.0. Because machine data is usually unstructured and not usable without domain knowledge/metadata, the monetization of machine data has an as yet unquantifiable potential. In order to make this potential tangible, this work describes not only contributions from science, but also practical examples from industry. Based on different examples from various industries, the reader can already become part of a future data economy today. Values and benefits are described in detail.

Wetland Drainage, Restoration, and Repair Jul 02 2022 Wetlands are a vital part of the landscape and ecology of the United States, providing food and shelter for species ranging from the beautiful wood duck to the tiny fairy shrimp. These areas provide critical habitat for fish and wildlife, protect communities from flooding, and recharge groundwater supplies—yet they continue to be destroyed at an alarming rate. A detailed analysis of wetlands management, Wetland Drainage, Restoration, and Repair is a comprehensive guide to the past, present, and future of wetland recovery in the United States. The book includes a historical overview of wetland destruction and repair over the past two hundred years and also serves as a unique resource for anyone, from novice to engineer, interested in the process of wetland restoration. Author Thomas R. Biebighauser draws from his own vast experience in building and repairing more than 950 wetlands across North America. Included are numerous photographs and case

studies that highlight successes of past projects. Detailed, step-by-step instructions guide the reader through the planning and implementation of each restoration action. Biebighauser also provides a number of effective strategies for initiating and improving funding for wetlands programs. Wetland Drainage, Restoration, and Repair is essential reading for all who care about and for these important ecosystems.

Annual Report Jul 22 2021

SADC Gender Protocol 2015 Barometer Jun 08 2020 In August 2008, Heads of State of the Southern African Development Community adopted the ground-breaking SADC Protocol on Gender and Development. This followed a concerted campaign by NGOs under the umbrella of the Southern Africa Gender Protocol Alliance. The SADC Gender Protocol is the only sub-regional instrument that brings together existing global and continental commitments to gender equality and enhances these through time bound targets. Aligned to Millennium Development Goal Three, the original 28 targets of the Protocol targets expire in 2015. Now that 2015 is here, we need to step back, assess and reposition. In June 2014, SADC Gender Ministers agreed to review the targets of the Gender Protocol in line with the Sustainable Development Goals (SDGs). In May this year, ministers added that they want the Protocol to be accompanied by a Monitoring, Evaluation and Results Framework. The 2015 Barometer shows that implementation is now the biggest missing gap in the quest for gender equality. Now is the time to strengthen resolve, reconsider, reposition, and re-strategise for 2030. SADC GENDER PROTOCOL BAROMETER • 2015 2015 is here! In August 2008, Heads of State of the Southern African Development Community adopted the ground-breaking SADC Protocol on Gender and Development. This followed a concerted campaign by NGOs under the umbrella of the Southern Africa Gender Protocol Alliance. The SADC Gender Protocol is the only sub-regional instrument that brings together existing global and continental commitments to gender equality and enhances these through time bound targets. Aligned to Millennium Development Goal Three, the original 28 targets of the Protocol targets expire in 2015. Now that 2015 is here, we need to step back, assess and reposition. Each article, relic, mutant beast, non-player character and other feature has been placed into categories within this hefty tome. Never forget a copy again. Both game masters and players of The Mutant Epoch role playing game can carry all the magazines in one handy book and quickly flip to any resource with ease. Excavator Monthly Compendium includes: 27 Nasty Mutant Creatures 13 Potent Relics 6 Alternate Character Generation Methods 2 New Skills: Acrobatics and Archery 12 Non-Player Character Friends and Foes 162 Illustrations 9 Assorted Articles Short Story: Demon in the Depths 10 Game Master Only Articles 8 Players Perspective Articles 4 Treasure Tables and much more!

Power Shovels : The World's Mightiest Mining and Construction Excavators Jul 10 2020 Power Shovels is a celebration of the land leviathans that have inhabited the open pit mines over the past century. Due to their massive size and unbelievable capabilities, interest in these machines extends far beyond their role in the extraction of minerals and precious metals. Author Orlemann focuses on the super stripper and loading class of shovels. Discover how the super stripper can remove vast amounts of earth and place it over a football field away. This book reveals design, engineering, manufacture, assembly, and operation of these modern and massive shovels.
