"I Have Nothing to Hide" Feb 12 2021 An accessible guide that breaks down the complex issues around mass surveillance and data privacy and explores the negative consequences it can have on individual citizens and their communities. No one is exempt from data mining: by owning a smartphone, or using social media or a credit card, we hand over private data to corporations and the government. We need to understand how surveillance and data collection operates in order to regain control over our digital freedoms—and our lives. Attorney and data privacy expert Heidi Boghosian unpacks widespread myths around the seemingly innocuous nature of surveillance, sets the record straight about what government agencies and corporations do with our personal data, and offers solutions to take back our information. "I Have Nothing to Hide" is both a necessary mass surveillance overview and a reference book. It addresses the misconceptions around tradeoffs between privacy and security, citizen spying, and the ability to design products with privacy protections. Boghosian breaks down misinformation surrounding 21 core myths about data privacy, including: • "Surveillance makes the nation safer." • "No one wants to spy on kids." • "Police don't monitor social media." • "Metadata doesn't reveal much about me." • "Congress and the courts protect us from surveillance." • "There's nothing I can do to stop surveillance." By dispelling myths related to surveillance, this book helps readers better understand what data is being collected, who is gathering it, how they're doing it, and why it matters.

Expert contributors examine such scorned literature as dime novels, comic books, juvenile fiction, romance novels, and pulp magazines from the 1830s to the 1950s. The chapters illuminate the value of these works and analyze the cultural forces that sought to censor them.
