[Discover SAP ERP Financials](#)
Feb 25 2022 Discover what SAP ERP Financials is and whether it s right for your business Improve your financial processes and save money with this powerful software Explore the major modules and their application for financial processes You know that business financials are an essential part of every business, large or small, but do you how SAP ERP Financials can make it easier? From basic accounting and complex financial audits to reporting, SAP ERP Financials offers vast, diverse and customizable solutions. This title offers a very detailed, reader-friendly

reference that will give you an in-depth overview of the key components of SAP ERP Financials. Perfect for new users, decision-makers, and power users, with this title you will learn how to improve your efficiency in key financial areas, including profitability analysis, financial supply chain management, cost-accounting, and more. Updated for SAP ERP 6.0, EhP 5 and 6 with an expanded focus on real world scenarios and practical case-studies.

Configuring and Using CATS
Nov 05 2022 This complete guide to effectively configuring CATS provides detailed explanations of Special Approvals and customising for Duet™, along with detailed steps for setting up CATS to fulfil the many complex configuration requirements. Details on each CATS User-exit and tips on what functionality can or cannot be accomplished with particular User-exits is also included . In addition, the author provides in-depth guidance for how to prevent and correct performance

problems, answers to frequently asked questions, tips for audit report development, and much more. Readers will explore how to perform frequently used activities, such as recording time or executing a CATS report directly from Microsoft Office and discover the key steps you can take to avoid or correct some of the most common causes for the slowdown of some CATS transactions. You'll learn how to effectively use the Business Application Programming Interfaces (BAPIs) provided by CATS to exchange time data with external systems and master the Import/Export functionality and how to increase the efficiency of the approval process by implementing rules for automatic time approvals. In addition, you'll uncover how best to customise the approval report with your own data fields and messages to facilitate the entire process.

Project Portfolio Management with SAP RPM and cProjects Jul 01 2022

This one-stop guide details how to integrate and use project portfolio management with SAP to support your business processes. Focused on cProjects and RPM — as well as the integration with SAP Project System — this guide describes the implementation and usage of the SAP tools for project portfolio management in a process-oriented way. It uses sample customer

examples and projects to illustrate specific solution options, is based on the latest SAP releases, and includes an entire chapter on project procedures. Readers get a detailed overview of the typical requirements for a PPM solution, and learn how SAP supports the integration of subprocesses such as portfolio planning, project execution, time recording, and reporting. Expert insights into SAP RPM and its detailed configuration options: master data management, financial and capacity planning, questionnaires, scoring models, and metrics management serve to make this book indispensable. In addition, the configuration options and functions of cProjects are explained clearly with special attention paid to customizing the project structure, document and resource management, project alerts, evaluations, and more. Plus, find out how SAP RPM and cProjects integrate with SAP PS, SAP NetWeaver Portal, SAP NetWeaver BI, MS Project,

Need to start working in the cloud with the ABAP RESTful application programming model? We've got you covered. Got a new IDE like SAP Business Application Studio? We'll show you the ins and outs of your environment. From abapGit and ABAP2XLSX to SAPUI5 and Web Dynpro ABAP, this new edition has everything you need to be on the cutting edge!

SAP Business Connector Oct 04 2022

Logistics with SAP S/4HANA Sep 22 2021 Transform your logistics operations with SAP S/4HANA! With this introduction, see what SAP has in store for each supply chain line of business: sales order management, manufacturing, inventory management, warehousing, and more. Discover how SAP Fiori apps and embedded analytics improve reporting, and explore the intersection between your supply chain processes and

new SAP Leonardo technologies. Take your first look at SAP S/4HANA logistics, and see where it will take your business! a. Key Processes Advances in SAP S/4HANA are changing your supply chain. Explore planning and scheduling, transportation management, inventory management, manufacturing, warehousing, sourcing and procurement, plant maintenance, and more! b. The Future of Logistics Uncover what's new and improved in SAP S/4HANA for your logistics LOBs, such as centralized procurement to demand-driven MRP. See how technologies like IoT and machine learning can accelerate your core supply chain processes. c. Migration Once you see the logistics big picture, you can plan your next steps. Learn how to design your roadmap, evaluate your technical and functional conversion steps, and prepare your system for your desired migration path. 1) Sourcing and procurement 2) Inventory management 3) Warehouse management 4)

ABAP in the Cloud Jul 21

2021 SAP BTP, ABAP

environment requires

specialized knowledge of

language limits and

development environment--let

this book be your guide! Begin

by provisioning a trial instance

and setting up ABAP

Development Tools in Eclipse.

Then, walk step-by-step

through building an app using

the ABAP RESTful application
programming model,
developing backend services,
and creating SAP Fiori apps.
Connect your cloud-based
ABAP applications to on-
premise and cloud systems and
learn how to manage and
maintain those applications.
ABAP's not dead, it's in the
cloud! Highlights include: 1)
ABAP Development Tools in
Eclipse 2) SAP BTP, Cloud
Foundry environment 3) ABAP
RESTful application
programming model 4)
Application development 5)
Backend services 6) SAP Fiori
7) Consuming APIs 8) Identity
and access management 9)
Application lifecycle
management 10) Monitoring
and security
