Office Skills May 04 2020 *Office Skills* provides up-to-date, real-life, and valuable information for the office of tomorrow with an emphasis on practical applications, everyday skills and the knowledge needed to be successful. The text presents an overview of technological skills and examines attitudes and human relationships, highlighting the “people skills” vital to a successful career.

Border Citizens Jul 30 2022 In *Border Citizens*, historian Eric V. Meeks explores how the racial classification and identities of the diverse indigenous, mestizo, and Euro-American residents of Arizona’s borderlands evolved as the region was politically and economically incorporated into the United States. First published in 2007, the book examines the complex relationship between racial subordination and resistance over the course of a century. On the one hand, Meeks links the construction of multiple racial categories to the process of nation-state building and capitalist integration. On the other, he explores how the region’s diverse communities altered the blueprint drawn up by government officials and members of the Anglo majority for their assimilation or exclusion while redefining citizenship and national belonging. The revised edition of this highly praised and influential study features a chapter-length afterword that details and contextualizes Arizona’s aggressive response to undocumented immigration and ethnic studies in the decade after *Border Citizens* was first published. Meeks demonstrates that the broad-based movement against these measures had ramifications well beyond Arizona. He also revisits the Yaqui and Tohono O’odham nations on both sides of the Sonora-Arizona border, focusing on their efforts to retain, extend, and enrich their connections to one another in the face of increasingly stringent border enforcement.

Writing and Digital Media Sep 07 2020 This indispensable volume reviews outstanding European, American and Australian research in the cognitive, social and cultural implications of writing for digital media. It addresses writing modes and environments, writing and communication, digital tools for writing research, online educational environments, and social and philosophical aspects.

Theme Town Dec 23 2021 A guide to interpreting everyday human landscapes focuses on Flagstaff, Arizona, exploring four urban districts: a themed historic business district, a pre-War multi-ethnic neighborhood, an expanding university campus, and a dynamic automobile commercial strip.

What Has Passed and what Remains Feb 22 2022 Ferrell Secakuku remembers the ancient farming rites of his Hopi people but saw them replaced by a cash economy. Sheep rancher Joe Manterola recalls watching hard scrabble farms on what is now tree-studded grassland on Garland Prairie. Navajo Rose Gishie once saw freshly dug holes fill with clean, drinkable water where none rises today. All over northern Arizona, people have seen the landscapes change, and livelihoods with them. In this remarkable book they share their stories. Thirteen narratives—from ranchers, foresters, scientists, Native American farmers, and others—tell how northern Arizona landscapes and livelihoods reflect rapid social and environmental change. The twentieth century saw huge changes as Arizona’s human population swelled and vacation-home developments arose in the backcountry. Riparian areas dried up, cattle ranching declined, and some wildlife species vanished while others thrived. The people whose words are preserved here have watched it all happen. The book is a product of Northern Arizona University’s Ecological Oral Histories project, which has been collecting remembrances of long-time area residents who have observed changes to the land from the 1930s to the present day. It carves a wide

swath, from the Arizona Strip to the Mogollon Rim, from valleys near Prescott to the New Mexico line. It takes readers to the Bar Heart Ranch north of Williams and to the Doy Reidhead Ranch southeast of Holbrook, to the forests of Flagstaff and the mesas of Indian country. Enhanced with more than fifty illustrations, this book brings environmental change down to earth by allowing us to see it through the eyes of those whose lives it has directly touched. *What Has Passed and What Remains* is a window on the past that carries important lessons for the future.

Arizona's War Town Feb 10 2021 Few American towns went untouched by World War II, even those in remote corners of the country. During that era, the federal government forever changed the lives of many northern Arizona citizens with the construction of the U.S. Army ordnance depot at Bellemont, ten miles west of Flagstaff. John Westerlund now tells how this linchpin in the war effort marked a turning point in Flagstaff's history. One of only sixteen munitions depots built between 1941 and 1943, the Navajo Ordnance Depot contributed significantly to the city's rapid growth during the war years as it brought considerable social, cultural, and economic change to the region. A clearing in the ponderosa pine forest called Volunteer Prairie met the military's criteria for a munitions depot--open terrain, a cool climate, plentiful water, and proximity to a railroad--and it was also sufficiently inland to be safe from the threat of coastal invasion. Constructing a depot of 800 ammunition bunkers, each the size of a 2,000-square-foot home, called for a force of 8,000 laborers, and Flagstaff became a boom town overnight as construction workers and their families poured in from nearby Indian reservations and as far away as the Midwest and South. More than 2,000 were retained as permanent employees--a larger workforce than Flagstaff's total pre-war employment roster. As Westerlund's portrait of wartime Flagstaff shows, prosperity brought unanticipated consequences: racism simmered beneath the surface of the town as ethnic groups were thrown together for the first time; merchants called a city-wide strike to protest emerging union activity; juvenile delinquency rose dramatically; Flagstaff women entered the workforce in unprecedented numbers, altering local mores along with their own plans for the future; meanwhile, hundreds of sailors and marines arrived at Arizona State Teachers College to participate in the Navy's "V-12" program. Whether recounting the difficulty of 3,500 Navajo and Hopi employees adjusting to life off the reservation or the complaints of townspeople that Austrian POWs--transferred to the depot to ease the labor shortage--were treated too well, Westerlund shows that the construction and maintenance of the facility was far more than a military matter. Navajo Ordnance Depot remained operational to support wars in Korea, Vietnam, and the Persian Gulf, and today Camp Navajo provides storage for thousands of deactivated ICBM motors. But in recounting its early days, Westerlund has skillfully blended social and military history to vividly portray not only a city's transitional years but also the impact of military expansion on economic and community development in the American West.

Keep Calm and Query On Apr 14 2021 "[The author] discusses his journey as a writer with all its bludgeoning defeats and small triumphs. Against the backdrop of life abroad in York, England, these reflections on living and writing pulse with hope, wisdom, and conviction ... Luke's journey as a writer is accompanied by 14 interviews he has conducted with powerful and prolific authors."--Cover.

Northern Arizona University Jan 04 2023 Any university is composed of faculty, students, and staff. But these living components change over time and in varying degrees, while the campus buildings are more permanent, remaining for decades, a century, or longer. This book looks at the buildings that have graced the campus of Northern Arizona University from its opening in 1898 to the present. The school began with a single building, Old Main, and it was joined by five other structures prior to World War I. In the following decades the campus remained relatively small, expanding to approximately twenty-five structures by the late 1950s. During the tenure of President J. Lawrence Walkup (1957-1979), the university effectively doubled in size, spreading southward and adding more than forty buildings, including an entire south campus academic center. Since 1979 the campus has witnessed the addition of more than thirty structures, most as infill within the existing campus layout. Arranged chronologically, this extensively illustrated volume briefly describes the history of every building that has been a part of the university's physical layout. The authors describe various structural aspects of each building and provide entertaining and informative anecdotes about events and people associated with the structures. By combing the university's archives, Drickamer and Runge have turned up photographs of each building as it looked shortly after construction and at present, providing a fascinating visual time lapse. With more than two hundred images of campus buildings, many of them never before published, *Northern Arizona University: Buildings as History* provides a wonderful pictorial chronicle of the campus that will interest architectural historians as well as all those who have called NAU home.

Culture Change and Shifting Populations in Central Northern Mexico Jun 16 2021 Historical investigation of culture contact between raiding aboriginal Indian groups and Spanish colonists. Significant insights concerning conflicting concepts of ownership and property.

The Greenwood Dictionary of Education Nov 09 2020 · 3,050 A-Z entries, including over 400 new and revised definitions · 128 contributors from a variety of specialized areas related to education · Three tables and graphs to illustrate specific aspects of mathematics and evaluation in education · An introduction on education terminology by editors John W. Collins and Nancy Patricia

O'Brien, distinguished librarians in the study of education · Author attributions for each definition · An extensive, updated bibliography of sources that identify and explain terms used within education

The Oxford Handbook of Endangered Languages Nov 29 2019 The endangered languages crisis is widely acknowledged among scholars who deal with languages and indigenous peoples as one of the most pressing problems facing humanity, posing moral, practical, and scientific issues of enormous proportions. Simply put, no area of the world is immune from language endangerment. The Oxford Handbook of Endangered Languages, in 39 chapters, provides a comprehensive overview of the efforts that are being undertaken to deal with this crisis. A comprehensive reference reflecting the breadth of the field, the Handbook presents in detail both the range of thinking about language endangerment and the variety of responses to it, and broadens understanding of language endangerment, language documentation, and language revitalization, encouraging further research. The Handbook is organized into five parts. Part 1, Endangered Languages, addresses the fundamental issues that are essential to understanding the nature of the endangered languages crisis. Part 2, Language Documentation, provides an overview of the issues and activities of concern to linguists and others in their efforts to record and document endangered languages. Part 3, Language Revitalization, includes approaches, practices, and strategies for revitalizing endangered and sleeping ("dormant") languages. Part 4, Endangered Languages and Biocultural Diversity, extends the discussion of language endangerment beyond its conventional boundaries to consider the interrelationship of language, culture, and environment, and the common forces that now threaten the sustainability of their diversity. Part 5, Looking to the Future, addresses a variety of topics that are certain to be of consequence in future efforts to document and revitalize endangered languages.

Small Teaching Online Jul 06 2020 Find out how to apply learning science in online classes The concept of small teaching is simple: small and strategic changes have enormous power to improve student learning. Instructors face unique and specific challenges when teaching an online course. This book offers small teaching strategies that will positively impact the online classroom. This book outlines practical and feasible applications of theoretical principles to help your online students learn. It includes current best practices around educational technologies, strategies to build community and collaboration, and minor changes you can make in your online teaching practice, small but impactful adjustments that result in significant learning gains. • Explains how you can support your online students • Helps your students find success in this non-traditional learning environment • Covers online and blended learning • Addresses specific challenges that online instructors face in higher education Small Teaching Online presents research-based teaching techniques from an online instructional design expert and the bestselling author of Small Teaching.

Critical Voices in Science Education Research Jul 18 2021 This book is a collection of narratives from a diverse array of science education researchers that elucidate some of the difficulties of becoming a science education researcher and/or science teacher educator, with the hope that through solidarity, commonality, and "telling the story", justice-oriented science education researchers will feel more supported in their own journeys. Being a scholar and teacher that sees science education as a space for justice, and thinking/being different, entry into this disciplinary field often comes with tense moments and personal difficulties. The chapter authors of this book break into many painful, awkward, and seemingly nebulous topics, including the intersectional nuances of what it means to be a researcher in the contexts of epistemic rigidity, white supremacy, and neoliberal restructuring. Of course these contexts become different depending on how teachers, students, and researchers are constituted within them (as racialized/sexed/gendered/disposable/valued subjects). We hope that within these narratives readers will identify with similar struggles in terms of what it means to desire to "do good in the world", while facing subtle and not-so-subtle institutional, personal cultural, and political challenges.

A Marriage Out West Aug 26 2019 A Marriage Out West is an intimate biographical account of two fascinating figures of twentieth-century archaeology. Frances Theresa Peet Russell, an educator, married Harvard anthropologist Frank Russell in June 1900. They left immediately on a busman's honeymoon to the Southwest. Their goal was twofold: to travel to an arid environment to quiet Frank's tuberculosis and to find archaeological sites to support his research. During their brief marriage, the Russells surveyed almost all of Arizona Territory, traveling by horse over rugged terrain and camping in the back of a Conestoga wagon in harsh environmental conditions. Nancy J. Parezo and Don D. Fowler detail the grit and determination of the Russells' unique collaboration over the course of three field seasons. Delivering the first biographical account of Frank Russell's life, this book brings detail to his life and work from childhood until his death in 1903. Parezo and Fowler analyze the important contributions Theresa and Frank made to the burgeoning field of archaeology and Akimel O'odham (Pima) ethnography. They also offer never-before-published information on Theresa's life after Frank's death and her subsequent career as a professor of English literature and philosophy at Stanford University. In 1906 Theresa Russell published In Pursuit of a Graveyard: Being the Trail of an Archaeological Wedding Journey, a twelve-part serial in Out West magazine. Theresa's articles constituted an experiential narrative based on field journals and remembrances of life in the northern Southwest. The work offers both a biography and a seasonal field narrative that emphasized personal experiences rather than traditional scientific field notes. Included in A Marriage Out West, Theresa's writing provides an invaluable participant's perspective of early 1900s American archaeology and ethnography and life out West.

Minds Online Mar 26 2022 For the Internet generation, educational technology designed with the brain in mind offers a natural pathway to the pleasures and rewards of deep learning. Drawing on neuroscience and cognitive psychology, Michelle Miller shows how attention, memory, critical thinking, and analytical reasoning can be enhanced through technology-aided approaches.

Proceedings RMRS. Sep 19 2021

Reach Everyone, Teach Everyone Dec 31 2019 Advocates for the rights of people with disabilities have worked hard to make universal design in the built environment "just part of what we do." We no longer see curb cuts, for instance, as accommodations for people with disabilities, but perceive their usefulness every time we ride our bikes or push our strollers through crosswalks. This is also a perfect model for Universal Design for Learning (UDL), a framework grounded in the neuroscience of why, what, and how people learn. Tobin and Behling show that, although it is often associated with students with disabilities, UDL can be profitably broadened toward a larger ease-of-use and general diversity framework. Captioned instructional videos, for example, benefit learners with hearing impairments but also the student who worries about waking her young children at night or those studying on a noisy team bus. Reach Everyone, Teach Everyone is aimed at faculty members, faculty-service staff, disability support providers, student-service staff, campus leaders, and graduate students who want to strengthen the engagement, interaction, and performance of all college students. It

includes resources for readers who want to become UDL experts and advocates: real-world case studies, active-learning techniques, UDL coaching skills, micro- and macro-level UDL-adoption guidance, and use-them-now resources.

Introduction to Human Communication Custom Edition Northern Arizona University Oct 21 2021

Annual Report Mar 02 2020

The Inequality of COVID-19 Aug 19 2021 *The Inequality of COVID-19: Immediate Health Communication, Governance and Response in Four Indigenous Regions* explores the use of information, communication technologies (ICTs) and longer-term guidelines, directives and general policy initiatives. The cases document implications of the failure of various governments to establish robust policies to mitigate the spread of COVID-19 in a sample of advanced and low-income countries. Because the global institutions charged with managing the COVID-19 crisis did not work in harmony, the results have been devastating. The four Indigenous communities selected were the Navajo of the southwest United States, Siddi people in India, Aboriginal and Torres Strait Islander peoples of Australia and the Maasai in East Africa. Although these are all diverse communities, spread across different continents, their base economic oppression and survival from colonial violence is a common denominator in hypothesizing the public health management outcomes. However, the research reveals that national leadership and other incoherent pandemic mitigation policies account for a significant amount of the devastation caused in these communities. Explores examples of pandemic mitigation practices in indigenous communities Provides case studies of importance of ICTs in health care in 21st century pandemic management protocols Presents real policy data collected from different continents from early days through the first year of the global pandemic

Basic Cinematography Jan 24 2022 The cinematographer must translate the ideas and emotions contained in a script into something that can be physically seen and felt onscreen, helping the director to fulfil the vision of the film. The shots may look good, but they will not serve the story until the composition, lenses, and lighting express, enhance, and reveal the underlying emotions and subtext of the story. By making physical the ideas and emotions of the story, the cinematographer supports blocking as a visual form of the story through these tools. Rather than delve into technical training, Basic Cinematography helps to train the eye and heart of cinematographers as visual storytellers, providing them with a strong foundation for their work, so that they're ready with creative ideas and choices on set in order to make compelling images that support the story. The book includes tools, tables, and worksheets on how to enhance students and experienced filmmakers with strong visual storytelling possibilities, including such features as: Dramatic script analysis that will help unlock blocking, composition, and lighting ideas that reveal the visual story Ten tools of composition Psychological impact of lenses, shot sizes, and camera movement Six elements of lighting for visual storytelling What to look for beneath the "hood" of cameras, including using camera log, RAW, and LUTs Dramatic analysis chart and scene composition chart to help plan your shoots Case studies from such visually cinematic shows and documentaries as Netflix's *Godless*, *Jessica Jones*, *The Crown*, and *Chef's Table*, as well as examples from classroom exercises Features insights from the DP of *Jessica Jones*, Manuel Billeter, and the DP of *Chef's Table*, Adam Bricker.
