**TM 10-396 War Dogs Technical Manual** Oct 28 2022 Since ancient times, dogs have played a large part in warfare. From war dogs trained for combat purposes to dogs used as scouts, they have played an important role in military history. Throughout World War II, the United States Marine Corps used dogs, which were donated by their American owners. In the Pacific Theater, they were integral in taking backs islands from Japanese occupying forces. During this period, the Doberman Pinscher became the official dog of the United States Marine Corps. However, all breeds of dogs were permitted to train to be war dogs of the Pacific. Of the 549 dogs that returned from the war, only four could not be returned to civilian life. Many of the dogs went home with their handlers from the war. Later, scout dogs were used in Korea and Vietnam to detect ambushes, weapon caches, or enemy fighters hiding underwater. Created in 1943, this technical manual details a great deal about the war dog training process. Furthermore, it takes an in depth look in to the psychological conditioning of the dog. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. *War Department Technical Manual* Dec 18 2021

This operator's manual provides operating procedures, troubleshooting, PMCS, maintenance, and supporting information required to operate and maintain the AMMPS 5 kW generator sets. Listed below are some of the features included in this TM to help locate and use the provided information. This TM has been organized using the Work Package (WP) concept. Each chapter contains a series of WPs rather than sections and paragraphs. Each WP is designed to stand alone as a complete information module. If you keep the section(s) of this TM in a loose-leaf binder, you will be able to remove just the WP needed to complete a specific task. Each WP is numbered using a four-digit number beginning with WP 0001. WPs are numbered sequentially throughout the TM (e.g. WP 0022, WP 0023, etc.). The Table of Contents lists each chapter and WP title, as well as all figures and tables contained within each WP. Figures and tables are numbered sequentially within each WP. The WP number is located at the top right of each page. It is also located at the bottom of the page with the WP page number included (0001-1 would be page 1 of the General Information WP (WP 0001, General Information). Each WP starts on a right-hand page. This is done so you can remove a single WP from the paper TM if needed for a task. Blank pages are assigned a number, but it appears on the preceding or following page. For example, if page 0001-10 of a WP is blank, page 0001-9 will have the number 0001-9/10 blank; or if page 0001-1 of a WP is blank, page 0001-2 will have the number 0001-1 blank/2. Each WP containing step-by-step maintenance or troubleshooting procedures will end with the words END OF TASK, and each WP ends with the statement END OF WORK PACKAGE. Think of each WP as a small, standalone TM.
