sociology, human sexuality, psychology, social work, law, and medicine--will discover a wealth of unique and useful material here. Arranged in a life history sequence that moves from adolescence to adulthood, this informative volume documents the responses of parents of gay children, wives of gay men, children of lesbian mothers, and gay fathers about their family lives.

The Middle Generation Syndrome Jul 08 2020 Today, we live in a society where many adults in the middle generation have self-destructed.

Their behavior is very disturbing and confusing to those around them. Due to their reckless and odd behavior, grandparents (their parents) are put in the position of having to care for the children of the middle generation parents. The middle generation absenteeism has put a tremendous strain on society that has, and will cause, a deep impact for generations to come. This book spells out the reasons for this malady and offers solutions.

The Boy Who Loved Too Much Jun 30 2022 The acclaimed, poignant story of a boy with Williams syndrome, a condition that makes people biologically incapable of distrust, a “well-researched, perceptive exploration of a rare genetic disorder seen through the eyes of a mother and son” (Kirkus Reviews). What would it be like to see everyone as a friend? Twelve-year-old Eli D’Angelo has a genetic disorder that obliterates social inhibitions, making him irrepressibly friendly, indiscriminately trusting, and unconditionally loving toward everyone he meets. It also makes him enormously vulnerable. On the cusp of adolescence, Eli lacks the innate skepticism that will help him navigate coming-of-age more safely—and vastly more successfully. In “a thorough overview of Williams syndrome and its thought-provoking paradox” (The New York Times), journalist Jennifer Latson follows Eli over three critical years of his life, as his mother, Gayle, must decide whether to shield Eli from the world or give him the freedom to find his own way and become his own person. Watching Eli’s artless attempts to forge connections, Gayle worries that he might never make a real friend—the one thing he wants most in life. “As the book’s perspective deliberately pans out to include teachers, counselors, family, friends, and, finally, Eli’s entire eighth-grade class, Latson delivers some unforgettable lessons about inclusion and parenthood,” (Publishers Weekly). The Boy Who Loved Too Much explores the way a tiny twist in a DNA strand can strip away the skepticism most of us wear as armor, and how this condition magnifies some of the risks we all face in opening our hearts to others. More than a case study of a rare disorder, The Boy Who Loved Too Much “is fresh and engaging...leavened with humor” (Houston Chronicle) and a universal tale about the joys and struggles of raising a child, of growing up, and of

being different.

The second guide provides practical information for law enforcement officers, child protection workers, and others faced with the need to obtain information from children who may have been victims or witnesses to child abuse. The third and final guide provides helpful points in investigating child neglect and also addresses Munchausen syndrome by proxy in which the caregiver fabricates a child's purported illness.

Boarding School Syndrome Sep 02 2022 Boarding School Syndrome is an analysis of the trauma of the 'privileged' child sent to boarding school at a young age. Innovative and challenging, Joy Schaverien offers a psychological analysis of the long-established British and colonial preparatory and public boarding school tradition. Richly illustrated with pictures and the narratives of adult ex-boarders in psychotherapy, the book demonstrates how some forms of enduring distress in adult life may be traced back to the early losses of home and family. Developed from clinical research and informed by attachment and child development

theories 'Boarding School Syndrome' is a new term that offers a theoretical framework on which the psychotherapeutic treatment of ex-boarders may build. Divided into four parts, History: In the Name of Privilege; Exile and Healing; Broken Attachments: A Hidden Trauma, and The Boarding School Body, the book includes vivid case studies of ex-boarders in psychotherapy. Their accounts reveal details of the suffering endured: loss, bereavement and captivity are sometimes compounded by physical, sexual and psychological abuse. Here, Joy Schaverien shows how many boarders adopt unconscious coping strategies including dissociative amnesia resulting in a psychological split between the 'home self' and the 'boarding school self'. This pattern may continue into adult life, causing difficulties in intimate relationships, generalized depression and separation anxiety amongst other forms of psychological distress. Boarding School Syndrome demonstrates how boarding school may damage those it is meant to be a reward and discusses the wider implications of this tradition. It will be essential reading for psychoanalysts, Jungian analysts, psychotherapists, art psychotherapists, counsellors and others interested in the psychological, cultural and international legacy of this tradition including ex-boarders and their partners.

Enigma Apr 28 2022 More often than not, when we find out that someone is an only child we quickly surmise that the person has been spoiled-rotten by his or her parent (s); thereby, having a reputation of being selfish and bratty. G. Stanley Hall was one of the first experts to give an only child a bad reputation when he referred to their situation as "a disease in itself." Being spoiled can be interpreted in varying ways. One might say that it simply means that they are well taken care of. Yet others may argue that its meaning is derived from a parent (s) over-showering their child with monetary riches; all the while, failing to instill other core values that will enrich their child's personality and character. Being a parent is undoubtedly one of the toughest tasks on earth. Nevertheless, a parent's flagrant-foul on the parenting field can be extremely damaging and detrimental to their child's emotional well-being. Good children can make bad parents, just as bad parents can make good children. For Crystal, things just got real!

This Boy We Made Jan 26 2022 Finalist for the 2023 Southern Book Prize A Black mother bumps up against the limits of everything she thought she believed—about science and medicine, about motherhood, and about her faith—in search of the truth about her son. One morning,

Tophs, Taylor Harris's round-cheeked, lively twenty-two-month-old, wakes up listless, only lifting his head to gulp down water. She rushes Tophs to the doctor, ignoring the part of herself, trained by years of therapy for generalized anxiety disorder, that tries to whisper that she's overreacting. But at the hospital, her maternal instincts are confirmed: something is wrong with her boy, and Taylor's life will never be the same. With every question the doctors answer about Tophs's increasingly troubling symptoms, more arise, and Taylor dives into the search for a diagnosis. She spends countless hours trying to navigate health and education systems that can be hostile to Black mothers and children; at night she googles, prays, and interrogates her every action. Some days, her sweet, charismatic boy seems just fine; others, he struggles to answer simple questions. A long-awaited appointment with a geneticist ultimately reveals nothing about what's causing Tophs's drops in blood sugar, his processing delays—but it does reveal something unexpected about Taylor's own health. What if her son's challenges have saved her life? *This Boy We Made* is a stirring and radiantly written examination of the bond between mother and child, full of hard-won insights about fighting for and finding meaning when nothing goes as expected.

The Pampered Child Syndrome May 30 2022 The Pampered Child Syndrome is a welcome source of advice for parents or professionals working with children who are given all the love and care they need, yet who remain unhappy, anxious or angry. This book argues that we live in a society where real progress has been made in the development of child-centered parenting, education and care, but that this cultural shift has produced a generation of children who are entitled to the same rights as adults but not ready to accept grown-up responsibilities - children who are 'loved too much'. Dr. Maggie Mamen describes common characteristics of the pampered child, and offers practical advice on how to strike an effective balance between caring for and nurturing children while at the same time maintaining authority and respect. The Pampered Child Syndrome also tackles the difficult issue of child mental health. Drawing on her professional expertise as a clinical psychologist, Dr. Maggie Mamen outlines how the 'symptoms' of the pampered child can be similar to those used to diagnose many common emotional, behavioral, and psychiatric disorders. She flags up the danger of misdiagnosis and asserts the critical importance of maintaining a distinction, offering clear guidance on identifying genuine disorders. This book will offer valuable support and encouragement to parents, teachers, and health and social care professionals who want to raise children who are confident, happy, healthy, and socially aware.

The Samson Syndrome Oct 11 2020 Why do some strong men fail while others succeed? Like the biblical character Samson, all strong men—those who are successful, influential, self-confident, aggressive, or widely respected—face twelve tendencies that can lead to sin and even

personal tragedy. The adventurous and gifted Samson—whose story is told in four chapters of the book of Judges—never had the intention of fighting against God. He was just a fun-loving guy looking for a good time. Like so many strong men today, he didn't think his sin was any big deal. But it's clear as you read his story that the older he got, the more sin held him in its grip. The Samson Syndrome is a set of twelve tendencies or challenges that strong men will always face. Obstacles like lust, ignoring good advice, big egos, fears of authentic intimacy, losing sight of the big picture, and others, have the ability to be any man's undoing. Atteberry's mission is to remind men of the joy of living within God's boundaries, because he believes there's a little Samson in all of us. With God's help we're capable of such great things. But we're never more than one bad choice away from humiliation. However, it doesn't have to be that way if you want to fulfill your God-given potential.

Dead Boys Walking Jan 02 2020 It doesn't take much to become a dead boy walking in America or elsewhere and on a collision course with early death or some other form of youth related violence. For a young African-

American named Trayvon Martin, all it took was to run into a young white wannabe police packing a gun and willing to use it. He was shot to death in Sanford, Florida in a tragic case which exploded into the headlines in March 2012. For others, it is driving a nice car in a white neighborhood in a major American city, the way it happened to Syracuse native, Johnnie Gamage in Pittsburgh. He was shot and killed by Pittsburgh police. He was driving a Jaguar owned by his uncle, Ray Seals, formerly of Pittsburgh Steelers football team For Stanley Tookie Williams, popular for all the wrong reasons yet nominated for the Nobel Peace Prize, it is for crimes he was charged with and executed as the leader of the CRIPS gang in Los Angeles. For many others too many list to list here, it is being at the wrong place at the wrong time when a drive-by-shooting occurs. For many more around the globe, you are a dead boy walking when you are born in a war torn country and are forced into an army as a child soldier.

Ghost Boy Sep 09 2020 In January 1988, aged twelve, Martin Pistorius fell inexplicably sick. First he lost his voice and stopped eating; then he slept constantly and shunned human contact. Doctors were mystified. Within eighteen months he was mute and wheelchair-bound. Martin's parents were told that an unknown degenerative disease had left him with the mind of a baby and he probably had less than two years to live.

Martin went on to be cared for at centres for severely disabled children, a shell of the bright, vivacious boy he had once been. What no-one knew is that while Martin's body remained unresponsive his mind slowly woke up, yet he could tell no-one; he was a prisoner inside a broken body. Then, in 1998, when Martin was twenty-three years old, an aromatherapy masseuse began treating him and sensed some part of him was alert. Experts were dismissive, but his parents persevered and soon realised their son was as intelligent as he'd always been. With no memory of the time before his illness, Martin was a man-child reborn in a world he didn't know. He was still in a wheelchair and unable to speak, but he was brilliantly adept at computer technology. Since then, and against all odds, he has fallen in love, married and set up a design business which he runs from his home in Essex. Ghost Boy is an

incredible, deeply moving story of recovery and the power of love. Through Martin's story we can know what it is like to be here and yet not here - unable to communicate yet feeling and understanding everything. Martin's emergence from his darkness enables us to celebrate the human spirit and is a wake-up call to cherish our own lives. *The Boy Who Loved Too Much* Oct 23 2021 What would it be like to see everyone as a friend?
