**Gravel Roads** Aug 19 2021 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

**The Myth Of Laziness** Dec 11 2020 One of the most common complaints parents hear is that their child has great potential but is lazy. In the workplace one hears that a colleague is brilliant but just can't seem to deliver on time. Dr Levine believes that in reality very few people are truly lazy. Nearly all 'lazy' children and unproductive adults are in fact suffering from some sort of 'output failure,' that is, some problem of the mind that inhibits their productivity, despite their good intentions. In this book Dr Levine draws heavily on his years of clinical experience to construct the stories of representative children and adults who failed to be productive for the most common reasons. Too often we focus only on failure but people benefit enormously from recognition of their successes. In explaining outside or environmental factors that can affect productivity, Dr Levine points to the role of parents as well as teachers in identifying a child's weaknesses and nurturing the capacity to deliver, with such practical suggestions as describing the ideal study environment for a child. Whether the problem is manifested in motor breakdown, memory shortfall, verbal problems, lack of mental energy or underlying disorganization, Dr Levine provides a workable solution and dismisses the 'lazy' label.
