Exposure Oct 19 2021 The notion of «exposure» underlies much modern thinking about identity, representation, ethics, desire and sexuality. This provocative notion is explored in a collection of essays selected from, and inspired by, the proceedings of a conference held in the Department of French at the University of Cambridge in 2002. The authors engage with exposure as both object and mode of representation in a range of cultural media: literature, critical theory, visual art and film. They analyse a variety of works from the medieval, early-modern, and modern periods, examining not only canonical texts such as Montaigne's Essais but also lesser-studied works such as the psychoanalytic theory of Didier Anzieu, the photomontage self-portraits of Claude Cahun, and the novel La Nouvelle Pornographie by Marie Nimier. This volume thus both illustrates and, more importantly, interrogates the richness of the term «exposure», in a way that is stimulating for students and researchers alike.

NOC and NIC Linkages to NANDA-I and Clinical Conditions - E-Book Jun 22 2019 Based on ongoing research conducted by investigative teams at the University of Iowa, NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you

develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses. Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. Tabular format allows you to quickly retrieve information. Case studies with nursing care plans demonstrate the practical, real-life application of linkages. Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. Serves as an excellent companion to Nursing Outcomes Classification (NOC), 4th Edition and Nursing Interventions Classification (NIC), 5th Edition. NEW! Added linkages to common medical diagnoses help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care. - Includes 15-20 high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span. - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma. NEW! Treatment of Intervention content makes information easier to locate by listing interventions as Major Interventions and Suggested Interventions. Two NEW chapters discuss the use of linkages for clinical reasoning and quality improvement and the use of NNN in computerized information systems. NEW! Information associated with the risk for nursing diagnosis is contained on a single page for quick and easy reference.

Rehabilitation for the Unwanted Jan 10 2021 This book is a study detailing what happens to people and what life is like in a

rehabilitation program. The program discussed is embedded in an institution, called "Farewell Hospital" by the authors, that was designed to fill a demand for facilities for those judged unable to live on their own. Due to physical or mental handicaps and no family, friends, or other social agents who are willing to make a home for them outside of a public institution, these patients were placed in a rehabilitation unit. Most patients were placed with the rehabilitation unit as a brief interlude before their permanent placement in the custodial unit of the vast institution where they would live out their lives. This work deals with the question of what happens to patients once they are rehabilitated and the non-therapeutic rules and practices of the health and welfare structure of which they are a part. In this case, the rehabilitation specialists and ward workers set themselves the task of improving the life chances of their clients by treating their ailments when possible and by improving their physical functioning so that they were better able to care for their own needs. The authors examine the effects of the organizational relationships on rehabilitation outcomes and on the lives of the people who make hospitals their home. The text attempts to sustain feeling for the historical context of their study the "problem" of larger numbers of disabled, poverty-stricken persons, who are no longer wanted by anyone and asserts that a "solution" must be found.
