Mycoremediation and Environmental Sustainability Apr 12 2021 Volume 3 covers recent research with expanded coverage on this important area of remediation. Mycoremediation is the form of bioremediation in which fungi-based technology is used to decontaminate the environment. Fungi are among the primary saprotrophic organisms in an ecosystem, as they are efficient in the decomposition of organic matter. Wood-decay fungi, especially white rot, secretes extracellular enzymes and acids that break down lignin and cellulose. Fungi have been proven to be a very cost-effective and environmentally-friendly way for helping to remove a wide array of toxins from damaged environments or wastewater. These toxins include heavy metals, persistent organic pollutants, textile dyes, leather tanning industry chemicals and wastewater, petroleum fuels, polycyclic aromatic hydrocarbon, pharmaceuticals and personal care products, pesticides and herbicides, in land, fresh water and marine environments. Bioremediation of toxic organics by fungi is the most sustainable and green route for cleanup of contaminated sites and we discuss the multiple modes employed by fungi for detoxification of different toxic and recalcitrant compounds including prominent fungal enzymes viz., catalases, general lipase, laccases, peroxidases and sometimes intracellular enzymes, especially the cytochrome P450 monooxygenases. Fungi play an important role in the biogeochemical cycling of manganese and other redox-active metals, which is related to their ability to survive radiation and other oxidative challenges. This book covers recent research with more detail on the various types of fungi and associated fungal processes used to clean up wastes and wastewaters in contaminated environments, and discusses their potential for environmental applications.

Reservoir Engineering Techniques Using Fortran Jan 28 2020 Practical reservoir engineering techniques have been adequately described in various publications and textbooks, and virtually all useful techniques are suit able for implementation on a digital computer. Computer programs have been written for many of these techniques, but the source programs are usually not available in published form. The purpose of this book is to provide a central source of FORTRAN-coded algorithms for a wide range of conventional reservoir engineering techniques. The book may be used as a supplementary text for courses in practical reservoir engineering. However, the book is primarily intended for practicing reservoir engineers in the hope that the collection of programs provided will greatly facilitate their work. In addition, the book should be also helpful for non-petroleum engineers who are involved in applying the results of reservoir engineering analysis. Sufficient information is provided about each of the techniques to allow the book to be used as a handy reference. ix INTRODUCTION This book provides many of the useful practical reservoir engineering (conventional) techniques used today in the form of FORTRAN codes. The primary objectives have been to provide the simplest possible method for obtaining reliable answers to practical problems. Unfortunately, these codes can usually be applied by simply following a cookbook approach. However, if at all possible, the solutions obtained should be verified and cross-checked by some other means and, most important, should be checked for reasonability.

Engineered Materials Handbook, Desk Edition Oct 19 2021 A comprehensive reference on the properties, selection, processing, and applications of the most widely used nonmetallic engineering materials. Section 1, General Information and Data, contains information applicable both to polymers and to ceramics and glasses. It includes an illustrated glossary, a collection of engineering tables and data, and a guide to materials selection. Sections 2 through 7 focus on polymeric materials—plastics, elastomers, polymer-matrix composites, adhesives, and sealants—with the information largely updated and expanded from the first three volumes of the Engineered Materials Handbook. Ceramics and glasses are covered in Sections 8 through 12, also with updated and expanded information. Annotation copyright by Book News, Inc., Portland, OR

Lewis Henry Morgan and the Invention of Kinship Jan 10 2021 Lewis Henry Morgan of Rochester, New York, lawyer and pioneering anthropologist, was the leading American contributor of his generation to the social sciences. Among the classic works whose conjunction in the 1860s gave modern anthropology its shape, Morgan's massive and technical *Systems of Consanguinity and Affinity of the Human Family* was decisive. Thomas R. Trautmann offers a new interpretation of the genesis of "kinship" and of the role it played in late nineteenth-century intellectual history. This Bison Books edition features a new introduction and appendices by the author.

Modeling and Simulating Cardiac Electrical Activity Jul 28 2022 This book provides a thorough introduction to the topic of mathematical modeling of electrical activity in the heart, from molecular details of ionic channel dynamics to clinically derived patient-specific models. It discusses how cellular ionic models are formulated, introduces commonly used models and explains why there are so many different models available. The chapters cover modeling of the intracellular calcium handling that underlies cellular contraction as well as modeling molecular-level details of cardiac ion channels, and also focus on specialized topics such as cardiomyocyte energetics and signalling pathways. It is an excellent resource for experienced and specialised researchers in the field, but also biological scientists with a limited background in mathematical modelling and computational methods. Part of Biophysical Society-IOP series.

Disciple IV Feb 29 2020 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings.

Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Intelligent Control Systems with an Introduction to System of Systems Engineering Dec 09 2020 From aeronautics and manufacturing to healthcare and disaster management, systems engineering (SE) now focuses on designing applications that ensure performance optimization, robustness, and reliability while combining an emerging group of heterogeneous systems to realize a common goal. Use SoS to Revolutionize Management of Large Organizations, Factories, and Systems Intelligent Control Systems with an Introduction to System of Systems Engineering integrates the fundamentals of artificial intelligence and systems control in a framework applicable to both simple dynamic systems and large-scale system of systems (SoS). For decades, NASA has used SoS methods, and major manufacturers—including Boeing, Lockheed-Martin, Northrop-Grumman, Raytheon, BAE Systems—now make large-scale systems integration and SoS a key part of their business strategies, dedicating entire business units to this remarkably efficient approach. Simulate Novel Robotic Systems and Applications Transcending theory, this book offers a complete and practical review of SoS and some of its fascinating applications, including: Manipulation of robots through neural-based network control Use of robotic swarms, based on ant colonies, to detect mines Other novel systems in which intelligent robots, trained animals, and humans cooperate to achieve humanitarian objectives Training engineers to integrate traditional systems control theory with soft computing techniques further nourishes emerging SoS technology. With this in mind, the authors address the fundamental precepts at the core of SoS, which uses human heuristics to model complex systems, providing a scientific rationale for integrating independent, complex systems into a single coordinated, stabilized, and optimized one. They provide readers with MATLAB® code, which can be downloaded from the publisher's website to simulate presented results and projects that offer practical, hands-on experience using concepts discussed throughout the book.

Fallocaust Sep 25 2019 Over two hundred and thirty years ago the Fallocaust happened, killing almost everything that lived and creating what is now known as the greywastes. A dead wasteland where cannibalism is a necessity, death your reality, and life before the radiation nothing but pictures in dog-eared magazines. Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust. He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

Harry Johnson's Bartenders Manual 1934 Reprint Feb 20 2022 Complete Reprint of Harry Johnson's Bartenders' Manual, originally published 1882. "Harry Johnson was a professional bartender for most of his life and along with Jerry Thomas he was one of the first to write about his trade. Harry's rather opinionated thoughts on the bartending profession and how to run a bar, which takes up the first third of the book, make for a fascinating insight in to the world of nineteenth century bars. He wasn't afraid of boasting, describing one of his bars as "what was generally recognized to be the largest and finest establishment of the kind in this country," but the advice is clearly spoken from the heart about a profession he really believes in."

G Protein-Coupled Receptors in Drug Discovery Jun 02 2020 The G protein-coupled receptors (GPCRs) and associated peripheral G proteins underpin a multitude of physiological processes. The GPCRs represent one of the largest superfamilies in the human genome and are a significant target for bioactive and drug discovery programs. It is estimated that greater than 50% of all drugs, including those in development, currently target GPCRs. Many of the characterized GPCRs have known ligands; however, approximately 20% of GPCRs are described as orphan GPCRs, apparent GPCRs that share the generic high-level structure characteristic of GPCRs but whose endogenous ligand is not known. Therefore, it is expected that the field of GPCR drug discovery and development will greatly expand in the coming years with emphasis on new generations of drugs against GPCRs with unique therapeutic uses which may include drugs such as allosteric regulators, inverse agonists, and identification of orphan GPCR ligands.

As we learn more about the molecular signaling cascades following GPCR activation, we acquire a better appreciation of the complexity of cell signaling and as a result, also acquire a vast array of new molecular methods to investigate these and other processes. The general aim of this book is to provide researchers with a range of protocols that may be useful in their GPCR drug discovery programs. It is also the basis for the development of future assays in this field. Therefore, the range of topics covered and the appropriate methodological approaches in GPCR drug discovery are reflected in this book. It is interesting to note that future directions in drug discovery will require input and collaboration from a plethora of fields of research. As such, this book will likely be of interest to scientists involved in such fields as molecular biology, pharmacology, biochemistry, cellular signaling, and bio-nanotechnology.

Past and Present of Isabella County, Michigan (Classic Reprint) Mar 31 2020 Excerpt from Past and Present of Isabella County, Michigan All life and achievement is evolution: present wisdom comes from past experience, and present commercial prosperity has come only from past exertion and suffering. The deeds and motives of the men that have gone before have been instrumental in shaping the destinies of later communities and states. The development of a new country was at once a task and a privilege. It required great courage. Sacrifice and privation. Compare the present conditions of the people of Isabella county, Michigan. With what they were one hundred years ago. From a trackless wilderness and virgin land, it has come to be a center of prosperity and civilization. With millions of wealth, systems of railways. Grand educational institutions, splendid industries and immense agricultural and timber productions. Can any thinking person be insensible to the fascination of the study which discloses the aspirations and efforts of the early pioneers who so strongly laid the foundation upon which has been reared the magnificent prosperity of later days? To perpetuate the story of these people and to trace and record the social, political and industrial progress of the community from its first inception is the function of the local historian. A sincere purpose to preserve facts and personal memoirs that are deserving of perpetuation, and which unite the present to the past, is the motive for the present publication. The work has been in the hands of able writers, who have, after much patient study and research. Produced here the most complete biographical memoirs of Isabella county, Michigan. Ever offered to the public. A specially valuable and interesting department is that one devoted to the sketches of representative citizens of this county whose records deserve preservation because of their worth. Effort and accomplishment. The publishers desire to extend their thanks to the gentlemen who have so faithfully labored to this end. Thanks are also due to the citizens of Isabella county for the uniform kindness with which they have regarded this undertaking and for their many services rendered in the gaining of necessary information. The Power of Silence Jul 04 2020 This book demonstrates that silence is eloquent, powerful, beautiful and even dangerous. It surrounds and permeates our daily lives. Drawing on a wide range of cross-cultural, literary and historical sources, the author explores the uses and abuses of silence. He explains how silence is not associated with solitude alone but has a much broader value within society. The main themes of *The Power of Silence* are positive and negative uses of silence, and the various ways in which silence has been understood culturally, socially and spiritually. The book's objectives are to equip people with a better appreciation of the value of silence and to enable them to explore its benefits and uses more easily for themselves.

Fundamentals of Dairy Chemistry Aug 17 2021 Fundamentals of Dairy Chemistry has always been a reference text which has attempted to provide a complete treatise on the chemistry of milk and the relevant research. The third edition carries on in that format which has proved successful over four previous editions (*Fundamentals of Dairy Science 1928, 1935 and Fundamentals of Dairy Chemistry 1965, 1974*). Not only is the material brought up-to-date, indeed several chapters have been completely re-written, but attempts have been made to streamline this edition. In view of the plethora of research related to dairy chemistry, authors were asked to reduce the number of references by eliminating the early, less significant ones. In addition, two chapters have been replaced with subjects which we felt deserved attention: "Nutritive Value of Dairy Foods" and "Chemistry of Processing." Since our society is now more attuned to the quality of the food it consumes and the processes necessary to preserve that quality, the addition of these topics seemed justified. This does not minimize the importance of the information in the deleted chapters, "Vitamins of Milk" and "Frozen Dairy Products." Some of the material in these previous chapters has been incorporated into the new chapters; furthermore, the information in these chapters is available in the second edition, as a reprint from ADASA (Vitamins in Milk and Milk Products, November 1965) or in the many texts on ice cream manufacture.

Marketing Analytics Nov 07 2020 Helping tech-savvy marketers and data analysts solve real-world business problems with Excel Using data-driven business analytics to understand customers and improve results is a great idea in theory, but in today's busy offices, marketers and analysts need simple, low-cost ways to process and make the most of all that data. This expert book offers the perfect solution. Written by data analysis expert Wayne L. Winston, this practical resource shows you how to tap a simple and cost-effective tool, Microsoft Excel, to solve specific business problems using powerful analytic techniques—and achieve optimum results. Practical exercises in each chapter help you apply and reinforce techniques as you learn. Shows you how to perform sophisticated business analyses using the cost-effective and widely available Microsoft Excel instead of expensive, proprietary analytical tools Reveals how to target and retain profitable customers and avoid high-risk customers Helps you forecast sales and improve response rates for marketing campaigns Explores how to optimize price points for products and services, optimize store layouts, and improve online advertising Covers social media, viral marketing, and how to exploit both effectively Improve your marketing results with Microsoft Excel and the invaluable techniques and ideas in *Marketing Analytics: Data-Driven Techniques with Microsoft Excel*.

Tropical Agriculture in Transition — Opportunities for Mitigating Greenhouse Gas Emissions? Sep 17 2021 Production from tropical agricultural systems will need to increase to satisfy the rising food demand of an increasing population coupled with changes in consumption patterns. At the same time, the agricultural sector is a significant source of greenhouse gases (GHG) in many developing countries, which can be attributed mainly to land-use change and methane emissions from rice and livestock. But how can we reconcile less GHG emissions from tropical agricultural systems while increasing productivity? Due to the interactive nature of these issues, this book is compiled of articles on natural resource management, as well as the socio-economic aspects of GHG mitigation. The scope of mitigation options in tropical agriculture is discussed for three different activities: (a) agroforestry; (b) rice-based production systems; (c) pasture/animal husbandry. Agronomic solutions alone will not be sufficient, as the institutional and economic frameworks within which farmers operate dictate whether a recommended agronomic management practice is acceptable. The prevention of deforestation, and the re-forestation of degraded land, could become key elements to national climate protection programs of some developing countries. Alternative management practices in rice-based and pasture systems may offer win-win options to reduce emissions and improve resource-use efficiencies.

Why We Hate Aug 24 2019 "In the post-9/11 struggle for a sane global vision, this antihate manifesto could not be more timely." —O: The Oprah Magazine In this acclaimed volume, Pulitzer Prize nominated science writer Rush W. Dozier Jr. demystifies our deadliest emotion—hate. Based on the most recent scientific research in a range of fields, from anthropology to zoology, *Why We Hate* explains the origins and manifestations of this toxic emotion and offers realistic but hopeful suggestions for defusing it. The strategies offered here can be used in both everyday life to improve relationships with family and friends as well as globally in our efforts to heal the hatreds that fester within and among nations of the world.

Ethnic Minorities in the Labour Market May 26 2022 The welfare of ethnic minority individuals in Britain depends critically on how they fare in the labour market. This report provides a detailed empirical analysis of labour market outcomes and explores how ethnically diverse these outcomes are and how they have changed over time. Specifically, the report looks at how changes in labour market outcomes are related to the demographic characteristics of minority groups. It investigates the occupational attainment and earnings of ethnic minority groups in employment, analysing men and women separately throughout. The report concludes with implications for government policy towards ethnic minorities in the labour market. Ethnic minorities in the labour market is aimed at policy makers, economists, social scientists and academics who are concerned about the welfare of Britain's ethnic minorities. It provides a timely and detailed analysis of an issue increasingly seen to be key to the understanding of social cohesion.

60 Years of Holden Jul 24 2019 "60 Years of Holden" builds on the success of its predecessors (45 and 50 Years of Holden), bringing together vast amounts of technical information and specifications on the 100 model series that Holden has produced since it began manufacturing. Beginning with Holden's pre-1948 history, this book charts Holden's course in Australia, with

Phobic and Anxiety Disorders in Children and Adolescents Oct 26 2019 Compact, authoritative guidance to effective assessment and treatment of the most common psychological difficulties in children and adolescents - phobia and anxiety disorders This authoritative but compact text addresses the psychopathology, assessment, and treatment of the anxiety disorders and phobias in childhood and adolescence. These perplexing conditions are the most prevalent psychological difficulties in young people and result in considerable impairment and distress, not only to the child but also to her or his family. Effective treatments exist, but unfortunately many of these interventions are either not known to the practicing professionals or not used by them. This volume aims to address this gap and to present these interventions in a clear and straightforward manner.

Suriname Jul 16 2021 This paper reviews economic developments in Suriname during 1994–96. In 1995, there was a major turnaround in Suriname's economic and financial situation following the expansionary fiscal and monetary policies pursued in the first half of the 1990s and the political and economic disruptions of the 1980s. The marked improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.

The Wiley Encyclopedia of Personality and Individual Differences, Personality Processes and Individual Differences May 02 2020 Volume 3, Personality Processes and Individual Differences of the Wiley Encyclopedia of Personality and Individual Differences The Encyclopedia of Personality and Individual Differences (EPID) is organized into four volumes that look at the many likenesses and differences between individuals. Each of these four volumes focuses on a major content area in the study of personality psychology and individuals' differences. The first volume, Models and Theories, surveys the significant classic and contemporary viewpoints, perspectives, models, and theoretical approaches to the study of personality and individuals'

differences (PID). The second volume on Measurement and Assessment examines key classic and modern methods and techniques of assessment in the study of PID. Volume III, titled Personality Processes and Individual Differences, covers the important traditional and current dimensions, constructs, and traits in the study of PID. The final volume discusses three major categories: clinical contributions, applied research, and cross-cultural considerations, and touches on topics such as culture and identity, multicultural identities, cross-cultural examinations of trait structures and personality processes, and more. Each volume contains approximately 100 entries on personality and individual differences written by a diverse international panel of leading psychologists. Covers significant classic and contemporary personality psychology models and theories, measurement and assessment techniques, personality processes and individual differences, and research. Provides a comprehensive and in-depth overview of the field of personality psychology. The Encyclopedia of Personality and Individual Differences is an important resource for all psychology students and professionals engaging in the study and research of personality.

Artificial Intelligence in Education Sep 05 2020 This two-volume set LNAI 12163 and 12164 constitutes the refereed proceedings of the 21th International Conference on Artificial Intelligence in Education, AIED 2020, held in Ifrane, Morocco, in July 2020.* The 49 full papers presented together with 66 short, 4 industry & innovation, 4 doctoral consortium, and 4 workshop papers were carefully reviewed and selected from 214 submissions. The conference provides opportunities for the cross-fertilization of approaches, techniques and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics as well as many domain-specific areas. *The conference was held virtually due to the COVID-19 pandemic.

Concise Mushroom Guide May 14 2021 This practical guide is packed with information on 200 species of fungi found in Britain and the near Continent. There's an incredible variety that exists within the world of fungi, from the better-known groups such as the boletes and russulas, to more esoteric and often strangely shaped types like bracket fungi, clubs, corals, puffballs, stinkhorns and elfcups. Each species account in this guide contains accurate artworks that show details such as fungi shape and other aspects of appearance that change during their lives. A concise written account further outlines size, description, habitat and the season in which each fungus may be found. The easy-to-follow layouts and illustrations aid quick and precise identification, making this book an indispensable reference in the field as well as at home.
