operative treatment of fractures was in danger of falling into oblivion. Maurice E. Muller, impressed and intrigued by his contacts with Danis, first critically applied internal fixation and immediate mobilization to some 80 patients and found the basic concept confirmed, but in need of further development with regard to technology, clinical application, and scientific analysis. In 1958 he assembled a group of friends, general and orthopedic surgeons, willing to invest time and effort in helping to create the necessary armamentarium and to form a study group for clinical

trials. This group was set up in the same year under the name Arbeitsgemeinschaft für Osteosynthesefragen (AO), later on to be known in English-speaking countries as the Association for the Study of Internal Fixation (ASIF). The first report on operative treatment of fractures by Muller, Allgower, and Willenegger, published in 1963, stressed the advantages of early open reduction and internal fixation. This book, first published in German, amusingly lost an important part when translated into English. At the suggestion of worried American and English partners, a picture series

showing the healing pattern of 188 tibial fractures operated on in Chur between December 20, 1961 and April 26, 1962 was left out.

SOE Manual Aug 30 2020 The actual course given to all secret agents in SOE before working behind enemy lines. It includes everything you needed to know to go undercover - from documents, cover stories and how to live off the land to how to get through an interrogation. The Special Operations Executive (SOE) was a secret British World War II organisation formed in 1940 to conduct espionage, sabotage and reconnaissance in occupied Europe against the Axis powers, and to aid local resistance movements. In late 1942, SOE was asked to increase the number of

agents to aid the invasion of mainland Europe. Part of agent training was 'tradecraft' - the practical details on how to be a clandestine agent behind enemy lines - which every agent had to attend at various bases centred around Beaulieu in Hampshire. The course was a set of lectures and this book contains the actual text of those lectures which were discovered in the National Archives this year. It is not only a fascinating insight into the workings of one of the Second World Wars most famous and secretive organisations, but is also a reminder of the huge danger anyone being

dropped behind enemy lines had to face. SYLLABUS Introduction to Course. Individual Security. Informant Service. Cover. Interrogations. Operational Orders. Know your Enemy. Surveillance. How would you involve all stakeholders in a critical issue or the organization's future? How can you generate contributions, consensus and commitment from the bottom up? People want to contribute but often are frustrated through a lack of opportunity or means. Large Group Processes allow people to participate over things that matter to them.
