**ANIMALS** Apr 26 2022 An innovative and insightful look at our relationship with animals in the age of the Anthropocene from bestselling author Henry Carroll with original images from an innovative array of contemporary photographers See through the eyes of a new generation of photographers responding to the rapidly unfolding issues shaping our lives. In this series of small, revealing, and beautifully presented books, Henry Carroll, the bestselling photography writer of the last decade, considers the ideas behind images to present personal perspectives on climate change, race, sexuality, gender, faith, inequality, beauty, power, and the natural world. In this second book of the series, ANIMALS, Carroll deep-dives into an ecosystem of contemporary images to consider how we relate to animals in the Anthropocene. His accessible analysis of emotive imagery suggests that our appreciation for some animals and disregard, or repulsion, for others is shaped by our own physicality as much as theirs. He shows how the conventions of natural history offer a very politicized understanding of fauna and how the role of animals as spiritual, cultural, and personal symbols can be an equally valid means of classification. Carroll reflects on the psychological power struggles infusing our daily interactions with animals and unpacks the photographers' visual insights relating to our treatment of animals, whether it's the way we pamper them as pets or consume them to excess. In this diverse collection of arresting images and engaging text, Carroll regards the photographers as modern-day philosophers, original thinkers who show us how to fuse technique, concept, and imagination in order to pose intriguing questions about the animal kingdom and human nature. For both the creators and consumers of images, this timely book contains a treasure trove of meaningful visual reflections that will prompt you to rethink your relationship with animals both domestic and wild.

**LAND** Nov 02 2022 A provocative look at our relationship to the natural world from bestselling author and art writer Henry Carroll, with images from today's most innovative photographers How do the most diverse and relevant voices of contemporary photography respond to the urgent issues of today? In this series of small, insightful, and beautifully presented books, Henry Carroll, the bestselling photography writer of the last decade, unpacks the ideas behind images to reflect on race, gender, faith, inequality, beauty, politics, and our shifting relationship to animals, nature, and the environment. *Land: Photographs That Make You Think* considers humanity's changing relationship with the natural world, a relationship that has seen us edge further away from real encounters. The photographs explore how the sublime can be commodified, packaged, and distributed, leading to an alarming emotional distancing. With images from a diverse group of photographers, Carroll explores the impermanence of borders, the human reaction to scenes of devastation on Instagram feeds, and the many variables that inform one's relationship to land. He considers how a photographer's response to landscape is subjective, full of meaning that's colored by their own psyches, foibles, fears, and hopes. With captivating and striking photography, Carroll invites the reader to contemplate how their inner world influences their interactions with the natural world.

**What Do We Need Men For?** Aug 26 2019 As seen on the cover of *New York Magazine*, America's longest running advice columnist goes on the road to speak to women about hideous men and whether we need them. "Carroll's lively prose careens in constant pursuit of pleasure...indefatigably funny and full of life." -Lindsay Zoladz, *The Ringer* "Darkly humorous and deadly serious." -Sibbie O'Sullivan, *Washington Post* "A compulsively interesting feminist memoir." -Virginia Heffernan, *Slate* "Somehow hilarious, in the way that only E. Jean could have written it" -Leigh Haber, *Oprah Magazine* "Roving, curious, compassionate, whimsical." -Megan Garber, *The Atlantic* When E. Jean Carroll—possibly the liveliest woman in the world and author of the "Ask E. Jean" advice column in *Elle Magazine*, realized that her eight million readers and question-writers all seemed to have one thing in common—problems caused by men—she hit the road. Crisscrossing the country with her blue-

haired poodle, Lewis Carroll, E. Jean stopped in every town named after a woman between Eden, Vermont and Tallulah, Louisiana to ask women the crucial question: What Do We Need Men For? E. Jean gave her rollicking road trip a sly, stylish turn when she deepened the story, creating a list called "The Most Hideous Men of My Life," and began to reflect on her own sometimes very dark history with the opposite sex. What advice would she have given to her past selves—as Miss Cheerleader USA and Miss Indiana University? Or as the fearless journalist, television host, and eventual advice columnist she became? E. Jean intertwines the stories of the fascinating people she meets on her road trip with her "horrible history with the male sex" (including mafia bosses, media titans, boyfriends, husbands, a serial killer, and a president), creating a decidedly dark yet hopeful, hilarious, and thrilling narrative. Her answer to the question What Do We Need Men For? will shock men and delight women.

**Win Forever** Oct 21 2021 "I know that I'll be evaluated in Seattle with wins and losses, as that is the nature of my profession for the last thirty-five years. But our record will not be what motivates me. Years ago I was asked, 'Pete, which is better: winning or competing?' My response was instantaneous: 'Competing. . . because it lasts longer.'" Pete Carroll is one of the most successful coaches in football today. As the head coach at USC, he brought the Trojans back to national prominence, amassing a 97-19 record over nine seasons. Now he shares the championship-winning philosophy that led USC to seven straight Pac-10 titles. This same mind-set and culture will shape his program as he returns to the NFL to coach the Seattle Seahawks. Carroll developed his unique coaching style by trial and error over his career. He learned that you get better results by teaching instead of screaming, and by helping players grow as people, not just on the field. He learned that an upbeat, energetic atmosphere in the locker room can coexist with an unstoppable competitive drive. He learned why you should stop worrying about your opponents, why you should always act as if the whole world is watching, and many other contrarian insights. Carroll shows us how the Win Forever philosophy really works, both in NCAA Division I competition and in the NFL. He reveals how his recruiting strategies, training routines, and game-day rituals preserve a team's culture year after year, during championship seasons and disappointing seasons alike. *Win Forever* is about more than winning football games; it's about maximizing your potential in every aspect of your life. Carroll has taught business leaders facing tough challenges. He has helped troubled kids on the streets of Los Angeles through his foundation A Better LA. His words are true in any situation: "If you want to win forever, always compete."

matches compulsory viewing. In particular, his brutal encounters with Newcastle rival Paul "Chief" Harragon are legendary and have been viewed across the globe. In SPUDD, both men lift the lid on their volatile relationship, including the day they refused to room with each other when selected for the NSW State of Origin team. **Something Deeply Hidden** Nov 09 2020 INSTANT NEW YORK TIMES BESTSELLER A Science News favorite science book of 2019 As you read these words, copies of you are being created. Sean Carroll, theoretical physicist and

one of this world's most celebrated writers on science, rewrites the history of 20th century physics. Already hailed as a masterpiece, *Something Deeply Hidden* shows for the first time that facing up to the essential puzzle of quantum mechanics utterly transforms how we think about space and time. His reconciling of quantum mechanics with Einstein's theory of relativity changes, well, everything. Most physicists haven't even recognized the uncomfortable truth: physics has been in crisis since 1927. Quantum mechanics has always had obvious gaps—which have come to be simply ignored. Science popularizers keep telling us how weird it is, how impossible it is to understand. Academics discourage students from working on the "dead end" of quantum foundations. Putting his professional reputation on the line with this audacious yet entirely reasonable book, Carroll says that the crisis can now come to an end. We just have to accept that there is more than one of us in the universe. There are many, many Sean Carrolls. Many of every one of us. Copies of you are generated thousands of times per second. The Many Worlds Theory of quantum behavior says that every time there is a quantum event, a world splits off with everything in it the same, except in that other world the quantum event didn't happen. Step-by-step in Carroll's uniquely lucid way, he tackles the major objections to this otherworldly revelation until his case is inescapably established. Rarely does a book so fully reorganize how we think about our place in the universe. We are on the threshold of a new understanding—of where we are in the cosmos, and what we are made of.

**The Rust Programming Language (Covers Rust 2018)** Jan 30 2020 The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming

language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features—from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as:

- Ownership and borrowing, lifetimes, and traits
- Using Rust's memory safety guarantees to build fast, safe programs
- Testing, error handling, and effective refactoring
- Generics, smart pointers, multithreading, trait objects, and advanced pattern matching
- Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies
- How best to use Rust's advanced compiler with compiler-led programming techniques

You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server.
