*Medium of Instruction Policies* Nov 25 2021 Medium of instruction policies in education have considerable impact not only on the school performance of students and the daily work of teachers, but also on various forms of social and economic (in)equality. In many multiethnic and multilingual countries, the choice of a language for the medium of instruction in state educational systems raises a fundamental and complex educational question: what combination of instruction in students' native language(s) and in a second language of wider communication will ensure that students gain both effective subject-content education, as well as the second-language skills necessary for higher education and employment? Beyond this educational issue of choice of language(s) of instruction, medium of instruction policies are also linked to a range of important sociopolitical issues, including globalization, migration, labor policy, elite competition, and the distribution of economic resources and political power. The contributors to this volume examine the tension between the educational agendas and other social and political agendas underlying medium of instruction policies in different countries around the world, and unravel the connections between these policies and the related, critically important educational, social, political, and economic issues. *Medium of Instruction Policies: Which Agenda? Whose Agenda?* is intended for scholars and specialists in education, language policy, sociolinguistics, applied linguistics, and language teaching, and is intended for use in graduate and advanced undergraduate courses on language education and language policy.

*Educability and Group Differences* Jul 02 2022 Jensen is a controversial figure, largely for his conclusions based on his and other research regarding the causes of race based differences in intelligence and in this book he develops more fully the argument he formulated in his controversial *Harvard Education Review* article 'How Much Can We Boost IQ and Scholastic Achievement?'. In a wide-ranging survey of the evidence he argues that measured IQ reveals a strong hereditary component and he argues that the system of education which assumes an almost wholly environmentalist view of the causes of group differences capitalizes on a relatively narrow category of human abilities. Since its original publication the controversy surrounding Jensen's ideas has continued as successive generations of psychologists, scientists and policy-makers have grappled with the same issues.

*Children's Book of Art Jun 20 2021 Welcome to the greatest gallery on Earth. Put yourself in the picture with this incredible visual guide displaying the best artistic works of all time. You're the very special guest with unlimited access to the world's most important art through the ages, from ancient cave paintings to modern-day street art. On your journey through time you'll see a wealth of valuable art, including Egyptian tomb paintings, Roman frescoes, Byzantine mosaics, and Chinese porcelain. Special attention is given to art from different eras, such as Aboriginal Dreamtime, Renaissance period, impressionism, contemporary art, and much, much more. Watch the progression of artistic styles and techniques, such as oil painting, watercolour, pastels, and sculpture. Leonardo da Vinci, Claude Monet, Vincent van Gogh, Pablo Picasso, Frida Kahlo, Jackson Pollock, and Andy Warhol are just some of the big names from the past and present featured inside. Every talent's work is showcased through a signature piece supported by illuminating text, giving you a unique tour of each prestigious work of art. Budding artists, this is all the inspiration you need to make your own masterpiece.*

*The Enclosure Maps of England and Wales 1595-1918 Aug 03 2022 This book offers the first comprehensive study of the enclosure mapping of England and Wales. Enclosure maps are fundamental sources of evidence in many types of historical inquiries. Although modern historians tend to view these large-scale maps essentially as sources of data on past economies and societies, this book argues that enclosure maps had a much more active role at the time they were compiled. Seen from this perspective of their contemporary society, enclosure maps are not simply antiquarian curiosities, cultural artefacts, or useful sources for historians but instruments of land reorganisation and control which both reflected and consolidated the power of those who commissioned them. The book is accompanied by a fully searchable, descriptive and analytical web catalogue of all*

*parliamentary and non-parliamentary enclosure maps extant in public archives and libraries and offers an essential research tool for economic, social and local historians and for geographers, lawyers and planners.*
