An Investigation Into the Effective and Ethical Interviewing of Suspected Sex Offenders May 07 2020 Studies show that sexual assault is the offence least likely to be reported to police and, when reported, often does not proceed to court. Two reasons for this are victim reluctance to relive the experience in testimony and cross examination, and the difficulty of presenting a case with no witnesses to corroborate evidence. Research undertaken by the Australian Institute of Criminology has also shown how difficult it is to secure convictions in adult sexual assault cases. This paper reports on a study which investigated ways of improving the likelihood of a guilty offender confessing and is based on interviews with offenders and police. The authors suggest that the credibility of the evidence and the manner in which it is presented to the suspect can affect the likelihood of securing a confession. Although the numbers in the study are relatively small, they are indicative of practical measures that have the potential to improve the efficacy of the criminal justice system for victims of sexual assault.

Sustainable Construction Jun 07 2020 The leading green building reference, updated with the latest advances in the field Sustainable Construction is the leading reference for the design, construction, and operation of high performance green buildings. With broad coverage including architecture, engineering, and construction, this book nevertheless delivers detailed information on all aspects of the green building process, from materials selection to building systems and more. This new fourth edition has been updated to reflect the latest codes and standards, including LEED v4, and includes new coverage of carbon accounting. The discussion has been updated to align with the current thinking on economics, climate change, net zero buildings, and more, with contributions by leaders in the field that illustrate the most recent shifts in thinking and practice. Ancillary materials including an instructor's manual and PowerPoint presentations for each chapter help bring this clear and up-to-date information into the classroom, making this book a valuable reference for working construction professionals. Also, Interactive graphics found throughout the course help activate the content and highlight key concepts for students.

Sustainable construction has gone mainstream, and will one day be the industry norm. This book provides a comprehensive reference to all aspects of a project to show you how green building concepts and principles apply throughout the design and construction process. Get up to date on the latest green building codes and standards Learn about the newest technology in green building materials Adopt the best practices in procurement and delivery systems Apply sustainability concepts to all aspects of construction and design Green buildings operate at a very high level of efficiency, which is made possible only by careful consideration every step of the way. Appropriate land use, landscaping, construction materials, siting, water use, and more all play a role in a structure's ultimate carbon footprint. Sustainable Construction provides clear guidance for all aspects of green building, including the most recent advances and the latest technology.

Forensic Pathology Reviews Vol 3 Feb 02 2020 A collection of cutting-edge accounts of special topics from various fields of forensic pathology and death scene investigation. The authors offer critical insight into the medicolegal investigation of bodies found in water, the forensic aspects of the human immunodeficiency virus (HIV)-1 infection of the central nervous system, deaths in a head-down position, and forensic bitemark analysis. Additional chapters address taphonomic changes in human bodies during the early postmortem interval, arrhythmogenic ventricular dysplasia that produces sudden death in young people, the postmortem diagnosis of death in anaphylaxis, and iatrogenic deaths. The forensic aspects of suicide, murder-suicide, and suicide trends in the United States are also discussed, along with the evaluation of fatal pulmonary thromboembolism and the use of radiology in medicolegal investigations.

Chirality in Drug Research Sep 30 2019 Divided into the three main sections of synthesis, analysis and drug development, this handbook covers all stages of the drug development process, including large-scale synthesis and purification of chirally pure pharmaceuticals. The two editors from academia and a major pharmaceutical company have assembled an experienced, international team who provide first-hand practical advice and report previously unpublished data. In the first section, the isolation of chiral drugs from natural sources, their production in enzymatic processes and the resolution of racemic mixtures in preparative chromatography are outlined in separate chapters. For the section on qualitative and quantitative analysis, enantioselective chromatographic methods are presented as well as optical methods and CE-MS, while the final section deals with the pharmacology, pharmacokinetics and metabolic aspects of chiral drugs, devoting whole chapters to stereoselective drug binding and modeling chiral drug-receptor interactions. With its unique industry-relevant aspects, this is a must for medicinal and pharmaceutical chemists.

Radar Navigation and Maneuvering Board Manual Oct 04 2022 The Radar Navigation and Maneuvering Board Manual (Pub 1310) contains, in a single volume, information on the fundamentals of shipboard radar, radar operation, collision avoidance, navigation by radar, and a description of vessel traffic systems in US waters. Additionally, the publication provides a quick reference to specific relative motion problem solutions including both textual and graphic explanations.

Pub 1310 Nov 12 2020 The 2001 edition of Pub. 1310 Radar Navigation and Maneuvering Board Manual combines selected chapters from the sixth edition of Pub. 1310, Radar Navigation Manual, and the fourth edition of Pub. 217, Maneuvering Board Manual. This manual has been compiled by the editorial staff of the Maritime Safety Information Center at the National Imagery and Mapping Agency. It is intended to be used primarily as a manual of instruction in navigation schools and by naval and merchant marine personnel. By combining the previous editions of Pub. 1310 and Pub. 217 into one book we hope that we have provided a practical reference for mariners on board ship and instructors ashore. It is also intended to be of assistance to others who are concerned with marine radar in different and less direct ways. In combining the two manuals, every effort has been made to retain the original style and format which has proven to be clear and helpful to the maritime community. Most of the illustrations and examples have been carried forward into this edition. The chapter on ARPA has been expanded and now includes a sample operating manual for a modern commercial radar and ARPA. Many excellent other publications on ARPA are available and should be consulted for a more thorough understanding on this subject matter. Users should refer corrections, additions, and comments for improving this product to: MARITIME SAFETY INFORMATION CENTER NATIONAL IMAGERY AND MAPPING AGENCY ST D 444600 SANGAMORE ROAD BETHESDA MD 20816-5003
