**Press Freedom in Contemporary Japan** May 30 2020 In twenty-first century Japan there are numerous instances of media harassment, intimidation, censorship and self-censorship that undermine the freedom of the press and influence how the news is reported. Since Abe returned to power in 2012, the recrudescence of nationalism under his leadership has emboldened right-wing activists and organizations targeting liberal media outlets, journalists, peace museums and ethnic Korean residents in Japan. This ongoing culture war involves the media, school textbooks, constitutional revision, pacifism and security doctrine. This text is divided into five sections that cover: Politics of press freedom; The legal landscape; History and culture; Marginalization; PR, public diplomacy and manipulating opinion. Press Freedom in Contemporary Japan brings together contributions from an international and interdisciplinary line-up of academics and journalists intimately familiar with the current climate, in order to discuss and evaluate these issues and explore potential future outcomes. It is essential reading for anyone wishing to understand contemporary Japan and the politics of freedom of expression and transparency in the Abe era. It will appeal to students, academics, Japan specialists, journalists, legal scholars, historians, political scientists, sociologists, and those engaged in human rights, media studies and Asian Studies. **Welcome To The N.H.K. 08** Nov 28 2022 [Crisis Management: Concepts, Methodologies, Tools, and Applications](#) Feb 25 2020 "This book explores the latest empirical research and best real-world practices for preventing, weathering, and recovering from disasters such as earthquakes or tsunamis to nuclear disasters and cyber terrorism"--Provided by publisher. [Media, Technology and Society](#) Dec 25 2019 Challenging the popular myth of a present-day 'information revolution', Media Technology and Society is essential reading for anyone interested in the social impact of technological change. Winston argues that the development of new media forms, from the telegraph and the telephone to computers, satellite and virtual reality, is the product of a constant play-off between social necessity and suppression: the unwritten law by which new technologies are introduced into society only insofar as their disruptive potential is limited.

**1Q84** Oct 03 2020 A mesmerising, epic, utterly involving masterpiece from Haruki Murakami The year is 1Q84. This is the real world, there is no doubt about that. But in this world, there are two moons in the sky. In this world, the fates of two people, Tengo and Aomame, are closely intertwined. They are each, in their own way, doing something very dangerous. And in this world, there seems no way to save them both. Something extraordinary is starting. '1Q84 has a range and sophistication that surpasses anything else in his oeuvre. It is his most achieved novel; an epic in which form and content are neatly aligned' Independent on Sunday

[Hello, Please!](#) Aug 13 2021 Presents examples of the common "super cute" comic art characters used in Japanese advertisements, signs, and public service announcements. [Broadcasting Politics in Japan](#) May 10 2021 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis; virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation. Between 1960 and 1990, however, these institutions renewed their strength, taking on legitimacy that erased virtually all traces of their postwar instability. How did this transformation come about? This is the question Ellis S. Krauss ponders in [Broadcasting Politics in Japan](#); his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster, NHK. Since the 1960s, television has been a fixture of the Japanese household, and NHK's TV news has until very recently been the dominant, and most trusted, source of political information for the Japanese citizen. NHK's news style is distinctive among the broadcasting systems of industrialized countries; it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy. Krauss argues that this approach is not simply a reflection of Japanese culture, but a result of the organization and processes of NHK and their relationship with the state. These factors had profound consequences for the state's postwar re-legitimation, while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state. Krauss guides the reader through the complex interactions among politics, media organizations, and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world, rather than simply a lens through which to view it.

**The Politics of Public Broadcasting in Britain and Japan** Feb 07 2021 This book explores the remarkably similar national public broadcasters of Britain and Japan - the BBC and NHK. It considers the origins of both organizations in the 1920s, highlights how both have been major shapers of national life and

national identity in their respective countries, how both have been significant innovators of broadcasting technology, and how both have high reputations for honest and balanced news reporting. It outlines how both have adapted to cope with successive major changes in the broadcasting landscape. The book also points out the major differences: the BBC's greater success at being commercial and entrepreneurial, the BBC's fierce protection of its editorial independence, often used to play a watchdog role in holding the powerful to account - which contrasts sharply with the approach of NHK, which cooperates with rather than confronts political elites, serving as an agent of social stability, whereas the BBC acts more as an agent of social change. As debates about the future of public broadcasting become more intense, this book provides useful evidence of how public broadcasting can be approached in different ways and how vital it is to democratic life.

Following the seventieth anniversary of the atomic bombing of Hiroshima, this is a new, very personal story to join Sadako and the Thousand Paper Cranes. Yuriko was happy growing up in Hiroshima when it was just her and Papa. But her aunt Kimiko and her cousin Genji are living with them now, and the family is only getting bigger with talk of a double marriage! And while things are changing at home, the world beyond their doors is even more unpredictable. World War II is coming to an end, and since the Japanese newspapers don't report lost battles, the Japanese people are not entirely certain of where Japan stands. Yuriko is used to the sirens and the air-raid drills, but things start to feel more real when the neighbors who have left to fight stop coming home. When the bombs hit Hiroshima, it's through Yuriko's twelve-year-old eyes that we witness the devastation and horror. This is a story that offers young readers insight into how children lived during the war, while also introducing them to Japanese culture. Based loosely on author Kathleen Burkinshaw's mother's firsthand experience surviving the atomic bombing of Hiroshima, *The Last Cherry Blossom* hopes to warn readers of the immense damage nuclear war can bring, while reminding them that the "enemy" in any war is often not so different from ourselves.

**FEM for Springs** Mar 08 2021 The Japanese original edition of "FEM for Springs" was published in 1997, to commemorate the 50th anniversary of Japan Society for Spring Research (JSSR). While there have been many books published about Finite Element Method (FEM), this book was among the first to address the application of FEM to spring design. When asked about springs, one might imagine a mere shape of helical coil. However, there are many more varieties of shapes and functions in the application of springs. Consequently, some are very difficult to calculate by design formula. FEM gives the solutions to those advanced engineering cases. Nowadays, it is strongly desired to have a design method for springs as a common base from a global point of view. Under these circumstances, JSSR planned to publish an English version of "FEM for Springs". By improving the contents and adding many examples, this book, *FEM for Springs*,

has been brought to completion. It is a truly significant event. I am confident that this book is suitable for engineers in worldwide industrial sectors and for college students as well.

**Global Media** Sep 02 2020 This book is about the processes of globalization, demonstrated through a comparative study of three television case histories in Asia. Also illustrated are different approaches to providing television services in the world: public service (NHK in Japan), state (CCTV in China) and commercial (STAR TV, based in Hong Kong). Through its focus, *Global Media* addresses a considerable lacuna in the media studies literature, which tends to have a heavy Western bias. It provides an original addition to the literature on globalization, which is often abstract and anecdotal, in addition to making a major contribution to comparative research in Asia. Finally, it offers a thoughtful causal layered analysis, with a concluding argument in favor of public service television.

**The New Map** Apr 28 2020 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society "A master class on how the world works." —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future. The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The "shale revolution" in oil and gas has transformed the American economy, ending the "era of shortage" but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

**Fukushima and Civil Society** Oct 23 2019

This book analyzes the impact of the Fukushima disaster on civil society in Japan with particular attention to the anti-nuclear movement, focusing on its development, repertoire of action, mobilization strategies, modes of operation, and impact on the state's energy policy. Combining social movement theory and civil society theory, the author draws on extensive fieldwork in Japan to explore the context of the sociopolitical situation in Japan up to the Fukushima accident and to offer a typological description and analysis of the anti-nuclear movement that emerged after the disaster. Through an analysis of the relationship between the power elite and the anti-nuclear movement organizations, this volume considers the influences exercised by the ruling elites on civil society and vice versa, thus assessing the effects of the anti-nuclear movement on the state policy and the society. A comprehensive account of the anti-nuclear movement in post-Fukushima Japan, embedded within a broader perspective of the movement's historical development, contemporary political

structures, and opportunities, Fukushima and Civil Society will appeal to scholars of sociology and politics with an interest in social movements.
