Diaspora Networks and the International Migration of Skills May 16 2021 Network diasporas are but the latest bridge connecting developing economy insiders, with their risk-mitigating knowledge and connections, to outsiders in command of technical know-how and investment capital. This book examines the interaction of expatriate talent with institutions in expatriates' countries of origin in an

attempt to make the potential of diasporas and their knowledge a reality. The question of how to trigger and sustain such a virtuous cycle is a central concern of this book. The focus is on the "how to" details of how to design effective diaspora networks and transform brain drain into brain gain.

Biosensors and Their Applications Feb 10 2021 A biosensor is a device in which a bioactive layer lies in direct contact with a transducer whose responses to change in the bioactive layer generate electronic signals for interpretation. The bioactive layer may consist of membrane-bound enzymes,

anti-bodies, or receptors. The potential of this blend of electronics and biotechnology includes the direct assay of clinically important substrates (e.g. blood glucose) and of substances too unstable for storage or whose concentrations fluctuate rapidly. Written by the leading researchers in the field, this book reflects the most current developments in successfully constructing a biosensor. Major applications are in the fields of pharmacology, molecular biology, virology and electronics.

Technology Transfer for the Ozone Layer Jun 28 2022 'Imagine the pride of earning the Nobel Prize for warning that CFCs were destroying the ozone layer. Then imagine that citizens, policymakers, and business executives heeded the warning and transformed markets to protect the earth. This book is the story of why we can all be optimistic about the future if we are willing to be brave and dedicated world citizens.' MARIO MOLINA, Nobel Laureate in Chemistry and Professor, University of California This book tells how the Montreal Protocol, the most successful global environmental agreement so far, stimulated the development and worldwide transfer of technologies to protect the ozone layer. Technology transfer is the crux of the 230 international environmental treaties and is essential to fighting climate change. While debate rages about obstacles to technology transfer, until now there has been no comprehensive assessment of what actually works to remove the obstacles. The authors, leaders in the field, assess over 1000 technology transfer projects funded under the Montreal Protocol's Multilateral Fund and the Global Environment Facility, and identify lessons that can be applied to technology transfer for climate change.

MEMS Vibratory Gyroscopes Mar 26 2022 MEMS Vibratory Gyroscopes provides a solid

foundation in the theory and fundamental operational principles of micromachined vibratory rate gyroscopes, and introduces structural designs that provide inherent robustness against structural and environmental variations. In the first part, the dynamics of the vibratory gyroscope sensing element is developed, common micro-fabrication processes and methods commonly used in inertial sensor production are summarized, design of mechanical structures for both linear and torsional gyroscopes are presented, and electrical actuation and detection methods are discussed along with details on experimental characterization of MEMS gyroscopes. In the second part, design concepts that improve robustness of the micromachined sensing element are introduced, supported by constructive computational examples and experimental results illustrating the material.

The United Nations Commission on Human Rights Nov 21 2021 In this book, John P. Pace provides the most complete account to-date of the United Nations human rights programme, both in substance and in chronological breadth. Pace worked at the heart of this programme for over thirty years, including as the Secretary of the Commission on Human Rights, and Coordinator of the World Conference on Human Rights, which took place in Vienna in 1993. He traces the issues taken up by the Commission after its launch in 1946, and the methods undertaken to enhance absorption and domestication of international human rights standards. He lays out the special procedures carried out by the UN, and the emergence of international human rights law. The book then turns to the establishment of the Office of the High Commissioner for Human Rights and the mainstreaming of human rights across the United Nations system, eventually leading to the establishment of the Human Rights Council to replace the Commission in 2006. Many of the problems we face today, including conflict, poverty, and environmental issues, have their roots in human rights problems. This book identifies what has been done at the international level in the past, and points towards what still needs to be done for the future.

Focusing Solutions for Data Mining Jan 12 2021 In the first part, this book analyzes the knowledge discovery process in order to understand the relations between knowledge discovery steps and focusing. The part devoted to the development of focusing solutions opens with an analysis of the state of the art, then introduces the relevant techniques, and finally culminates in implementing a unified approach as a generic sampling algorithm, which is then integrated into a commercial data mining system. The last part evaluates specific focusing solutions in various application domains. The book provides various appendices enhancing easy accessibility. The book presents a comprehensive introduction to focusing in the context of data mining and knowledge discovery. It is written for researchers and advanced students, as well as for professionals applying data mining and knowledge discovery techniques in practice.

Perspectives of System Informatics Oct 21 2021 This volume comprises the papers presented at the Third International Andrei Ershov Memorial Conference "Perspectives of System Informatics", Akadem-rodok (Novosibirsk, Russia), July 6{9, 1999. The main goal of the conference was to give an overview of research directions which are decisive for the growth of major areas of research activities in system informatics. The conference was the third one in the line. The first and second international conferences "Perspectives of System Informatics" were held in Novosibirsk, Akademgorodok, in May, 1991, and June, 1996, respectively. Both conferences gathered a wide spectrum of specialists and were undoubtedly very successful. The third conference included many of the subjects of the second conference, such as theoretical computer science, programming methodology, new

informatics, and the promising field of artificial intelligence as important components of system informatics. The style of the second conference was preserved to a certain extent in that there were a considerable number of invited papers in addition to the contributed papers. However, posters were replaced by short talks mainly given by young researchers.

Urbanomad Mar 02 2020 Lafranchis alter ego, the Urbanomad, takes his navigator and sets off on his journeys once again. He lands in Taiwan, South Africa and the United States. As in the first volume (*Urbanomad*, 3-211-20347-8), he finds entirely different conditions at each of the places he visits. These are the result of events and factors such as the earthquake in Chi Chi, Taiwan in 1999, sickness and poverty in Siyathemba, South Africa or technological evolution in Chicago and New York. The book accompanies the Urbanomad throughout his continuing flight and documents his projects the same way they were documented in the first volume.

Distinct Roles for the *Saccharomyces Cerevisiae* Mismatch Repair Proteins in Heteroduplex Rejection, Mismatch Repair, and Non-homologous Tail Removal Dec 31 2019 We also used an in vivo chromatin immunoprecipitation approach to further understand Msh2p's role during NHTR. Mating-type switching assays were developed that are dependent and independent of Msh2p--Msh3p and Rad1p--Rad10p factors. We show that in both systems, Msh2p rapidly localizes to the double-strand break induced at MAT a, but preliminary data indicates the kinetics of localization may be distinct in the two systems. We hypothesize that the early localization of Msh2p may be important for its role in the DNA damage checkpoint response.

The Many Faces of Neutron Stars Jan 30 2020 Proceedings from the September-October conference in Lipari, Italy, discussing both the increase in neutron stars and new phenomena that have been discovered in these star systems. Forty- one contributions are arranged in sections on the history of neutron star study--from early speculations to current problems, neutron star structure, radio pulsars, X-ray binaries, evolution of binaries, and X-rays from single neutron stars. Individual papers address subjects like pulsar magnetic fields and glitches, young neutron stars in supernova remnants, high- energy emission from binary pulsars, thermonuclear burning on rapidly accreting neutron stars, modelling gamma ray bursts, and the search for old neutron stars in molecular clouds.

Rangeland Desertification Feb 22 2022 Desertification has occurred worldwide. The biophysical and socio-economic complexity of this phenomenon has challenged our ability to categorize, inventory,

monitor and repair the condition of degraded lands. One of the most important distinctions to be made in relation to land degradation is between cultivated land used for annual crop production and 'rangelands'. Grazing by free-roaming livestock is the traditional primary use of the world's rangelands. However, there is growing recognition of the importance of these vast acreages for wildlife habitat, hydrology and ground water recharge, recreation and aesthetics. This text focuses on the desertification of rangelands and explores processes, problems and solutions. Chapters in the first section evaluate interactions between 'natural' and human-induced disturbance regimes, thresholds, and non-linear change with respect to vegetation, hydrology, nutrients and erosion. Chapters in the second section examine socio-economic constraints and approaches for preventing and reversing degradation. The book provides a contemporary, process-oriented perspective on rangeland degradation of value to students, policy-makers and professionals alike.
