From the Gita to the Grail: Exploring Yoga Stories & Western Myths May 02 2020

What is the meaning of Shiva dancing on a dwarf named Avidya? Why does Vishnu sleep upon an endless snake? To what did the Buddha awaken? What do we mean by soul? What do these ancient symbols mean, what are they trying to teach us, and how should we incorporate the knowledge skillfully into our Western lifestyle? By looking at the myths of Yoga along with the stories that have influenced Western culture, we are presented with opportunities to select the best of both worlds, and create new maps to help guide us through the uncertainties of modern living. Stories are fun!

Important stories guide us and educate us; they create mental models which work at an unconscious level to help us navigate through our modern society and govern our reactions to the ups-and-downs of life; they provide meaning and purpose for our life; and our stories entertain and entrance us. In this book, Bernie Clark looks at the spiritual stories found in the West that create a base map for our lives and then looks at the stories found in the East to see how they could improve our base maps. The stories offered are mix of light-hearted and enjoyable, and deep and profound. The importance of stories East and West are illustrated through the model proposed by the great 20th century mythologist, Joseph Campbell: myths, or stories, serve four great functions - the mystical, the cosmological, the sociological and the psychological function. The stories chosen illustrate these four functions of mythology and show how we can take these stories into ourselves to create a deeper experience of life. "You may find that, with a proper introduction, mythology will catch you." Joseph Campbell: *The Power of Myth*

The Perception Myth Sep 17 2021 There are millions of self-help books that all promise the secret to obtaining a happy life—a successful career, lots of money, loving relationships, a defined and firm sense of morality; whatever could possibly define “happiness” for one person. But nothing is possibly more subjective than happiness. Born with a deformity known as Pectus Excavatum (sunken chest) happiness eluded Brad Wheelis as he struggled with low self-esteem, perceive flaws, and societal pressure to be perfect. Eventually, he realized that he had been chasing the wrong ideal. Today, Wheelis believes that a truly happy life is impossible. No one can be happy all of the time. But you can strive to achieve a

fulfilled life that contains a myriad of emotions by making a series of changes: how your preconceived notions of fulfillment differ from realistic goals, what you want to accomplish for yourself, and how you can make those ideas come true. Making a conscious decision to transform your perceptions of both trivial and significant aspects of your life, one at a time, will lead you to your own kind of happiness and inner greatness. Mythology Jan 28 2020 Presenting the newest discovery in the series with the Midas touch — a mythical exploration fit for the gods. In the early nineteenth century, an English nobleman embarked on a tour of the sites of ancient Greece. He brought as his guide a primer on Greek myths written by his friend Lady Hestia Evans, a devotee of Lord Byron who had recently taken the same voyage. In the true Romantic spirit, Lady Hestia's book was not only lavishly illustrated but also boasted many paper crafts and novelties, including a card game featuring the twelve Olympians, an oak-leaf oracle of Zeus, a pop-up Pandora's box (with hope still inside), a booklet retelling the tale of Odysseus, a piece of the Golden Fleece, a

gold OBOLOS coin to pay the ferryman on the River Styx, and many more flaps, foldouts, and other surprises. The nobleman added his own witty comments and drawings along the way, but seems to have wished for something odd at the Delphic oracle: as the book nears its end, it slowly begins to turn . . . to gold. Now, for lovers of Greek myths and those just discovering their timeless power, this fascinating volume is faithfully reproduced with all its Romantic ambience, clever wit and novelty features intact.

Discovering Our World Feb 08 2021 Where did everything come from? Why are humans so biologically similar, and why do we let small differences divide us? What shall determine our destiny? Paul Singh and John R. Shook draw on the latest findings from the physical and biological sciences, astronomy and cosmology, geology and genetics, and prehistory and archeology in search of answers. As they lucidly and engagingly demonstrate, the answers science gives about ourselves and the universe in which we live are incomparably more surprising and interesting than any mythical tale about some clash of titans or calculating creator. Indeed, science's proud journey of exploration and discovery is humanity's finest narrative yet, about how we trusted our intelligence to find out what we really are and who we can be—intrepidly going wherever the evidence led. Even though science reveals that humanity may have no special place in the universe, humanity is truly special because of our ability to comprehend our universe. Thus, this inspiring

story of exploration and discovery is a celebration not only of science—of science's knowledge of the world, and of science's own journeys to gain that knowledge—but also of ourselves.
