[The Romaunt of the Rose Sep 04 2022](#) The Romaunt of the Rose translates in abridged form a long dream vision, part elegant romance, part rollicking satire, written in France during the thirteenth century. The French original, *Le Roman de la Rose*, had a profound influence on Chaucer, who says he translated the work. From the sixteenth century to the mid-nineteenth, scholars assumed that the Romaunt comprised large fragments of that translation. Subsequent debates have divided the Romaunt into two or three segments, and proffered arguments that Chaucer was responsible for one or more of them, or for none. The current consensus is that he almost certainly wrote the first 1,705 lines. Charles Dahlberg's edition of the Romaunt provides a full summary of scholarship on the question of authorship as well as other important topics, including a useful survey of the influence of the French poem on Chaucer.

[God of Salvation Mar 18 2021](#) The theology of salvation stands at the heart of the Christian faith. Very often the structure of Christian salvation is seen in terms of a single theme, such as atonement for sins, forgiveness, liberation or friendship with God. It is easy to reduce soteriology to a matter of merely

personal experience, or to see salvation as just a solution to a human problem. This book explores a vital yet often neglected aspect of Christian confession - the essential relationship between the nature of salvation and the character of the God who saves. In what ways does God's saving outreach reflect God's character? How might a Christian depiction of salvation best bear witness to these features? What difference might it make to start with the identity of God as encountered in the gospel, then view everything else in the light of that? In addressing these questions, this book offers fresh appraisals of a range of major themes in theology: the nature of creaturely existence; the relationship between divine purposes and material history; the holiness, love and judgement of God; the atoning work of Jesus Christ; election, justification and the nature of faith; salvation outside the church; human and non-human ends; the nature of eschatological fellowship with God. In looking at these issues in the light of God's identity, the authors offer a stimulating and tightly-argued reassessment of what a Christian theology of salvation ought to resemble, and ask what the implications might be for Christian life and witness in the world today.

Advances in Digital Forensics XII Dec 07 2022 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics XII* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. *Advances in Digital Forensics XII* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

Cybersecurity and Identity Access Management Oct 25 2021 This textbook provides a comprehensive, thorough and up-to-date treatment of topics in cyber security, cyber-attacks, ethical hacking, and cyber crimes prevention. It discusses the different third-party attacks and hacking processes which poses a big issue in terms of data damage or theft. The book then highlights the cyber security protection techniques and overall risk assessments to detect and resolve these issues at the beginning stage to minimize data loss or damage. This book is written in a way that it presents the topics in a simplified holistic and pedagogical manner with end-of chapter exercises and examples to cater to undergraduate students, engineers and scientists who will benefit from this approach.
