*The Wine of My Life* Aug 30 2019 What is it all about? What is wine made from? What is in it? What are we drinking? One substance makes up 80 percent of every single bottle of wine. Can you guess what that 80 percent is? It is not grapes. It is not sugar. Its water! In fact, all manufactured beverages are in the neighborhood of 80 percent water. This is one of the very basics: that wine uses water as a carrier as the base. Of course, we too are made up of 75 percent 80 percent water! Let us clarify; wine makers do not add water to the wine they make to reach 80 percent. This is simply the natural proportion of water in wine. Choose a single grape, and that grape is 75 percent to 85 percent water. Therefore, that is where it begins. There's no water added; it just comes naturally with the grape. The nature of water itself is another whole story, but it is true that water is colorless and odorless. It can be in three states: liquid, gas, and solid. The atom of water is so unique and is one of the strongest of the atoms. It takes so much energy to be able to break it apart. Water is life itself, and water is the first and the most basic aspect of wine.

Land and Wine Apr 06 2020 A tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. For centuries, France has long been the world's greatest wine-producing country. Its wines are the global gold standard, prized by collectors, and its winemaking regions each offer unique tasting experiences, from the spice of Bordeaux to the berry notes of the Loire Valley. Although grape variety, climate, and the skill of the winemaker are essential in making good wine, the foundation of a wine's character is the soil in which its grapes are grown. Who could better guide us through the relationship between the French land and the wine than a geologist, someone who deeply understands the science behind the soil? Enter scientist Charles Frankel. In *Land and Wine*, Frankel takes readers on a tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. The book's twelve chapters each focus in-depth on a different region, including the Loire Valley, Alsace, Burgundy, Champagne, Provence, the Rhône valley, and Bordeaux, to explore the full meaning of terroir. In this approachable guide, Frankel describes how Cabernet Franc takes on a completely different character depending on whether it is grown on gravel or limestone; how Sauvignon yields three different products in the hills of Sancerre when rooted in limestone, marl, or flint; how Pinot Noir will give radically different wines on a single hill in Burgundy as the vines progress upslope; and how the soil of each château in Bordeaux has a say in the blend ratios of Merlot and Cabernet-Sauvignon. *Land and Wine* provides a detailed understanding of the variety of French wine as well as a look at the geological history of France, complete with volcanic eruptions, a parade of dinosaurs, and a menagerie of evolution that has left its fossils flavoring the vineyards. Both the uninitiated wine drinker and the confirmed oenophile will find much to savor in this fun guide that Frankel has spiked with anecdotes about winemakers and historic wine enthusiasts—revealing which kings, poets, and philosophers liked which wines best—while offering travel tips and itineraries for visiting the wineries today.

To understand amarone properly the wine needs to be seen in its true context, that is within the hierarchy of the wines of Verona, which have a history of production and consumption dating back to pre-Roman times. The other wines of Verona are no less well-known if not necessarily held in such great esteem: soave and valpolicella have been among post-war Italy's top selling wines. They too are wines with a massive following. Michael Garner's Amarone and the fine wines of Verona is a sure-footed guide to all aspects of Veronese wine production, examining the history of the wines and geography of the region as well as viticulture, climate, grape varieties, wine styles and appassimento. **The Noble Rot Book: Wine from Another Galaxy** Dec 07 2022 Winner of the Guild of Food Writers Drinks Book Award 2021 Shortlisted for the André Simon Food and Drink Book Awards 2020 "Noble Rot manages to unravel the mysteries of wine with insight and humour. A wonderful - and essential - read for anyone interested in the world of wine, or even for those, like me, who just drink it." — Nigella Lawson "The Noble Rot guys have the ability to describe wines as if they're either future friends, or rock-stars coming to blow your mind." — Caitlin Moran "Noble Rot has brought originality, humour and now space travel to the very serious business of drinking wine. About time too." — Brian Eno "Dan and Mark do that thing that only crazy knowledgeable enthusiasts can do, they make you a crazy enthusiast too. If they said, 'We've found a wine like no other, a wine that actually lights up the sky, but you can only drink it in the desert at midnight, are you coming? Id be off, and I'd be confident of meteor showers. They provoke curiosity - 'how does anyone make this extraordinary drink just with grapes?' - excitement, joy, and a longing for knowledge. Now, in this book, they're sharing the knowledge." — Diana Henry "To really know and love a wine one should know the grower and the vineyard. This isn't always or even often possible, which is why the Rotters introduce these wines at source. You learn that making wine, as cooking should be, is an act of love. You will come to love this book too." — Rowley Leigh Choosing wine in a restaurant or shop can seem an unfathomable business. But, according to Dan Keeling and Mark Andrew, the duo behind London's Noble Rot, it needn't be that way. In Wine from Another Galaxy they'll help you to understand how it is made, where to buy it, what to look for when you drink it, and how to talk about it. And once you've mastered the basics, they'll take you on a journey through the best of European wine culture, meeting the people and places behind their favourite bottles. Indeed, Dan and Mark have spent years visiting growers that you probably haven't heard of, from the original thinkers of the natural wine movement to the iconic estates of Burgundy and Bordeaux. This is the alternative, accessible, no-holds-barred guide to wine, where the usual clichés and rules don't apply.
