Nursing Management of Pediatric Disaster Jul 11 2021 This textbook describes what nurses need to know about pediatric disaster nursing, including public policy, and addresses preparedness for all types of disasters (natural and man-made) and strategies for hospital, school and community preparedness. The book opens with a brief history of disaster nursing and explains the key differences between pediatric and adult disaster nursing. Recent years have been marked by numerous man-made and natural disasters, which have led nurses to seek new resources to be better prepared, in their role as nurses, for all types of disasters. Responding to this lack of resources, the book focuses on the unique needs of babies and children. It is the first and only textbook on pediatric disaster preparedness to include both the physical and psychological effects of disaster. Key aspects covered include: the psychosocial differences in and how to approach children; family reunification; medications, supplies and equipment; and decontamination. Given its breadth of coverage, the book is well suited as a textbook for nursing classes, while also offering a valuable resource for nurses working in the field.

The Role of Nurses in Disaster Management in Asia Pacific Jun 22 2022 This book documents how nurses have shown their dedication, courage, expertise and compassion in helping communities prepare for, respond to and recover from disastrous events. It aims to inspire and equip nurses and other health professionals to help people in disaster-affected areas and contribute to community resilience. The last decade (2005-2015) has been characterized by a number of overwhelming natural disasters - tropical storms, floods, earthquakes, tsunamis; and threats of emerging infectious diseases - SARS, MERSCoV and Ebola around the world. Countries from the Asia Pacific region, such as Australia, Cambodia, China, Indonesia, India, Japan, Nepal, Philippines, Solomon Islands, South Korea, Thailand and Vanuatu, have borne the brunt of the devastation caused by these catastrophic events. Nurses from these countries have stepped in providing emergency care in hospitals and in the field, addressing public health needs in evacuation centers, supporting epidemiologic surveillance and conducting health education, training and research, to help save lives and support communities build back better.

International Disaster Nursing Sep 25 2022 The effects of a disaster on healthcare can range from conditions that immediately besiege the system with large numbers of patients, to catastrophes that strain its long-term sustainability. Nurses, as frontline health professionals, must have an understanding of the situations they may face before, during and after a disaster and they must develop the skills and strategies to provide effective and immediate care. *International Disaster Nursing* is the first truly comprehensive and internationally focused resource to address the diversity of issues and myriad scenarios that nurses and other health personnel could encounter during a disaster event. This text defines

the many roles of the nurse within a multidisciplinary team, and aids the implementation of the community's disaster plans in a crisis. With an alarming increase in the occurrence of disasters in the last decade, International Disaster Nursing is the hallmark text in the field.

NURSE'S ROLE IN DISASTER MANAGEMENT Jun 10 2021 This book aims to serve as a guide for the teachers and students of nursing on the knowledge and skills in managing the human aspect of the disasters. It deals with the severity and types of disasters, national and international management, specific acts related to disaster management, and the exclusive role of nursing personnel in managing the turbulence. The content and coverage fully meet the requirements of the syllabi prescribed by the Indian Nursing Council and various State nursing councils. This publication makes the first textbook in India on the subject aimed at the students and teachers of nursing.

Disaster Nursing and Emergency Preparedness Dec 16 2021 "What a wonderful resource!"--Doody's Medical Reviews "The 4th Edition is unique in recognizing the rapid changes in both the causes of crises and the latest attempts to provide timely multidisciplinary approaches to the practice of this growing specialty...Evident throughout this edition is the call to identify crisis leadership among the increasingly talented base of nurses who have responsibility to move the profession to recognize and accept that they can be advocates for better planning, coordination, education and training." - Frederick M. Burkle, Jr., MD, MPH, DTM, PhD(Hon.), FAAP, FACEP Senior Fellow & Scientist, Harvard Humanitarian Initiative, Harvard University & T.C. Chan School of Public Health From the Foreword "This impressive edition builds upon the solid foundation of the first three award-winning editions with an expanded focus on climate change related disasters, globalization and its implications for emerging and re-emerging infectious diseases, the accommodation of high-risk, high-vulnerability populations, and the potential for disaster arising from a world witnessing increasing community violence and civil unrest." -Patricia M. Davidson, PhD, MED, RN, FAAN Professor & Dean, Johns Hopkins School of Nursing From the Foreword "The contributing authors read like a "Who's Who" of disaster leaders. They lend their special expertise and insights, which are supported and elucidated by cogent learning strategies in the use of case studies, student questions, and packed content in all areas of disaster participation, preparedness, policies, and research. For over 16 years [this book] has been the hallmark text in its field and this edition proves to be the best ever." -Loretta C. Ford, RN, PNP, EdD Dean Emeritus, University of Rochester School of Nursing Founder of the National Nurse Practitioner Program Member, National Women's Hall of Fame Featuring the most current, valid, and reliable evidence-based content available, this three-time AJN winner once again presents an unparalleled resource for disaster and emergency preparedness. Disasters lay heavy burdens upon healthcare systems that stretch all levels of society. While natural and man-made disasters are not new, the global nature, rate, type, and totality of their impact has only increased. The fourth edition of this foundational text uniquely addresses the rapid changes in these crises and analyzes the latest attempts to provide timely, multidisciplinary healthcare. Nurses consistently comprise seventy or more percent of responders to local, national, regional, and global crises, and represent a potentially untapped resource to achieve surge capacity goals and optimize population health outcomes. Considering recent world events and

increasing geopolitical tensions, Disaster Nursing and Emergency Preparedness, Fourth Edition now features expanded content on the ubiquitous threat of terrorism, potential detonation of thermonuclear weapons, emerging and reemerging infectious diseases, and increasing frequency and intensity of natural disasters from climate change. This text promotes competency-based expert nursing care during disasters and positive health outcomes for small and large populations consistent with the Federal Disaster Response Framework. Whenever possible, content is mapped to published core competencies for preparing health professions' students for response to terrorism, disaster events, and public health emergencies. The fourth edition retains the clearly organized format in each chapter that includes an overview, learning objectives, a summary, and case study with reflective questions. New to the Fourth Edition: Addresses the most recent landmark agreements Sendai Framework for Disaster Risk Reduction 2015–2030, the United Nations' Sustainable Development Goals, and the Paris Climate Agreement Covers public health emergencies involving community violence and civil unrest Expands coverage of planning for and accommodating high-risk, high-vulnerability populations Aligns with the U.S. National Health Security Strategy and the National Planning Frameworks Provides focused content on medical countermeasures Includes an improved instructor package with guide, PowerPoint slides, and case studies with questions for reflection in every chapter Emergency Nursing Care Dec 04 2020 Illustrated, easy to find information about procedures, conditions and nursing skills.

Nurses on the Front Line Oct 02 2020 This book examines how nurses have responded to natural and man-made disasters in the in the US and Canada over the course of the previous and current centuries. It identifies the care delivered during various disasters; explicates how nurses at the local level intersected with the American Red Cross (ARC), American Nurses Association (ANA), the U.S. Public Health Service, and other federal/state organizations; describes how this intersection changed over time; and analyzes how issues of race, class, and gender influenced the ways nurses and other health care professionals responded to disasters. In each disaster, the safeguards developed, such as urban fire

departments and hospitals, were overwhelmed. At the same time, these disasters (see TOC) prompted health care workers, survivors, and civic and private organizations to reflect on the character and speed of responders as documented in letters, memoirs, oral histories, newspaper stories, and professional publications. This book, while asserting that nurses and other health care workers sought to restore stability in the aftermath of a chaotic event, also illustrates how such events can temporarily unravel stable gendered, social, racial, and geographical boundaries while informing and changing professional attitudes to, and standards of, practice. Nine disasters, from the Galveston hurricane of 1900 to the Coconut Grove nightclub fire to 9/11 and Hurricane Katrina, are discussed. Key Features Presents new and revised commentary on nursing's response to key disasters in the US and Canada over the course of the 20th and 21st centuries Captures important disaster episodes in the development of professional nursing Provides perspectives on disaster relief for nursing and women's issues research Discusses interventions in light of racial, ethnic, gender, and professional contexts Advances the importance of disaster responses that are evidence based Integrates witnessing from letters, memoirs, oral histories, newspaper stories, and professional publications with historical analysis

Implications of Disaster Preparedness for Nursing, An Issue of Nursing Clinics of North America, E-Book May 09 2021 According to the Center for Research and Epidemiology of Disasters, the frequency and severity of disasters has increased over 300% in the last decade. Healthcare systems and individual healthcare practitioners, including nurses, are now fulfilling multiple roles in disaster preparedness in the whole of community: planning, preparedness, risk identification, mitigation, response and recovery. Nurses are considered first responders for biological events or when the disaster occurs where they are working. Nurses act as first receivers when accepting patients/victims for care

whose injuries result from non-biological events occurring outside the nurse's workplace. The vast majority of practicing nurses received no disaster preparedness education in their basic nursing education program. Nurses graduating in the 21st century are exposed to some of the concepts of disaster nursing but have little experience unless there is a disaster or emergency where they work or go to school. Readers will be updated on this topic because articles in this edition demonstrate a vast array of implications for nurses in disaster preparedness around the world: chemical, biological, radiological/nuclear, explosives (CBRNE); natural disasters; new models of training and educating nurses for disasters, military nurse response, mental health issues as well as non-government organizations.

Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations Jun 17 2019 The influenza pandemic caused by the 2009 H1N1 virus underscores the immediate and critical need to prepare for a public health emergency in which thousands, tens of thousands, or even hundreds of thousands of people suddenly seek and require medical care in communities across the United States. Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations draws from a broad spectrum of expertise-including state and local public health, emergency medicine and response, primary care, nursing, palliative care, ethics, the law, behavioral health, and risk communication-to offer guidance toward establishing standards of care that should apply to disaster situations, both naturally occurring and man-made, under conditions in which resources are scarce. This book explores two case studies that illustrate the application of the guidance and principles laid out in the report. One scenario focuses on a gradual-onset pandemic flu. The other scenario focuses on an earthquake and the particular issues that would arise during a no-notice event. Outlining current concepts and offering guidance, this book will prove an asset to state and local public health officials, health care facilities, and professionals in the development of systematic and comprehensive policies and protocols for standards of care in disasters when resources are scarce. In addition, the extensive operations section of the book provides guidance to clinicians, health care institutions, and state and local public health officials for how crisis standards of care should be implemented in a disaster situation.

Nursing Management of Pediatric Disaster Sep 13 2021 This textbook describes what nurses need to know about pediatric disaster nursing, including public policy, and addresses preparedness for all types of disasters (natural and man-made) and strategies for hospital, school and community preparedness. The book opens with a brief history of disaster nursing and explains the key differences between pediatric and adult disaster nursing. Recent years have been marked by numerous man-made and natural disasters, which have led nurses to seek new resources to be better prepared, in their role as nurses, for all types of disasters. Responding to this lack of resources, the book focuses on the unique needs of babies and children. It is the first and only textbook on pediatric disaster preparedness to include both the physical and psychological effects of disaster. Key aspects covered include: the psychosocial differences in and how to approach children; family reunification; medications, supplies and equipment; and decontamination. Given its breadth of coverage, the book is well suited as a textbook for nursing classes, while also offering a valuable resource for nurses working in the field.

Oxford Handbook of Emergency Nursing Mar 07 2021 Emergency nursing requires rapid assessment and decision-making. Often nurses are required to make sense of considerable amounts of information and act on it. The Oxford Handbook of Emergency Nursing provides an essential resource when time is short and the need for practical clinical guidance is paramount. This second edition has been fully updated to reflect new guidelines and approaches which

have impacted emergency nursing in recent years. This handbook provides clear, focussed information that will aid all areas of patient assessment and management in emergency care. The concise format will enable the reader to quickly locate the information needed and provides alerts regarding critical 'must-dos' for ill adults and children. The skills section provides a quick summary of the many clinical skills needed in emergency care, ideal as an introduction for the uninitiated and as a refresher for skills performed infrequently. Additionally, this second edition has been expanded to cover nursing in major trauma and emergencies in the elderly. This handbook will empower nurses to deliver excellence in emergency care. Written by practising nurses and subject experts, the Oxford Handbook of Emergency Nursing is a unique and invaluable companion for qualified and student nurses, and to all health care professionals working in the emergency care setting.

Battlefield and Disaster Nursing Pocket Guide Apr 08 2021 Written by military nurses, the Battlefield and Disaster Nursing Pocket Guide is the premier quick reference guide for battlefield nurses on the front lines. This pocket guide contains critical assessment and treatment information, as well as translation guides to ensure accurate communication in the field. The care of patients with injuries received on the battlefield or in a disaster is specialized. Traumatic injuries may be more complex or unlike injuries seen in the hospital setting. In addition, the battlefield or disaster scene adds an additional level of complexity to medical care. Designed to fit in the pocket of a uniform, this unique pocket guide provides state-of-the-art, evidence-based recommendations for providing nursing care under exceptional conditions. The field guide was designed to fit in the pocket of a field uniform and to stand up to rigorous field conditions.
