**The Wealth of England** Oct 25 2021 The wool trade was undoubtedly one of the most important elements of the British economy throughout the medieval period - even the seat occupied by the speaker of the House of lords rests on a woosack. In The Wealth of England Susan Rose brings together the social, economic and political strands in the development of the wool trade and show how and why it became so important. The author looks at the lives of prominent wool-men; gentry who based their wealth on producing this commodity like the Stonors in the Chilterns, canny middlemen who rose to prominence in the City of London like Nicholas Brembre and Richard (Dick) Whittington, and men who acquired wealth and influence like William de la Pole of Hull. She

examines how the wealth made by these and other wool-men transformed the appearance of the leading centres of the trade with magnificent churches and other buildings. The export of wool also gave England links with Italian trading cities at the very time that the Renaissance was transforming cultural life. The complex operation of the trade is also explained with the role of the Staple at Calais to the fore leading to a discussion on the way the policy of English kings, especially in the fourteenth century, was heavily influenced by trade in this one commodity. No other book has treated this subject holistically with its influence on the course of English history made plain. Susan Rose presents a fascinating new exposition on the role of the wool trade in the economy and political history of medieval England. She shows how this simple product created wealth and status among men of hugely varying backgrounds, transformed market towns both economically and in architectural terms and contributed to fundamental social and cultural changes through trading links with Italy and other European countries at the height of the Renaissance

**The Flight of the Maidens** Mar 30 2022 The Whitbread Award-winning author of the Old Filth trilogy captures a moment in time for three young women on the cusp of adulthood. Yorkshire, 1946. The end of the war has changed the world again, and, emboldened by this new dawning, Hetty Fallows, Una Vane, and Lieselotte Klein seize the opportunities with enthusiasm. Hetty, desperate to escape the grasp of her critical mother, books a solo holiday to the Lake District under the pretext of completing her Oxford summer coursework. Una, the daughter of a disconcertingly cheery hairdresser, entertains a romantically inclined young man from the wrong side of the tracks and the left-side of politics. Meanwhile, Lieselotte, the mysterious Jewish refugee from Germany, leaves the Quaker family who had rescued her, to test herself in London. Although strikingly different from one another, these young women share the common goal of adventure and release from their middle-class surroundings through romance and education. "Gardam's lean, fast-paced prose is at turns hugely funny and deeply moving. . . . [Her] characters are acutely and compassionately observed." —Atlantic Monthly "Quirky, enchanting . . . with lively, laugh-out loud elan." —The Baltimore Sun "Splendid . . . Gardam's style is perfect." —The New York Times Book Review "With winning charm and wit . . . Gardam frames her story in dozens of crisp, brief scenes featuring deliciously dizzy conversation." —Kirkus Reviews (starred review) "Ebullient, humorous, and wise, this is a novel to savor." —Booklist "The portrait of postwar England as conventions crumble and the country is rebuilt is terrific." —Publishers Weekly

**Blockchain Chicken Farm** May 20 2021 A New York Times Book Review Editors' Choice "A brilliant and empathetic guide to the far corners of global capitalism." --Jenny Odell, author of How to Do Nothing From FSGO x Logic: stories about rural China, food, and tech that reveal new truths about the globalized world In Blockchain Chicken Farm, the technologist and writer Xiaowei Wang explores the political and social entanglements of technology in rural China. Their discoveries force them to challenge the standard idea that rural culture and people are backward, conservative, and intolerant. Instead, they find that rural China has not only adapted to rapid globalization but has actually innovated the technology we all use today. From pork farmers using AI to produce the perfect pig, to disruptive luxury counterfeits and the political intersections of e-commerce villages, Wang unravels the ties between globalization, technology, agriculture, and commerce in unprecedented fashion. Accompanied by humorous "Sinofuturist" recipes that frame meals as they transform under new technology, Blockchain Chicken Farm is an original and probing look into innovation, connectivity, and collaboration in the digitized rural world. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

**Original Death** Jun 08 2020 "Edgar-winner Pattison combines action, period details, and a whodunit with ease in his impressive third mystery set in Colonial America." —Publishers Weekly (starred review) Despite the raging war between French and British, Scottish exile Duncan McCallum has begun to settle into a new life on the fringes of colonial America, traveling the woodlands with his companion Conawago, even joining the old Indian on his quest to find the last surviving members of his tribe. But the joy they feel on reaching the little settlement of Christian Indians is shattered when they find its residents ritually murdered. As terrible as the deaths may be, Conawago perceives something even darker and more alarming: he is convinced they are a sign of a terrible crisis in the spirit world which he must resolve. Trying to make sense of the murders, Duncan is accused by the British army of the crime. Escaping prison to follow the trail of evidence, he finds himself hounded by vengeful soldiers and stalked by Scottish rebels who are mysteriously trying to manipulate the war to their advantage. As he pieces together the puzzle of violence and deception he gradually realizes that it may not only be the lives of Duncan and his friends that hang in the balance, but the very survival of the native tribes. When he finally discovers the terrible truth, Duncan is forced to make a fateful choice between his beloved Highland clans and the woodland natives who have embraced and protected him.

*Viking Knits and Ancient Ornaments* Sep 04 2022 Traditional knot and interlace patterns, combined to form uniquely striking contemporary designs. Ever since her ground-breaking book *Viking Patterns for Knitting* was published, Elsebeth Lavold has been recognized as one of the world's leading experts on cabling. It was within the pages of her international bestseller—described as “an indispensable milestone in 20th century knitting literature”—that Lavold first introduced the world to her own innovation: using lifted increases to create interlace patterns, and bringing new life to the ornamental heritage of the Vikings as adornment on modern knitwear. In the years since, Lavold has sought new ideas and “design cousins” to Viking patterns to explore with her needles, and has undertaken a fascinating journey through archives, museums, libraries, and the internet. In more than a decade of continued research, she has studied cultures from all over the globe in search of similar types of ornamental expression, creating the foundation for this exciting new book: a glorious collection rich in imagery, history, patterns, and designs. Dozens of different sources of inspiration, catalogued and placed within their cultural and historical context, from all around the world. Complete, step-by-step instructions for an abundance of fresh and stunningly beautiful knit designs, presented in the book with full-color photographs. Lavold's own painstaking analysis of a huge number of interlace motif types, displayed in both swatch and chart form, to allow you to compose your own patterns based on her research.

**Why Love Hurts** May 08 2020 Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

*Explaining Russian-German code-mixing* Nov 25 2021 The study of grammatical variation in language mixing has been at the core of research into bilingual language practices. Although various motivations have been proposed in the literature to account for possible mixing patterns, some of them are either controversial, or remain untested. Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk. This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech. The two aims are (i) to describe and analyze the variation in mixing patterns in the speech of Russia German adolescents and young adults in Germany, and (ii) to propose and test usage-based explanations of variation in mixing patterns in three morphosyntactic contexts: the adjective-modified noun phrase, the prepositional phrase, and the plural marking of German noun insertions in bilingual sentences. In these contexts, German noun insertions combine with either Russian or German words and grammatical markers, thus yielding mixed bilingual and German monolingual constituents in otherwise Russian sentences, the latter also labelled as embedded-language islands. The results suggest that the frequency with which words are used together mediates the distribution of mixing patterns in each of the examined contexts. The differing impacts of co-occurrence frequency are attributed to the distributional and semantic specifics of the analyzed morphosyntactic configurations. Lexical frequency has been found to be another important determinant in this variation. Other factors include recency, or lexical priming, in discourse in the case of prepositional phrases, and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking.
