**Climate Change** Dec 23 2019 The development of the carbon markets on the back of laws designed to mitigate climate change has been swift. Billions of euros of emission rights are now being traded around the world under cap and trade markets such as the EU Emissions Trading Scheme and from projects under the Kyoto Protocol. This market looks set to expand significantly over the next few years, with a number of countries, including the United States and Australia, considered likely to introduce market-based climate change mitigation measures. In addition, climate change issues are now impacting on a number of other more traditional practice areas for lawyers, including litigation, transactional work and real estate. This important new title introduces climate change law and describes how it has evolved. The book describes how carbon projects - particularly those under the Kyoto Protocol - are set up and operated, and how the credits from those projects are brought to the market. It also describes the operation of the carbon markets, with an exploration of how the current markets may be expanded to create a global market in the future. The final part considers how climate change issues are impacting on other areas such as accountancy and taxation, corporate social responsibility, transactions, litigation, competition and real estate. This book provides an in-depth overview of the current climate change issues facing lawyers and other professionals, including accountants, consultants, bankers and tax advisers. It provides a valuable source of information for those new to this fast-evolving sector through to more experienced climate change professionals.

*Inside Group Work* Dec 15 2021 A valuable guide to working with groups for a variety of purposes in the human services. Its distinctive strength is the focus on 'thinking group' and on theory informed reflective practice. Grounded throughout in the rich experiences of 'group insiders', the book is both engaging and informative. Definitely a recommended resource for practitioners, students and educators. Ros Thorpe, Professor of Social Work and Community Welfare, James Cook University Group facilitation is a core skill for social workers, community workers, youth workers, health workers

and psychologists. Inside *Group Work* offers a guide to group work theory and practice in a variety of human service settings. Drawing on thought-provoking contributions from experienced group leaders and participants, Fiona McDermott outlines the various ways in which group work can be used. Focusing particularly on psychoeducation groups, psychotherapy groups, mutual aid groups and social action groups, she explains that the purpose of the group should determine the form it takes. The key facilitation skills of listening, observing, intervening and responding under pressure are outlined. But McDermott argues these skills by themselves are not sufficient. Rather, facilitators need to 'think group' in order to be most effective. McDermott also explains the various stages groups go through, and looks at ways in which group facilitators can handle typical problems. She explores issues of power and leadership, and also the influence of gender, sexuality, ethnicity and age.

**The Architect's Guide to Running a Practice** Sep 12 2021 This is your essential one stop shop for information on starting and running a practice. Case studies and advice from practitioners, big and small, run alongside outlines of all the key topics, to give you an insight into the problems and challenges others have faced when setting up a design business. Accessible and informative, this handbook is the ideal first point of reference when starting a practice. Architects have many different reasons for setting up in practice; equally, there are many ways of running your own business. This handbook helps you consider whether or not you should set up on your own, examining issues such as financing, office space, recruitment, IT and working out a business plan. Some architects want to stay small, while others have ambitions to grow into large businesses. Some grow big accidentally. And then there are those who pick and choose their work carefully, and even turn down undesirable contracts, while others will grab at everything possible. This book would explore these different models and illustrate how different kinds of practice develop into successful businesses. Importantly, the book will stress that these issues are crucial - you may be the best designer in the world, but unless your business is well managed you will fail. On the other hand, some successful architects spend a lot of time looking for new work and attending to management issues, rarely finding the time for design work. This book would illustrate how architects have struck a balance between these two extremes.

**Picture Perfect Practice** May 08 2021 Foreword by Skip Cohen Translating the chaos of the real world into a breathtakingly simple, beautiful photograph can often seem like an impossible task. With busy, cluttered backgrounds and subjects who don't know how to pose, how can you take control and get a great shot no matter the situation? **Land Access and Resettlement** Mar 26 2020 This book is an up-to-date, accessible and practical guide on how to optimally plan for, implement and review land access and resettlement. It provides step-by-step information on how to avoid pitfalls, ensure that best practice is being employed and the correct standards are being applied. With useful real-life examples of when projects have gone well and when they haven't, the book is based on the main lessons that have been learned on-the-ground over the past decade. Natural resource projects can have considerable impacts on local communities, chiefly due to the need to acquire large areas of land. When projects are located in developing and middle income economies, the impacts are most keenly felt, as it often requires displacement of large rural populations, with predominately land-based livelihoods. The authors have planned, implemented and reviewed over 50 land access and resettlement projects in over 30 countries internationally, and conducted benchmarking exercises on a further 60 projects. This experience provides the basis for the book. The book guides the reader through the different stages of preparing for a land resettlement project. Land Access and Resettlement is a key social risk for the natural resources sector, particularly the mining, oil and gas industries, who are operating in a context of increased awareness and regulation regarding the potential social impacts of their activities. At the same time, companies increasingly appreciate the business case for 'getting social right'. This book provides a practical road map to corporate leaders, project managers, practitioners, academia, government and civil society for practically planning and implementing successful land access and resettlement, and creating win-win outcomes for companies and communities.
