**Emerging Trends in Indian Politics** Sep 09 2020 This study presents 13 articles interrogating themes likely to impinge on India's 15th general elections in 2009. These were written following intense discussion between the contributors and use available data as well as original data and analysis. The significance of the analyses goes beyond how much these questions find place in the campaign, or how much they would impact the electoral results. These have and would continue to be essential themes in Indian politics for some time. They would influence the country's politics, its leaders, parties and institutions and would be interrogated in political, policy and social science circles in the foreseeable future. They would in turn be impacted, redefined and perhaps transformed by political dynamics and social pressure. The first attempt of its kind to analyse the impact of certain emerging trends in politics on upcoming elections anywhere in the world, this book will be a useful addition to election studies and policy making in general.

**India as an Emerging Power** Apr 28 2022 These essays examine India's relations with key powers including the Russian Federation, China and the USA and with key adversaries in the global arena in the aftermath of the Cold War. One positive relationship is that of India's relations with Israel since 1992.

**India Inside** Oct 03 2022 From President Obama to Prime Minister Singh, Leaders worldwide now cite innovation as crucial to the future prospects of their respective nations and to global commerce in general. In **India Inside**, authors and respected London Business School professors Nirmalya Kumar and Phanish Puranam claim that the long-held monopoly on innovation by Western corporations is over—and that nations, policy makers, and organizations need to look East to a hidden movement that is changing how innovation happens. In **India Inside**, Kumar and Puranam deliver a wake-up call to thinkers and companies in the developed world, as well as to policy makers in India.

**EDUCATION IN EMERGING INDIA** Jan 26 2022 India is evolving in every sphere, and its education system is no exception. The change, however, is largely towards the betterment of the society as a whole; but still constraints are many in achieving a stringent yet 'beneficial for all' education system in the country. This book gives a thorough account on the Indian Education system—from its inception to the present day, and underlines the hurdles faced and the improvements needed to achieve a flawless system of imparting value education the students. The book begins by explaining fundamental theories of education—its meaning, nature and so on, and then proceeds to discuss the emerging Indian society and the constraints faced by its education system, like corruption, poverty, social discrimination, ill practices (drugs, violence, etc.). It further discusses the philosophies preached by the Indian and Western philosophers and educationists, like Swami Vivekananda, Sri Aurobindo, Rabindra Nath Tagore, Mahatma Gandhi, Rousseau, Froebel, and Maria Montessori, and their contribution in shaping the Indian Education system in some way or the other. The book further explains the concepts integral to Education in Emerging India, which are Education for All (Sarva Shiksha Abhiyan), Education for Women (girl child), Education for the Children with Special Needs, Education for National Integration, and Adult Education. It also discusses the revised education policies, with special emphasis on education commissions, and organizations involved in it. The book is designed for the undergraduate and postgraduate students of Education.

**Employment Policy in Emerging Economies** May 30 2022 Employment is a critical part of the macro-economy and a key driver of economic development. India's employment policy over the past three decades provides an important case study for understanding how government attitudes to the labour market contribute to an emerging economy's growth and development. This study contains important insights on the policy challenges faced by one of the world's most populous, labour abundant economies in securing employment in a context of structural change. The book considers India's approach to employment policy from a national and global perspective and whether policy settings promote employment intensive growth. Chapters in the first half of the volume evaluate India's approach to employment policy within the national and international context. This includes the ILO Decent Work program, the national agenda for inclusive growth, and national regulatory frameworks for labour and education. Chapters in the second half of the volume focus on how employment policy works in practice and its impact on manufacturing workers, the self-employed, women, and rural workers. These chapters draw attention to the contradictions within the current policy regime and the need for new approaches. **Employment Policy in Emerging Economies** will interest scholars, policy makers and students of the Indian economy and South Asia more generally. It will support undergraduate and postgraduate academic teaching in courses on economic development, global political economy, the Indian economy and global labour.

**Neoliberalism in the Emerging Economy of India** Jun 18 2021 Neoliberal economic reforms over the last four decades have altered the economic cartography of emerging market economies such as India, particularly in the context of international trade, investment and finance, and in terms of their effects on the real economy. This book examines the issues of financialization, investment climate and the impact of trade liberalization. By analysing these three features of neoliberal reform the book is unique, since it accommodates both a mainstream neoclassical approach and a non-mainstream political economy approach. The major questions answered by this book, cover three basic lines of enquiry pertaining to neoliberal reforms. They are (a) how financialization as a new process affects the real economic health of emerging market economies characterized by globalization; (b) how the changing form of international trade in the new regime impacts upon the informal economy, and employment and trade potential in the home country; and (c) how global investment has shaped the real economy in emerging countries like India. The book will be extremely useful for postgraduate students of international economics, particularly development economics and political economy, including researchers with a keen interest in India.

*India* Aug 01 2022 This landmark book provides the first comprehensive assessment of India as a political and strategic power since India's nuclear tests, its 1999 war with Pakistan, and its breakthrough economic achievements.

**India and China in the Emerging Dynamics of East Asia** Dec 01 2019 Though considerable research literature is now available on China–India relations, most of it still follows a conventional narrative, viewing the relationship through the narrow conflictual prism limited to South Asia than in the new, larger perspective, especially in the context of emerging East Asian dynamics. This book offers comprehensive analyses of some of these issues in papers addressing two broad themes. One, significant trends in the relationship between China and India on a range of issues, including economic development models, their military strategies, and the boundary dispute; and two, how others are responding to the rise of India and China and their impact on East Asia. Together, the chapters constitute a comprehensive study on both China–India relations and their concurrent rise, including a variety of perspectives and methodologies. Written by some of the top experts on the subject from India, China, Japan, and Taiwan and covering a broad range of issues, the book will generate considerable interest in understanding this relatively neglected dimension of today's East Asia.

*India* Dec 13 2020 For years, Americans have seen India as a giant but inept state. That negative image is now obsolete. After a decade of drift and uncertainty, India is taking its expected place as one of the three major states of Asia. Its pluralist, secular democracy has allowed the rise of hitherto deprived castes and ethnic communities. Economic liberalization is gathering steam, with six percent annual growth and annual exports in excess of \$30 billion. India also has a modest capacity to project military power. The country will soon have a two-carrier navy and it is developing a nuclear-armed missile capable of reaching all of Asia. This landmark book provides the first comprehensive assessment of India as a political and strategic power since India's nuclear tests, its 1999 war with Pakistan, and its breakthrough economic achievements. Stephen P. Cohen examines the domestic and international causes of India's "emergence," he discusses the way social structure and tradition shape Delhi's perceptions of the world, and he explores India's relations with neighboring Pakistan and China, as well as the United States. Cohen argues that American policy needs to be adjusted to cope with a rising India—and that a relationship well short of alliance, but far more intimate than in the past, is appropriate for both countries.

*Emerging Work Trends in Urban India* Jan 02 2020 This book offers an overview of India's emerging digital economy and the challenges and opportunities for urban workplaces. It examines contemporary economic and social transformations in India by focusing on how new technologies and policies are shaping urban work practices and patterns. The book emphasises on inclusive and equitable practices that consider the needs of the formal and informal sector workforce as essential to India's urban development. Drawing on insights from the intersections of society, economy, and environment along with theoretical frameworks from across disciplines, it examines key issues related to work trends in Indian urban economy and its digital landscape, including Industry 4.0 and technology-labour nexus, smart cities and innovation, urbanism and

consumerism, workplace transitions such as remote working and service industry, digital divide, skill development initiatives, and the impact of socio-economic inequalities and disruptions. The authors provide perspectives on the digital future of urban work in India and other emerging economies in the post-Covid-19 phase, and underscore the importance of enacting balanced policies, remodeling institutions, and equipping the labor force for adapting to new demands towards determining future employability and investments. This book will interest students, teachers and researchers of urban studies, urban sociology, sociology of work, labour studies, human and urban geography, economic geography, urban economics, development studies, urban development and planning, public policy, regional planning, politics of urban development, social and cultural change, urban sustainability, environmental studies, management studies, South Asian Studies, and Global South studies. It will also be useful to policymakers, non-governmental organisations, activists, and those interested in India and the global economy.

**Mission and the Emerging Indian Middle Class** Jul 20 2021 Union Biblical Seminary jointly with Interserve India organized its 18th Annual CMS Consultation, from 18th to 20th January 2012. The theme of the Consultation was "Mission and the Emerging Indian Middle Class". They based this Consultation on a survey entitled, "Survey Research on Serving Middle Class Indians" which was conducted in seven Indian cities (Bangalore, Kolkata, Nagpur, Pune, Chennai, Ahmedabad, and Guwahati) by Interserve India. Out of the many papers which were presented and discussed, we have selected five to form this book. It will be helpful for churches, mission agencies, missiologists and missionaries.

**India** Jan 06 2023 India is not only the world's largest and fiercely independent democracy, but also an emerging economic giant. But to date there has been no comprehensive account of India's remarkable growth or the role policy has played in fueling this expansion. India: The Emerging Giant fills this gap, shedding light on one of the most successful experiments in economic development in modern history. Why did the early promise of the Indian economy not materialize and what led to its eventual turnaround? What policy initiatives have been undertaken in the last twenty years and how do they relate to the upward shift in the growth rate? What must be done to push the growth rate to double-digit levels? To answer these crucial questions, Arvind Panagariya offers a brilliant analysis of India's economy over the last fifty years--from the promising start in the 1950s, to the near debacle of the 1970s (when India came to be regarded as a "basket case"), to the phenomenal about face of the last two decades. The author illuminates the ways that government policies have promoted economic growth (or, in the case of Indira Gandhi's policies, economic stagnation), and offers insightful discussions of such key topics as poverty and inequality, tax reform, telecommunications (perhaps the single most important success story), agriculture and transportation, and the government's role in health, education, and sanitation. The dramatic change in the fortunes of 1.1 billion people has, not surprisingly, generated tremendous interest in the economy of India. Arvind Panagariya offers the first major account of how this has come about and what more India must do to sustain its rapid growth and alleviate poverty. It will be must reading for everyone interested in modern India, foreign affairs, or the world economy.

**The Emerging Indian Economy** Dec 25 2021 As the U.S.-India relationship continues to deepen, some misconceptions unfortunately linger about the forces driving India's economic growth. Over the course of a year-long lecture series, the CSIS Wadhvani Chair in U.S.-India Policy Studies invited key business leaders to discuss the issues facing some of the foundational, albeit underexplored, sectors of the emerging Indian economy. Infrastructure, energy, health care, and manufacturing are all top priorities for India's leaders. The policies affecting these sectors will have long-lasting implications for India's growth trajectory. The business leaders who delivered public remarks for this project outlined some of those choices and their importance. You will find their respective analyses and recommendations compiled in this report.

**India, China and Globalization** Mar 16 2021 The momentum of economic progress in India and China will bring about the next major shift in geopolitics. This book analyzes the economic experience of both countries in the context of development and globalization, and offers insights that could be crucial for development thinking.

**Ethical Business Cultures in Emerging Markets** Jun 06 2020 This study examines the intersection of human resource development and human resource management with ethical business cultures in developing economies, and addresses issues faced daily by practitioners in these countries. It is ideal for scholars, researchers and students in business ethics, management, human resource management and development, and organization studies.

The Emerging Dimensions of Indian Management Oct 30 2019

*The Emerging Challenge* Aug 09 2020

**Shaping the Emerging World** Mar 28 2022 India faces a defining period. Its status as a global power is not only recognized but increasingly institutionalized, even as geopolitical shifts create both opportunities and challenges. With critical interests in almost every multilateral regime and vital stakes in emerging ones, India has no choice but to influence the evolving multilateral order. If India seeks to affect the multilateral order, how will it do so? In the past, it had little choice but to be content with rule taking—adhering to existing international norms and institutions. Will it now focus on rule breaking—challenging the present order primarily for effect and seeking greater accommodation in existing institutions? Or will it focus on rule shaping—contributing in partnership with others to shape emerging norms and regimes, particularly on energy, food, climate, oceans, and cyber security? And how do India's troubled neighborhood, complex domestic politics, and limited capacity inhibit its rule-shaping ability? Despite limitations, India increasingly has the ideas, people, and tools to shape the global order—in the words of Jawaharlal Nehru, "not wholly or in full measure, but very substantially." Will India emerge as one of the shapers of the emerging international order? This volume seeks to answer that question.

**India Emerging** Jun 30 2022 India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

**India, the Emerging Energy Player** Mar 04 2020 "India: The Emerging Energy Player" attempts to profile India's energy relations in the global context and fathom the issues it is facing in defending its energy interests in the changing world market. The nature of India's engagement with the Gulf, Iran, Russia, and Africa, and its understanding of the perceived competition are the major concerns of the book. It will be useful for academics, policy planners, and opinion makers not only in India but abroad as well.

**India's Emerging Economy** Aug 21 2021 Essays by leading academics, policymakers, and industrialists examine India's economic success in the late 1990s. India's economy over the last decade looks in many ways like a success story; after a major economic crisis in 1991, followed by bold reform measures, the economy has experienced a rapid economic growth rate, more foreign investment, and a boom in the information technology sector. Yet many in the country still suffer from crushing poverty, and social and political unrest remains a problem. These essays by leading academics, policymakers, and industrialists -- including one by Amartya Sen, the 1998 winner of the Nobel Prize in economics for his work on poverty and inequality -- examine the facts of India's recent economic successes and their social and cultural context. India's rate of economic growth after the 1991 reforms were instituted reached a remarkable 7 percent for three consecutive years, from 1994 to 1997. Several contributors to India's Emerging Economy ask what this means for the nation as a whole. In his essay "Democracy and Secularism in India," Amartya Sen argues that economic progress is not the only way to measure a nation's performance. Other essays examine the actual effect India's economic growth has had on reducing poverty and recommend policies to empower the poor. Essays also address such issues as globalization and the vulnerabilities and opportunities it creates, India's experience with monetary and fiscal reform, the rapid growth of the information technology sector (including a case study of India's software industry), and India's grassroots economy.

**Emerging Indian Multinationals** May 18 2021 Is there a distinctive 'India way' of doing business? This query finds resonance not only among corporate leaders but also in academic studies focusing on emerging market multinational enterprises (EMMNEs) in Asia. The speed and spread of EMMNEs has caught the world by surprise, and prompted a need to understand whether, why, and how multinationals from emerging economies are different from the ones in developed countries. Based on comparative data and interviews with over 90 senior managerial personnel from Indian multinationals, this book provides a comprehensive picture of the emerging multinational firms from India in terms of their internationalization process, competitive advantages, approach to global markets, and future outlook. With chapters from leading scholars in the field of international business, Emerging Indian Multinationals throws light on the characteristics, concerns, challenges, and strategies of Indian multinationals from an emerging-market perspective to facilitate crossvergence of best practices for all multinationals in a multipolar world.

**Understanding Emerging Markets** Oct 23 2021 Focusing on the dynamics of emerging markets, this informative book provides both an academically rigorous but also business-oriented analysis of the key issues inherent in Emerging markets (Ems).

**Rethinking Economic Development in Northeast India** Jan 14 2021 Economic development of frontier and remote regions has long been a central theme of development studies. This book examines the development experience in the northeastern region in India in relation to the processes of globalisation and liberalisation of the economy. Bringing together researchers and scholars, from both within and outside the region, the volume offers a comprehensive and updated analysis of governance and development issues in relation to the northeastern economy. With its multidisciplinary approaches, the chapters cover a variety of sectors and concerns such as land, agriculture, industry, infrastructure, finance, human development, human security, trade and policy. This book will be useful to scholars and researchers of economics, public policy, governance and development, geopolitics, geography, development studies, politics and sociology of development and area studies as well as observers and policymakers interested in the Northeast.

*External Dimension of an Emerging Economy, India* Feb 12 2021 This book offers an analysis of external dimensions of an emerging economy, India, in the backdrop of neoliberal globalisation. External dimensions of Indian economy signify her inter-relation with the rest of the world in terms of trade and financial flows and how that affects the development process within the country in the age of neoliberal globalisation. It is based on non-mainstream unorthodox approach in Economics and as such is a critique of the mainstream neoclassical position on current neoliberal globalisation. The contents of the book can be classified into as follows – (1) India's external dimension in the colonial period through the trade route ; (2) concerns with India's balance of payments transactions in terms of illegal flows, (3) political economy of development planning in the present era of globalisation, (4) capital flows as it affect the India's external front, (5) Indian industries under the TRIPs regime, (6) regional economic integration of India and (7) foreign capital flows in India during the liberalisation period. The entire book is an attempt to decipher the meaning and significance the process of globalisation produces for the real economy of India. The uniqueness of the book is that in one place one can find different unorthodox positions dealing with the external dimensions of emerging India, which cannot be found in any other book.

*Doing Gender, Doing Geography* Feb 01 2020 Until the 1970s gender had been invisible in analyses of social space and place in the androcentric discipline of geography. While recent contributions to feminist geography have challenged this, in India the engagement of geographers with gender, by being conservative in its choice of focus and orthodox in methodology, has been unable to destabilise the established disciplinary order. However, with younger scholars becoming increasingly interested in studying gender in geography, novel and innovative methods that include combinations of quantitative and qualitative analyses, visual sources and in-depth case studies are being tried out and accepted in geography despite its masculine legacy. This pioneering study brings together Indian geographers' contributions to understanding gender, and through them, seeks to enrich the discipline of geography. It engages with the recent 'spatial turn' in the social sciences, which has reclaimed the explanatory power of space and place in social theory that had been nearly lost to deconstructive postmodernist scholarship. The volume draws entirely from the Indian scholarship, showcasing contextualised knowledge production, but hopes to initiate a dialogue with scholars elsewhere working with feminist methodologies.

**Emerging Giants** Apr 16 2021 China and India are the two most populous countries in the world and now also two of the fastest growing. By sheer virtue of the fact that China and India are home to 2.4 billion people - two-fifths of the world's population - the rapid growth of their economies has far-reaching implications not just for global living standards and poverty reduction but also for competitiveness and distribution of income in the rest of the world. Commensurate with their economic progress, there has been a surge of interest in the nature and implications of China and India's economic growth. There are several apparent similarities in the development process of China and India: both are home to ancient civilizations that have bequeathed distinctive attitudes, institutions, and traditions. Both have very large populations. Both have performed well economically for more than two decades. However there are important differences that can be seen beneath the surface. China started the current reform process in 1978 - that is, almost fifteen years before India. The two countries have very different political systems. Their development models differ fundamentally as well. China has opened up much more than India to foreign trade and foreign direct investment, while India has a better developed banking system. Growth in the two countries has been driven by different sectors - Chinese growth by manufacturing and Indian growth by services. This volume brings together some of the best research on issues related to the growth experience of China and India and places these issues in a comparative perspective. It contains papers written by some of the leading academic and experts in the world on issues ranging from the roles of China and India in the world economy, contrasts in their development experience, and challenges to sustaining growth.

**Emerging India** Nov 23 2021 "As India marks the twenty-year milestone of economic liberalization, some concerns about the country's future prospects as an emerging power are beginning to be voiced; often, these stem from the past history of sharp swings in India's fortunes. Bimal Jalan, one of the country's well-known economists and former Governor of the Reserve Bank of India, has closely followed the path of India's economic policies across its changing trajectories, from before the time the economy was liberalized to the very present. The pieces that appear here were all written during the last twenty years, with the exception of three prescient notes from the mid-1970s highlighting the need for economic reforms to foster growth. The principal thought behind these essays is that, in the past twenty years, India's capacity to grow faster than ever before has increased substantially because of its comparative advantage in relation to other countries. However, Jalan points out that for India to seize the opportunities that lie ahead, it is essential to bring about further reforms in the running of India's politics and administration in order to ensure inclusive and incremental economic growth.
